Historical Dictionary of Ho Chi Minh City Justin Corfield,2014-11-01 Offering a concise overview of Ho Chi Minh City's history and development, the 'Historical Dictionary of Ho Chi Minh City' presents a comprehensive historical survey of the city in the form of an alphabetical list of keywords and names, with accompanying definitions. Both well-researched and authoritative, the volume draws upon a wide range of modern sources, and contains an introductory essay about the city, a chronology, a list of acronyms and abbreviations, photographs and appendixes of supplemental information.

Some Basic Information on Ho Chi Minh City,1988

Making Megacities in Asia Du Huynh,2019-10-19 This book analyses and compares the development paths of five major cities in East and Southeast Asia since the early 1960s, including Ho Chi Minh City, Jakarta, Manila, Seoul, and Shanghai. In examining these five cases through a carefully crafted conceptual framework, the author excavates an understanding of the dynamics that have enabled Seoul and Shanghai to become highly competitive as major engines of economic growth, while simultaneously accounting for why the other three cities have faced numerous problems in terms of meeting their development goals. Presenting both quantitative and qualitative data to trace the course of changes between 1960 and 2015, the case studies curate six possible explanations for the different cities' developmental trajectories. The book considers the national development strategy matters to the development of cities and positions the share of budget revenue retained for cities' expenditure as critical. The author demonstrates that consistently pursuing long-term strategies is important, and that public entrepreneurship with powerful supporting coalitions is vital. The book illustrates how master plans have played limited roles in the building of cities, and that fragmented governments are often at the root of the problems facing a city's development. This book will be highly relevant to researchers in international and Asian urban development.

Urban and Transit Planning Francesco Alberti,Mourad Amer,Yasser Mahgoub,Paola Gallo,Adriana Galderisi,Eric Strauss,2022-06-17 This book incorporates a wealth of research focused on the more and more urgent challenges that urban planning and architectural design all over the world must cope with: from climate change to environmental decay, from an increasing urban population to an increasing poverty. In detail, this book aims at providing innovative approaches, tool and case study examples that, in line with the agenda of 2030, may better drive human settlements toward a sustainable, inclusive and resilient development. To this aim, the book includes heterogeneous regional perspectives and different methodologies and suggests development models capable of limiting further urban growth and re-shaping existing cities to improve both environmental quality and the overall quality of life of people, also taking account the more and more close relationships among urban planning and technological innovation.

Sustainable Ho Chi Minh City: Climate Policies for Emerging Mega Cities Antje Katzschner,Michael Waibel,Dirk Schwede,Lutz Katzschner,Michael Schmidt,Harry Storch,2015-12-01 As climate change and urban development are closely interlinked and often interact negatively, this edited volume takes Ho Chi Minh City (HCMC), Vietnam's first mega-urban

region as a case study to analyse its vulnerability to climate change and to suggest measures towards a more sustainable urban development. The book offers an overview on land use planning regarding the aspects of urban flooding, urban climate, urban energy and urban mobility as well as spatial views from the angle of urban planning such as the metropolitan level, the city, the neighbourhood and building level. It shows that to a significant degree, measures dealing with climate change can be taken from the toolbox of sustainable urban development and reflects how institutional structures need to change to enhance chances for implementation given socio-cultural and economic constraints. This is merged and integrated into a holistic perspective of planning recommendations, supporting the municipal government to increase its adaptive capacity. The authors are members of a German government funded research project on how to support HCMC's municipal government to adapt to risks related to climate change.
