**Music Learning with Massive Open Online Courses (MOOCs)** L. Steels, 2015-11-24 Massive Open Online Courses, known as MOOCs, have arisen as the logical consequence of marrying long-distance education with the web and social media. MOOCs were confidently predicted by advanced thinkers decades ago. They are undoubtedly here to stay, and provide a valuable resource for learners and teachers alike. This book focuses on music as a domain of knowledge, and has three objectives: to introduce the phenomenon of MOOCs; to present ongoing research into making MOOCs more effective and better adapted to the needs of teachers and learners; and finally to present the first steps towards 'social MOOCs', which support the creation of learning communities in which interactions between learners go beyond correcting each other's assignments. Social MOOCs try to mimic settings for humanistic learning, such as workshops, small choirs, or groups participating in a Hackathon, in which students aided by somebody acting as a tutor learn by solving problems and helping each other. The papers in this book all discuss steps towards social MOOCs; their foundational pedagogy, platforms to create learning communities, methods for assessment and social feedback and concrete experiments. These papers are organized into five sections: background; the role of feedback; platforms for learning communities; experiences with social MOOCs; and looking backwards and looking forward. Technology is not a panacea for the enormous challenges facing today's educators and learners, but this book will be of interest to all those striving to find more effective and humane learning opportunities

for a larger group of students.

**Charlie Parker, Composer** Henry Martin, 2020 Charlie Parker, Composer is the first assessment of a major jazz composer's oeuvre in its entirety. Providing analytical discussion of each of Parker's works, this study combines music-theoretical, historical, and philosophical perspectives. A variety of analytical techniques are brought to bear on Parker's compositions, including application of a revised Schenkerian approach to the music that was developed through the author's prior publications. After a review of Parker's life emphasizing his musical training and involvement in composition, the book proceeds by considering the types of Parker pieces as categorized by overall form and harmony and the amount of preplanned music they contain. The historical circumstances of each piece are reviewed, and, in some cases, sources of the ideas of the most important tunes are explored. The introduction includes a discussion of the ontology of a jazz composition. The view is advanced that the Western concept of a music composition needs to be expanded to embrace practices typical of jazz composition and forming a significant part of Parker's work. While focusing on Parker's more conventional tunes, the book also considers his large-scale melodic formulas. Two formulas in particular are arguably compositional, since they are repeated in subsequent performances of the same piece. As part of the research for this book, all of Parker's copyright submissions to the Library of Congress were examined and photographed. The book reproduces the four of them that were copied by Parker himself--
