Encyclopedia of White Power Jeffrey Kaplan,2000 This volume takes an objective look at the white supremacy movement since WWII in the United States and Europe, and offers entries describing the people, groups, and themes that make up the radical racist right. Some of the entries have been written by movement activists, others by a variety of scholars. The second half of the volume includes primary documents of resources circulated within the movement, each prefaced by Kaplan (American studies, U. of Helsinki, Finland) and placed in historical and scholarly context. The material is at times offensive, but presented in an academic way. Annotation copyrighted by Book News Inc., Portland, OR

**The Problem of Unbelief in the Sixteenth Century, the Religion of Rabelais** Lucien Febvre,1982 Lucien Febvre's magisterial study of sixteenth century religious and intellectual history, published in 1942, is at long last available in English,

in a translation that does it full justice. The book is a modern classic. Febvre, founder with Marc Bloch of the journal *Annales*, was one of France's leading historians, a scholar whose field of expertise was the sixteenth century. This book, written late in his career, is regarded as his masterpiece. Despite the subtitle, it is not primarily a study of Rabelais; it is a study of the mental life, the mentalité, of a whole age. Febvre worked on the book for ten years. His purpose at first was polemical: he set out to demolish the notion that Rabelais was a covert atheist, a freethinker ahead of his time. To expose the anachronism of that view, he proceeded to a close examination of the ideas, information, beliefs, and values of Rabelais and his contemporaries. He combed archives and local records, compendia of popular lore, the work of writers from Luther and Erasmus to Ronsard, the verses of obscure neo-Latin poets. Everything was grist for his mill: books about comets, medical texts, philological treatises, even music and architecture. The result is a work of extraordinary richness of texture, enlivened by a wealth of concrete details--a compelling intellectual portrait of the period by a historian of rare insight, great intelligence, and vast learning. Febvre wrote with Gallic flair. His style is informal, often witty, at times combative, and colorful almost to a fault. His idiosyncrasies of syntax and vocabulary have defeated many who have tried to read, let alone translate, the French text. Beatrice Gottlieb has succeeded in rendering his prose accurately and readably, conveying a sense of Febvre's strong, often argumentative personality as well as his brilliantly intuitive feeling for Renaissance France.
