**Remediating Sound** Holly Rogers,Joana Freitas,João Francisco Porfírio,2023-09-07 Remediating Sound studies the phenomena of remixing, mashup and recomposition: forms of reuse and sampling that have come to characterise much of YouTube's audiovisual content. Through collaborative composition, collage and cover songs to reaction videos and political activism , users from diverse backgrounds have embraced the democratised space of YouTube to open up new and innovative forms of sonic creativity and push the boundaries of audiovisual possibilities. Observing the reciprocal flow of influence that runs between various online platforms, 12 chapters position YouTube as a central hub for the exploration of digital sound, music and the moving image. With special focus on aspects of networked creativity that remain overlooked in contemporary scholarship, including library music, memetic media, artificial intelligence, the sonic arts and music fandom, this volume offers interdisciplinary insight into contemporary audiovisual culture.

*Musical Imaginations* David Hargreaves,Dorothy Miell,Raymond MacDonald,2012 Musical imagination and creativity are amongst the most abstract and complex aspects of musical behaviour, though, until recently, they have been difficult to subject to empirical enquiry. However, music psychology and some allied disciplines have now developed, both theoretically and methodologically, to the point where some of these topics are now firmly within our grasp. The study of creativity and imagination is growing rapidly in disciplines including psychology, sociology,neuroscience, and education. The inter- and multidisciplinary study of music, and developments in music psychology in particular, mean that studies of musical imagination and creativity in action are now distinctly possible'Musical Imaginations' is a wide ranging, multidisciplinary review of the latest theory and research on musical creativity, performance and perception by some of the most eminent scholars in their respective disciplines. The topics addressed in this book include the investigation of creativity and imagination in music and emotion, composition and improvisation, performance and performance traditions, listening strategies, different musical genres and cultural belief systems, socialcollaboration, identity formation, and the development of psychologically-based strategies and interventions for the enhancement of performing musicians.With creativity now a topic of significant interest, this book will be valuable to all those in the fields of psychology, sociology, neuroscience,

education, as well as to musicians themselves - dealing with practical as well as theoretical issues in music therapy, performance and education. The study of creativity and imagination is growing rapidly in disciplines including psychology, sociology, neuroscience, and education. The inter- and multidisciplinary study of music, and developments in music psychology in particular, mean that studies of musical imagination and creativity in action are now distinctly possible. This book undertakes a multidisciplinary review of these developments. It contains a wide range of contributions by some of the most eminent scholars in their respective disciplines, representing a comprehensive account of the state of the art of theory and research on musical creativity, performance and perception.
