The Massachusetts General Hospital Handbook of Pain Management Gary Brenner, James Rathmell, 2020-08-20
Offering expert guidance from seasoned clinicians at Massachusetts General Hospital, this bestselling handbook provides accurate, clinically essential information in a portable, quick-reference format. Broad-based, multidisciplinary coverage draws from the disciplines of anesthesiology, neurology, behavioral medicine, nursing, psychiatry, and physical therapy to provide practical, evidence-based information for sound therapeutic choices. Now in full color for the first time, The Massachusetts General Hospital Handbook of Pain Management, Fourth Edition, contains numerous new chapters, new illustrations, and other features that keep you up to date with today's latest approaches to pain management.

Essentials of Treatment Planning Mark E. Maruish, 2019-11-12
Essentials of Treatment Planning, Second Edition is an updated and easy-to-use guide to the development and use of treatment plans for behavioral health care patients. The book incorporates current research and developments in treatment planning that have occurred since the publication of the first edition. Designed as a nuts-and-bolts guide, the book covers essential material such as the role and benefits of treatment planning in a clinical setting, approaches for conducting comprehensive patient assessments, the use of assessment information to develop individual treatment plans, and strategies for ongoing evaluations and revisions of treatment plans. *Essentials of Treatment Planning, Second Edition* explores how to develop and use treatment plans to strengthen the entire treatment process. An important component in documentation, accurate treatment plans provide myriad benefits, including: meeting the accountability criteria of insurers and behavioral health care organizations, enhancing efficient coordination of care with other health care professionals, and facilitating better communication with outside reviewers. In addition, behavioral health professionals—psychologists, psychiatrists, clinical social workers, mental health and substance use counselors, and others—may gain the added security of protection from certain types of litigation. As part of the *Essentials of Mental Health Practice* series, the second edition of *Essentials of Treatment Planning* contains the information busy behavioral health professionals need to practice knowledgeably, efficiently, and ethically in today's behavioral health care environment. Each chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as Test Yourself questions that help gauge and reinforce your grasp of the information covered.

The Psychosomatic Assessment Fava, Giovanni Andrea Fava, N. Sonino, T. N. Wise, 2012
Expands and refines the

psychosomatic approach in clinical practice Psychosomatic medicine has developed methods to increase diagnostic accuracy and improve targeted therapeutic approaches in all fields of medicine. In this context, clinimetrics, the science of clinical measurements, provides unprecedented opportunities for psychosomatic assessment. This volume illustrates how this approach can be translated into everyday practice complementing and improving the medical interview. The most sensitive and reliable clinical methods are presented for evaluating specific psychosocial aspects of disease, i.e. childhood adversities, life events and chronic stress, lifestyle, sexual function, subclinical and affective disturbances, personality, illness behavior, well-being and family dynamics. Each chapter provides practical illustrations as to how crucial information can be obtained with specific methods individualized according to the patients' needs. A hyperlink is provided to a website that contains many of the instruments assessed in the volume. This book enables the reader to understand the value of the psychosomatic approach in clinical practice. It is intended to expand and refine the skills of clinicians who work in general and specialized medicine and psychiatry, whether physicians, psychologists or other health professionals.

Preventing the School-to-Prison Pipeline Charles Bartholomew, 2023-03-21 Preventing the School-to-Prison Pipeline is the first book written to provide school psychologists and other K-12 mental health professionals with knowledge and strategies intended to help them disrupt the criminalization of historically oppressed learners in today's classrooms. A phenomenon of the United States' intersecting education and criminal justice systems, the school-to-prison pipeline is the process by which school staff punish already marginalized or at-risk students—primarily Black youth—in ways that enable a lifetime of targeting by police, court, and carceral operations. Exploring the unmet needs of students with mental, emotional, and behavioral health disorders, the effects of implicit and explicit bias, adverse school and court policies, and other biopsychosocial factors, this powerful book offers a preventative, public-health approach to providing clinical care to vulnerable students without compromising school safety. School psychologists, counselors, and social workers will come away with urgent and actionable insights into advocacy, collaboration, preventive interventions, alternative discipline measures in schools, and more.

Focused Psychosocial Assessment Tool Council of Nephrology Social Workers, National Kidney Foundation, 2001

Factor Analysis of the Psychosocial Assessment Tool (PAT2.0) Sara Elizabeth Haugli, 2013 The Psychosocial Assessment Tool (PAT2.0) is used in hospitals to help families who have been newly affected by childhood cancer. Specifically, this screener helps patients, their caregivers and siblings, and psychosocial staff. The PAT2.0 pinpoints problems and allows staff to address concerns efficiently. As health care costs rise, use of the PAT2.0 could decrease the costs of intervention services by providing preventative psychosocial care. With a sample (N = 345) of families who have been affected by childhood cancer from Mississippi and New York, the present exploratory factor analysis (EFA) supported a six-factor solution that expands on research of the screener's published structure. Five factors were similar to subscales on the PAT2.0. The sixth factor was a

combination of 2 subscales. The purpose of this study was to evaluate higher-level psychometrics of the PAT2. 0, conduct the first factor analysis done to the screener, and provide further psychometric evaluation by researchers not in connection with the developers. Furthermore, the investigation tested the internal consistency reliability in a larger sample size. Future research should attempt to confirm the present factor structure and further validate the psychometrics.
