Journal of the Senate Philippines. Congress (1987-). Senate, 1993

The Roots of Rhetoric Haider Nizamani, 2000-09-30 In an unanticipated flurry of atomic weapons testing—a total of 10 tests over 20 days in 1998—India and Pakistan announced to the world their emergence as full-fledged nuclear powers. How, Nizamani asks, did nuclear escalation come to dominate the agendas of both nations? In a comparative analysis, Nizamani reveals the political underpinnings of nuclear weapons development, arguing that Indian and Pakistani nuclearization is linked to processes of national formation. Working within the Critical Security Studies framework, Nizamani traces the development of nuclear discourses in India and Pakistan from early nationhood to the present. Nizamani defers conclusive identification of real or objective national threats, and instead examines the historical specificities and internal tensions of the dominant Indian and Pakistani security discourses. Additionally, Nizamani provides an overview of anti-nuclear dissent in South Asia.

Night Owl: A Nationbuilder's Manual: 2nd Edition Anna Mae Yu Lamentillo, 2023-06-19 Night Owl Second Edition offers a comprehensive look at the Build Build Build Program – President Rodrigo Duterte’s medium term development strategy to effectively usher in Philippines’ Golden Age of Infrastructure. It follows and provides a firsthand narrative of the daunting details of task, reforms, and projects undertaken by Department of Public Works and Highways Secretary Mark Villar. Night Owl sheds light into the difficult challenges, critiques, and difficult decisions faced by the Build Build Build team and dives into the consequences subsequently. Witness heartwarming stories of Filipinos whose lives have improved with the completion of roads, bridges, rail, flood control projects, airports, seaports and classrooms. There is no question that physical infrastructure impacts on the quality of human life. Every new road or bridge that connects a remote barangay to the town proper opens new opportunities for a hundreds to sell and buy goods and interact with other communities; every schoolroom built brings literacy and a chance to improve the lives of thousands of Filipino children; every health center put up or potable water source developed makes numerous lives healthier; and every seaport or airport constructed or improved connects communities around it to the rest of the world. Public investment in physical infrastructure is an imperative. “Night Owl” documents the making of the physical infrastructure projects that the Duterte administration completed in six years under its

Build, Build, Build program. But beyond this, it expounds on the vision of an administration determined to take bold steps to close the country's infrastructure gap and the key persons who pushed hard to realize this ambitious program. This book reveals the strong political will of President Rodrigo Duterte and his people to uplift the quality of our countrymen's lives. "Night Owl" is as much an undisputable record of what President Duterte and his team have achieved to upgrade our country's physical infrastructure as it is a well-documented tribute to the sacrifices of the men and women of this administration — both the early birds and the night owls — who toiled day and night to deliver on their commitments. For the next set of technocrats who want to know what must come with political will to accomplish such a tremendous undertaking; the doubters who won't believe unless presented with figures and photos; the armchair travelers who wish to experience our provinces vicariously; and the families and friends of the people who took part in constructing these school buildings, evacuation and health centers, roads, bridges, flood control projects seaports, and airports, this book is a good read. — HON. GLORIA MACAPAGAL-ARROYO 14th President of the Philippines Night Owl is a compelling visual and informative storytelling of Philippine's journey of change and transformation as it rally Philippines from a tiger cub economy to first world country. Anna Mae Lamentillo's book, "Night Owl," provides a bird's eye view of the government's Build, Build, Build program. It's her finishing touches, her additional contribution to her work as the project's chairperson while she was with the DPWH. Inside the pages of "Night Owl," one can read about and see the developments that have helped move the country forward, even during the most challenging years brought by the Covid-19 pandemic. — EMILIO YAP III President and Vice Chairman, Manila Bulletin Publishing Corporation

Environment and Pedagogy in Higher Education Lucie Viakinnou-Brinson, 2018-10-15 The commitment to participate in ecological protection has grown considerably and, in the academic world, it has been tackled primarily by the Social Sciences. The Humanities has followed suit and several books have dealt with the reasons why such commitment is essential and morally imperative. What has been crucially lacking, however, are books that propose concrete pedagogical approaches to the study of environmental issues and aim at inspiring and motivating both educators and students to become actively engaged in the pursuit of ecological preservation. It is here that this book comes into play. Faced with the polluting of the earth, the devastating effect of climate change, and the inequalities of North/South resources to counter the throes of environmental degradation, our responsibility as educators and in particular as eco-pedagogues is to engage in theoretical discourses on the subject matter but also to begin to provide practitioners in all fields with essential tools to shape an ecological sense of consciousness among future leaders of the earth: our students.

Airpower in Small Wars James S. Corum,Wray R. Johnson,2003 The use of airpower in wartime calls to mind the massive bombings of World War II, but airplanes have long been instrumental in small wars as well. Ever since its use by the French to put down rebellious Moroccan tribes in 1913, airpower has been employed to fight in limited but often lengthy small conflicts around the globe. This is the first comprehensive history of airpower in small wars-conflicts pitting states against non-state groups such as insurgents, bandits, factions, and terrorists-tracing it from the early years of the twentieth century to the present day. It examines dozens of conflicts with strikingly different scenarios: the Greek Civil War, the Philippine Anti-Huk campaign, French and British colonial wars, the war in South Vietnam before the American escalation, counterinsurgency in southern Africa, Latin American counterguerrilla operations, and counterinsurgency and counterterrorist campaigns in the Middle East over the last four decades. For each war, the authors describe the strategies employed on both sides of the conflict, the air forces engaged, and the specific airpower tactics employed. They discuss the ground campaigns and provide the political background necessary to understand the air campaigns, and in each case they judge the utility of airpower in its broadest sense. In their historic sweep, they show how forms of airpower evolved from planes to police helicopters, aircraft of the civilian air reserve, and today's unmanned aircraft. They also disclose how small wars after World War II required new strategies, operational solutions, and tactics. By taking this broad view of small-war airpower, the authors are able to make assessments about the most effective and least effective means of employing airpower. They offer specific conclusions ranging from the importance of comprehensive strategy to the need for the United States and its allies to expand small-wars training programs. *Airpower in Small Wars* will be invaluable for educating military professionals and policy makers in the subject as well as for providing a useful framework for developing more effective doctrine for employing airpower in the conflicts we are most likely to see in the twenty-first century.
