Name, Shame and Blame Christine Stewart, 2014-12-02 Papua New Guinea is one of the many former British Commonwealth colonies which maintain the criminalisation of the sexual activities of two groups, despite the fact that the sex takes place between consenting adults in private: sellers of sex and males who have sex with males. The English common law system was imposed on the colonies with little regard for the social regulation and belief systems of the colonised, and in most instances, was retained and developed post-Independence, regardless of the infringements of human rights involved. Now the HIV pandemic has thrown a spotlight, not altogether welcome, on the sexual activities of these two groups. In Papua New Guinea, a growing body of behavioural research has focused on such matters as individual sexual partnering, condom use and awareness of HIV. My work, however, has a different purpose. I chose the terms in the title to highlight a nexus which I believe exists between the criminal law and negative attitudes of society. At an international level, the argument has been put that decriminalising sex work and sodomy will facilitate HIV epidemic management, reducing the stigma and discrimination these groups encounter and making them easier to reach. I undertook my research therefore with the aim of gaining deeper understanding of the effects the current situation of criminalisation might have on the social lives of these criminalised people today, in the country generally and in Port Moresby the capital in particular, and whether these effects might provide evidence to support the argument for law reform. This is a rich and well-researched study of the legal, social and moral issues surrounding the criminalisation of two forms of consensual sex.... A very impressive piece of work, it is extensively documented, relies on a wide range of material and makes a clear and coherent argument about the place of law in producing identities and exclusions.... The attention to change over time and the complexity of the ways in which sexual behaviour is enacted and punished is a particular strength of the book. —Professor Sally Engle Merry, *Anthropology, Law and Society*, New York University This book is an exceptional contribution to our knowledge of the nexus between the criminal law and negative attitudes of society, and what effects criminalization has on the social lives of prostitutes and males who have sex with males, and whether these effects might provide evidence to support the argument for law reform.... The author's experience of Papua New Guinea allows her to comment in depth on such matters as the United Nations' human rights approach to the HIV epidemic and their call to decriminalize all sexual acts between consenting adults.... She shows that criminal laws—with the help of the normative discourse of religion and media—underpin and legitimize high levels of

stigma, discrimination and abuse of prostitutes and males who have sex with males.... The quality of the writing and general presentation are exceptional. —Laura Zimmer-Tamakoshi, Truman State University (retired)

Under the Gun David H. Capie, 2003 This study examines challenges presented by small arms and light weapons in the Pacific. It focuses primarily on the Solomon Islands, Fiji, Papua New Guinea and Vanuatu, although it also considers other members of the Pacific Islands Forum.

Uneven Connections Robert J. Foster, 2024-03-28 In the first years of the 21st century, economic liberalisation began to transform telecommunications services throughout the Pacific Islands. Government regulators, corporate executives and everyday consumers hopefully imagined that opening mobile phone markets to competition would result in greater access, lower costs and accelerated development. *Uneven Connections* examines the ways in which liberalisation took hold in Papua New Guinea (PNG) when a unit of the Caribbean-based mobile network operator Digicel Group Ltd. seized the opportunity to compete with the state-sponsored incumbent. The book highlights how mobile phones entered the lives of urban and rural Papua New Guineans after Digicel's arrival in 2007. In so doing, it describes a moral economy in which companies, consumers and state agents continually negotiate who owes what to whom. In what ways have these various actors invented and negotiated new forms of both freedom and constraint? *Uneven Connections* advances understanding of how a so-called digital revolution in PNG unfolded, resulting in outcomes that often confounded the expectations of policy makers and ordinary citizens alike. It assesses the extent to which some of the promises of this revolution have been redeemed and identifies the challenges faced by companies, consumers and state agents in establishing and experiencing novel forms of uneven connectivity. The book provides a short and selective history of mobile phones in PNG, ending with the sale of Digicel's Pacific operations to the Australian company Telstra in 2022.

Corruption, Global Security, and World Order Robert I. Rotberg, 2009-12-01 Never before have world order and global security been threatened by so many destabilizing factors—from the collapse of macroeconomic stability to nuclear proliferation, terrorism, and tyranny. *Corruption, Global Security, and World Order* reveals corruption to be at the very center of these threats and proposes remedies such as positive leadership, enhanced transparency, tougher punishments, and enforceable sanctions. Although eliminating corruption is difficult, this book's careful prescriptions can reduce and contain threats to global security.
