

Humbolt University Of Berlin

Charlotte Klonk

New Laboratories Charlotte Klonk,2016-04-11 New laboratory buildings are currently being planned all around the world. Are they different from or even better than their predecessors? To answer this question, the authors of this book have journeyed into the past and present of laboratory architecture. They discuss the images of the research scientist and the laboratory that have been purveyed since the natural sciences were institutionalised in the nineteenth century. They also examine contemporary architectural solutions in the light of influential laboratory architectures of the latter half of the twentieth century, thereby discovering a great variety of approaches, historical and contemporary - for both the functional interrelation of spaces and the tension between symbolic façades and internal structures can take very different forms.

The Closed World of East German Economists Till Düppe,2023-05-11 History is replete with examples of scientists and social scientists working under the yoke of oppressive regimes. In *The Closed World of East German Economists*, Till Düppe tells the story of a generation of economists whose entire careers coincided with the forty-one-year existence of the German Democratic Republic (GDR). In a micro-historical fashion, he examines the world of East German economists through the formative episodes in the lives of five different economists from this “hope” generation. Using both the perspective of the actors as expressed in interviews and archival material unknown to the actors, the book follows East German economics from the early days of the acceptance of Marxism-Leninism through to its interaction with Western economics and its eventual dissolution following the collapse of the Berlin Wall. It is fascinating insight into the challenges faced by economists in a unique period of European history.

On the Cusp of the Silent Wave of the Long COVID Pandemic: Why, what and how should we tackle this

emerging syndrome in the clinic and population? Nuno Sepulveda ,Francisco Westermeier,2024-11-11 Most of the world is happily witnessing a decline in the burden of COVID-19 disease after the global efforts to develop, produce, and deploy anti-SARS-CoV2 vaccines to massive country-level vaccination campaigns. At the same time, this decline is coming at the cost of a silent public crisis due to the rise in the number of people suffering from the post-COVID-19 syndrome (commonly known as long COVID). These people experience a wide set of symptoms, such as persistent fatigue, post-exertional malaise after minimal physical or mental effort, and unrefreshing sleep, representing a substantial healthcare burden worldwide. Some of these people also comply with the current criteria for the diagnosis of Chronic Fatigue Syndrome (CFS), a complex disease often stigmatized by society and neglected by research funders over the years.
