The Israeli Conflict System Harvey Starr, Stanley Dubinsky, 2015-07-30 The Middle East conflict system is perhaps the world's most important and intractable problem area, whose developments carry global consequences. An effective investigation of the context and change in the region calls for a melding of academic approaches, methods and findings with policy oriented needs. The Israeli Conflict System brings together leading conflict scholars primarily from political science, applying a range of advanced, rigorous analytic and data-gathering techniques to address this single empirical domain—the contemporary Israeli Conflict System. Recognising the causal complexity of this conflict system, the volume's central theme is that the system's current conditions are best understood in their broader temporal/historic, cultural/linguistic, and spatial/geographic contexts. Through the lens of economic, geographic, historical, linguistic, and political analyses, and the application of data analysis, experiments, simulations, and models of rational choice, this volume shows how diverse disciplinary perspectives and methodologies can complement each other effectively. In this way, its chapters provide a model for the integration of factors and contexts necessary for understanding contemporary world politics, and a sampling of theories, approaches, and methods that are applicable, useful, or valid under different conditions. This book offers a cutting-edge resource for scholars and students of Political Science, International Relations, Conflict Studies and Middle East Studies.

May to May - My Journey to Self-love with God Reabetswe Moabi, 2024-08-16 One of society's main problems today is a lack of self-love; this is evident in the way most people live their lives – sadly, I was also part of the statistic. The fact that I was not living life to the full bothered me in many ways. I was not running my own race; I constantly compared myself to others; I had not accepted myself for who I was, and I had not taken full responsibility for my life. I was merely alive and confused. Although everything on the outside looked good, I felt miserable. I learned the hard way that what goes on inside us is more important than what people can see. A lack of self-love impacted most areas of my life negatively - I knew

something needed to change. Once I had surrendered my life to God, He helped me see my own value. I started May to May - My Journey to Self-love with God to move my life in the right direction. After discovering the 20 components that lead to self-love, my life has never been the same. I could finally accept myself just as I was. I am proud to say there is no other race I would rather run than my own. I needed to love myself first, so I could truly live.

Ignorance Andrew Bennett,2013-07-19 Andrew Bennett argues in this fascinating book that ignorance is part of the narrative and poetic force of literature and is an important aspect of its thematic focus: ignorance is what literary texts are about. He sees that the dominant conception of literature since the Romantic period involves an often unacknowledged engagement with the experience of not knowing. From Wordsworth and Keats to George Eliot and Charles Dickens, from Henry James to Joseph Conrad, from Elizabeth Bowen to Philip Roth and Seamus Heaney, writers have been fascinated and

compelled by the question of ignorance, including their own. Bennett argues that there is a politics and ethics as well as a poetics of ignorance: literature's agnology, its acknowledgement of the limits of what we know both of ourselves and of others, engages with the possibility of democracy and the ethical, and allows us to begin to conceive of what it might mean to be human. This exciting approach to literary theory will be of interest to lecturers and students of literary theory and criticism.
