Trends in Latin American Psychology Wilson López-López, Hernán Camilo Pulido-Martínez, Irene Giovanni-Aguilar, 2025-04-21 This book brings together English versions of a selection of articles originally published in Spanish in *Universitas Psychologica*, one of the most important psychology journals in Latin America. It's an anthology of theoretical and research papers published by important Latin American psychologists that aim to provide the international community with a representative sample of research trends in Latin American psychology in different subfields. This anthology is organized in three parts, each one containing a selection of articles from different subfields of psychological research and practice. The first part brings together papers in the fields of social and community psychology, two areas in which Latin American psychologists have developed quite original contributions to research and practice. The second part is dedicated to articles showcasing research conducted with Latin American children and youth in the fields of educational, cognitive and developmental psychology. Finally, the third part highlights articles that present contributions of research in fields such as neuropsychology, clinical and health psychology to the improvement of mental and physical health care of the Latin American population. Each part starts with an introduction especially written by the volume editors for this anthology. *Trends in Latin American Psychology: Research Published in Universitas Psychologica* will be of interest to researchers in many subfields of psychology, especially to those interested in international and cross-cultural psychology, as the book offers a significative sample of the best research done by Latin American psychologists. The translation of the original articles in Spanish into English was done with the help of artificial intelligence. A subsequent human revision was done primarily in terms of content.

¿Conoces cómo conoces? Hacia una epistemología de la psicoterapia Alejandro Cifuentes-muñoz, 2024-10-01 Imagina a una persona que siente angustia y que va a consultar a cuatro psicoterapeutas distintos para entender qué le ocurre. El primero le dice que presenta un conflicto no resuelto entre algunos mecanismos de defensa y ciertos impulsos libidinales (corriente psicodinámica). El segundo, que su angustia representa una conducta disfuncional aprendida y reforzada por ciertas creencias irracionales (corriente cognitivo-conductual). El tercero, que tal persona carece de un sentido de vida, lo que limita su tendencia inherente a la autorrealización (corriente humanista). El último, que su angustia es una manifestación particular e interaccional del sistema del que es parte (corriente sistémica). Pero ¿quién tiene razón? Todos y ninguno.

Promoting Sustainable Development Goals in Physical Education: The Role of Motor Games Lavega-Burgués, Pere, Pic, Miguel, 2025-02-14 Motor play, being a dynamic and participatory activity, provides an ideal platform to address relevant topics such as health and well-being, inclusion and equity, environmental respect, and the promotion of active and healthy lifestyles. By incorporating a multidisciplinary approach, it enriches the educational experience by relating physical education concepts to other areas of knowledge such as social sciences, natural sciences, and personal and social development. The contributions of motor play to the 2030 agenda in physical education go beyond simple physical exercise, serving as a vehicle to shape citizens committed to sustainability and global well-being, while developing fundamental physical, emotional, and social skills for life. *Promoting Sustainable Development Goals in Physical Education: The Role of Motor Games* focuses on integrating motor play as a fundamental tool in physical education to promote the sustainable development goals established in the 2030 agenda. The aim is not only to develop motor and physical skills but also to foster values and practices that contribute to a more sustainable and equitable future. Covering topics such as motor conflict, socio-emotional well-being, and student motivation, this book is an excellent resource for educators, school administrators, healthcare professionals, environmentalists, professionals, researchers, scholars, academicians, and more.

Clinical Interventions in Systemic Couple and Family Therapy Roberto Pereira, Juan Luis Linares, 2018-07-06 This timely update presents modern directions in systemic therapy practice with couples and families, focusing on clinical innovations from Italy, Portugal, and Spain. Top therapists discuss their breakthrough family work in treating familiar pathologies such as depression, borderline personality disorder, infidelity, and addictions, providing first-hand insight into meeting relational dysfunction with creativity and resourcefulness. The book applies novel conceptualizations and fresh techniques to complex situations including multi-problem families, involuntary clients, disability-related issues, anorexia, love and sex in aging, and family grief. From tapping into the strengths of siblingship to harnessing the therapeutic potential of the Internet, the book's cases illustrate the rich variety of opportunities to improve client outcomes through systemic couple and family therapy. This practical guide: Demonstrates strategies for therapists to improve practice Exemplifies methods for reducing the gap between clinical theory and practice Identifies multiple dimensions of systems thinking in case formulation and therapy Offers new insights into treating classic and recent forms of psychopathology Provides a representative picture of couple and family therapy in southern Europe *Clinical Interventions in Systemic Couple and Family Therapy* is of particular relevance to practitioners and clinicians working within couple and family therapy, and is also of interest to other professionals working in psychotherapy and professional mental health services.

Biodiversity Loss Assessment for Ecosystem Protection Rathoure, Ashok Kumar, 2024-05-29 In an era defined by relentless human activities and rapid ecological transformations, the world faces an escalating crisis – the precipitous loss of biodiversity. As we grapple with the consequences of industrialization, urbanization, and unchecked developmental pursuits, the very fabric of life on Earth is unraveling. Biodiversity, encompassing the myriad species, their genetic variations, and the intricate interplay within ecosystems, is diminishing at an unprecedented pace. This decline, termed biodiversity loss, extends beyond a mere statistical measure; it reflects the unraveling of the intricate tapestry that sustains life on our planet. In the face of climate change, pollution, habitat loss, overexploitation of species, and the invasion of non-native species, the urgency to address biodiversity loss has never been more critical. It is against this backdrop that this book emerges, titled *Biodiversity Loss Assessment for Ecosystem Protection*. This groundbreaking work not only unveils the theoretical frameworks surrounding biodiversity conservation but also presents the latest empirical research findings, making it an indispensable tool for professionals across diverse disciplines. From stress on biodiversity and impact assessment to innovative approaches for studying terrestrial, aquatic, and marine components, each chapter provides a deep dive into specific facets of biodiversity loss. The objective is clear: to equip scholars with the knowledge they need to contribute meaningfully to the preservation of our planet's rich biological heritage.

Autoconstrucción Jorge Riechmann, 2018-05-08 La cultura predominante desprecia profundamente las ventajas de los vínculos colectivos y los valores comunes para hacer frente a los asuntos que son de todos y cada uno. Sois libres, nos dicen, porque podéis acumular ilimitadamente bienes materiales, aunque eso suponga el sufrimiento de otros seres humanos y el colapso del planeta. Hoy son muchas las personas que se plantean la necesidad de llevar a cabo un cambio cultural, que no desean simplemente plegarse a los mecanismos que nuestra sociedad —toda sociedad— tiene ya dispuestos para ahormarnos; también son muchas las que se sienten impotentes ante las dificultades que obstaculizan esa transformación. Para todas ellas está dedicado este libro. Porque a diferencia de, por ejemplo, los chimpancés, los seres humanos tienen muchas opciones de modificar reflexivamente su conducta, de ahí que Jorge Riechmann nos muestre algunas de las rutas para emprender el camino de una autoconstrucción crítica, tanto personal como colectiva. ¿Quiere esto decir que quienes quieren cambiar los estándares culturales del consumo conspicuo estén en contra de los placeres en la vida cotidiana? No; están en contra de la desigualdad y, por lo tanto, contra aquellos refinamientos y placeres que se compran a costa del padecimiento de otros. Por eso, este libro se interroga por algunas dimensiones culturales de esa posible transformación y

desemboca en propuestas como las ecosofías, el descentramiento del ego y la militancia de la alegría.

Spinoza Bula Caraballo, Germán Ulises, 2018-01-15 Si se considera que la sociedad actual, tal como funciona, funciona bien, resulta sensato pensar en maneras de conservar su funcionamiento; para quien piensa que es urgente la transformación radical, resulta suicida ser conservador. Este libro es para quienes piensan lo segundo. Como explica Werner Jaeger en *Paideia*, la educación, consiste en la producción de seres humanos según cierto modelo. Como el alfarero que moldea una vasija, cada sociedad. ¿En qué consistirá una educación pensada para transformar las sociedades, en lugar de conservarlas? Este libro desarrolla una idea de educación a partir de la filosofía de Spinoza, según la cual la formación no consiste en adquisición de una forma, según un molde adecuado, sino en el incremento en maneras de ser, en la flexibilización de la propia forma, en la autorrealización, como la entiende el filósofo noruego Arne Naess. La construcción de esta nueva idea de formación implica una reconstrucción del pensamiento de Spinoza, en la que se descubren afinidades entre este pensador y la fenomenología de Edmund Husserl, la idea de individuación de Gilbert Simondon, la cibernética y la poesía de Walt Whitman. Esta visión de la educación implica una nueva concepción de la institucionalidad educativa: habrían que ceder gran parte del control a la periferia (profesores, alumnos, instituciones), en contra del estricto control que hoy en día se ejerce mediante el ranqueo y las pruebas estandarizadas. Para medir el éxito de una educación encaminada a producir la diferencia, es necesario combinar la heteroevaluación mediante estándares con una autoevaluación genuina, es decir, una evaluación en la que el evaluado mismo especifica los raseros y dimensiones con que ha de medirse. Más allá de lo institucional, esta visión de la educación implica una nueva concepción de la cohesión social, basada no en la homogeneización, sino en la producción de múltiples y rizomáticas relaciones de simbiosis basadas en diversidad misma.

Una unidad sagrada Gregory Bateson, 2010-09-15 La obra monumental de Gregory Bateson fue una de esas ausencias

significativas en la nutrición intelectual de los pueblos hispanoamericanos. En esta nueva compilación de trabajos, Bateson conduce al lector a lo largo de las sendas intelectuales por las que él mismo llegó a su ahora famosa síntesis. Una unidad sagrada incluye la última conferencia de Bateson y una bibliografía completa de toda su obra publicada.
