Summary of Why Nations Fail Instaread Summaries, 2016-09-22 Summary of Why Nations Fail by Daron Acemoglu and James A. Robinson Includes Analysis Preview: Why Nations Fail: The Origins of Power, Prosperity, and Poverty is an examination of the causes of economic inequality. Authors Daron Acemoglu and James A. Robinson conclude that underdevelopment is caused by political institutions and not by geography, climate, or other cultural factors. Elites in underdeveloped countries deliberately plunder their people and keep them impoverished. The city of Nogales is half in Mexico and half in the United States. People in Nogales on the US side of the border are well-educated, prosperous, and have long life expectancies. Those on the Mexican side are poor, poorly educated, and have shorter life expectancies. The differences in Nogales can't be explained by geography or culture. Instead, different governments cause the differences in development. The United States historically established pluralist institutions that encouraged technological innovation and spread wealth throughout the population. By contrast, in Mexico, Spanish conquerors established extractive institutions that were intended to... PLEASE NOTE: This is key takeaways and analysis of the book and NOT the original book. Why Nations Fail Daron Acemoglu, James A. Robinson, 2013-09-17 NEW YORK TIMES AND WALL STREET JOURNAL BESTSELLER • From two winners of the 2024 Nobel Prize in Economic Sciences, “who have demonstrated the importance of societal institutions for a country’s prosperity” “A wildly ambitious work that hopscoches through history and around the world to answer the very big question of why some countries get rich and others don’t.”—The New York Times FINALIST: Financial Times and Goldman Sachs Business Book of the Year Award • ONE OF THE BEST BOOKS OF THE YEAR: The Washington Post, Financial Times, The Economist, BusinessWeek, Bloomberg, The Christian Science Monitor, The Plain Dealer Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, or geography that determines prosperity or poverty? As Why Nations Fail shows, none of these factors is either definitive or destiny. Drawing on fifteen years of original research, Daron Acemoglu and James Robinson

conclusively show that it is our man-made political and economic institutions that underlie economic success (or the lack of it). Korea, to take just one example, is a remarkably homogenous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The differences between the Koreas is due to the politics that created those two different institutional trajectories. Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, the Soviet Union, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, among them: • Will China's economy continue to grow at such a high speed and ultimately overwhelm the West? • Are America's best days behind it? Are we creating a vicious cycle that enriches and empowers a small minority? "This book will change the way people think about the wealth and poverty of nations . . . as ambitious as Jared Diamond's Guns, Germs, and Steel."—BusinessWeek

Regularly priced at \$9.99. Read on your PC, Mac, smart phone, tablet or Kindle device Acemoglu's theory and explanation of the differences in global prosperity is as enlightening as it is entertaining. He manages to make the puzzling concept dead simple to understand because the book, rather than a lengthy lecture explaining the theory, is a series of examples supporting it. After the first chapter, you will fundamentally understand the concept and theory behind this book, and each subsequent chapter will support the theory in fascinating ways. Take the opening example for instance: comparing a city, Nogales, that was literally cut in half by the US-Mexico border. So many history books and experts like to chalk up the world's current state to fate, such as in differences in climate or geographical location. Yet here is a shining example of how none of those things matter. At one point, this was just one city and now it has become two cities so different, you'd think their shared name and location was some sort of joke. SUMMARY - Why Nations Fail: the Origins of Power, Prosperity, and Poverty by Daron Acemoglu and James A. Robinson Shortcut Edition, 2020-11-19 * Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes.*As you read this summary, you will learn why the presence or absence of certain political and economic institutions encourage or retard progress toward prosperity.*You will also discover that : Poor countries are not poor because their leaders do not know how to enrich their people; China's current growth will not last; In many countries, the ruling elites oppose economic development for fear of losing their omnipotence; Some countries have managed to overcome many natural and cultural handicaps; Colonization, far from promoting development, has on the contrary impoverished the countries that were victims of it; Institutions evolve with history and sometimes take the wrong path.*Two localities that form one and have the same name: Nogales. One is in the United States, in the state of Arizona, and the other in Mexico, in the state of Sonora. The political boundary between the two cities is largely artificial: both have more or less the same population, the same culture. Why, then, is Nogales, Arizona, a rich city, while Nogales, Sonora, is a poor city? It's because they don't have the same institutions. The political and social institutions of Nogales-Arizona promote growth and economic development, while those of Nogales-Sonora discourage them. *Buy now the summary of this book for the modest price of a cup of coffee!

States and Peoples in Conflict Michael Stohl, Mark I. Lichbach, Peter Grabosky, 2017-04-07 This volume evaluates the state of the art in conflict studies. Original chapters by leading scholars survey theoretical and empirical research on the origins, processes, patterns, and consequences of most forms and contexts of political conflict, protest, repression, and rebellion. Contributors examine key pillars of conflict studies, including civil war, religious conflict, ethnic conflict, transnational conflict, terrorism, revolution, genocide, climate change, and several investigations into the role of the state.

The research questions guiding the text include inquiries into the interactions between the rulers and the ruled, authorities and challengers, cooperation and conflict, accommodation and resistance, and the changing context of conflict from the local to the global.

Making Sense of Corruption Bo Rothstein, Aiysha Varraich, 2017-03-09 This book provides a systematic analysis of how the understanding of corruption has evolved and pinpoints what constitutes corruption.

Pillars of Prosperity Timothy Besley, Torsten Persson, 2013-02-24 How nations can promote peace, prosperity, and stability through cohesive political institutions Little else is required to carry a state to the highest degree of opulence from the lowest barbarism, but peace, easy taxes, and a tolerable administration of justice; all the rest being brought about by the natural course of things. So wrote Adam Smith a quarter of a millennium ago. Using the tools of modern political economics and combining economic theory with a bird's-eye view of the data, this book reinterprets Smith's pillars of prosperity to explain the existence of development clusters—places that tend to combine effective state institutions, the absence of political violence, and high per-capita incomes. To achieve peace, the authors stress the avoidance of repressive government and civil conflict. Easy taxes, they argue, refers not to low taxes, but a tax system with widespread compliance that collects taxes at a reasonable cost from a broad base, like income. And a tolerable administration of justice is about legal infrastructure that can support the enforcement of contracts and property rights in line with the rule of law. The authors show that countries tend to enjoy all three pillars of prosperity when they have evolved cohesive political institutions that promote common interests, guaranteeing the provision of public goods. In line with much historical research, international conflict has also been an important force behind effective states by fostering common interests. The absence of common interests and/or cohesive political institutions can explain the existence of very different development clusters in fragile states that are plagued by poverty, violence, and weak state capacity.

Speaking Science to Power Rachel A. Epstein, Oliver Kaplan, 2024-09-16 Science has the potential to do much good. But it can also be misused and cause harm. How can researchers become aware of the risks and share their insights responsibly? This volume gathers a premier group of scholars and practitioners to address cutting-edge dilemmas of “responsible policy engagement.” The authors reflect on their own experiences and provide guidance on how to constructively communicate with policymakers - while also being transparent about the uncertainty and subtleties of the research process. The case studies cover tricky policy engagements on topics ranging from postconflict power-sharing, atrocities prevention, NATO enlargement, economic crises, and business and human rights to counterinsurgency and state-building, census data and polling, and intelligence analysis. To avoid pitfalls, the analyses offer a mix of ethical principles and practical advice, including setting cautionary ethical redlines, reflecting on one's position and values, and describing areas of consensus and degrees of uncertainty. Speaking Science to Power uncovers the temptations scholars may face to share particular results,

overgeneralize findings, conceal uncertainty, or curry favor with policymakers, and then urges them to act responsibly.

Out of China W. Ravesteijn, 2021-08-04 The Silk Road of the 21st Century, announced by Chinese President Xi Jinping in 2013, will certainly change the world. It will definitely stimulate economic growth and prosperity in China, the rest of Asia and elsewhere. But how can we prevent the environmental damage and the increasing inequality on a planetary scale brought about by the construction of this “road” - or in reality: a network of highways, railways, sea routes and other connections? This book deals with the question for the Maritime branch of the new Silk Road and discusses relevant strategies and technologies for sustainable and responsible port innovation and development. The backbone of the study is formed by a number of case studies of port projects in and outside of China. Some chapters focus on best practices, while others discuss new academic viewpoints, but in all cases, suggestions for improvement are given. Based on the idea that a large investment agenda also creates moral responsibility, the Chinese cases also serve to ascertain whether and to what extent they can serve as an example for projects elsewhere. A few introductory and thematic chapters and the conclusion give steering and sense to the rest of the book. Ultimately, this title gives a first and coherent analysis and assessment of a project that is unparalleled in the world and that constitutes an important determining factor for our future.

African Countries and the Global Scramble for China Ngonlardje Kabra Mbaidjol, 2018-12-10 In this new book on Africa-China relations, Ngonlardje Kabra Mbaidjol strongly engages in the heated debates on African cooperation with China, an increasingly rich and powerful partner. The current dominant view highlights the neo-colonial and exploitative nature of these relations with a denial of any positive results for African people. However, the growing China-Africa partnership took its roots at Bandung 1955 conference, to culminate with an overt competition between China and other nations over African resources. For many, a new scramble for Africa emerges. The author argues there is rather a global scramble for China, a fierce battle to get the PRC's kind attention. Africa is right to engage the struggle to access China's development funding. Africa may wish to avoid being distracted by rival voices, but to endeavor doing its own homework and rehearse for the global competition, in the only interest of African people. Mbaidjol's book unpacks Africa's preparedness and rehearsal strategy.
