High Possibility STEM Classrooms Jane Hunter, 2020-12-21 This book offers a new, research-based approach to STEM education in early, elementary, and middle years of schooling, concentrating on building teacher agency and integrated approaches to teaching and learning in High Possibility STEM Classrooms. Author Jane Hunter presents a globally oriented, contemporary framework for powerful Integrated STEM, based on mixed-methods research data from three studies conducted in 14 schools in language-diverse, disadvantaged, and urbanized communities in Australia. Theory, creativity, life preparation, public learning, and contextual accommodations are all utilized to help educators create hands-on, inquiry-led, and project-based approaches to STEM education in the classroom. A set of highly accessible case studies is offered that places pedagogy at the center of practice – an approach valuable for researchers, school leaders, and teachers alike. Ultimately, this text responds to the call for examples of what successful Integrated STEM teaching and learning looks like in schools. The book concludes with an evidence-based blueprint for preparing for less siloed and more transdisciplinary approaches to education in schools. Hunter argues not only for High Possibility STEM Classrooms but for High Possibility STEM Schools, enriching the dialogue around the future directions of STEM, STEAM, middle leadership, technological literacies, and assessment within contemporary classrooms.

Big Data on Campus Karen L. Webber, Henry Y. Zheng, 2020-11-03 How data-informed decision making can make colleges and universities more effective institutions. The continuing importance of data analytics is not lost on higher education leaders, who face a multitude of challenges, including increasing operating costs, dwindling state support, limits to tuition increases, and increased competition from the for-profit sector. To navigate these challenges, savvy leaders must leverage data to make sound decisions. In *Big Data on Campus*, leading data analytics experts and higher ed leaders show the role that analytics can play in the better administration of colleges and universities. Aimed at senior administrative leaders, practitioners of institutional research, technology professionals, and graduate students in higher education, the book opens with a conceptual discussion of the roles that data analytics can play in higher education administration. Subsequent chapters address recent developments in technology, the rapid accumulation of data assets, organizational maturity in building analytical capabilities, and methodological advancements in developing predictive and prescriptive analytics. Each chapter includes a literature review of the research and application of analytics developments in their respective functional

areas, a discussion of industry trends, examples of the application of data analytics in their decision process, and other related issues that readers may wish to consider in their own organizational environment to find opportunities for building robust data analytics capabilities. Using a series of focused discussions and case studies, *Big Data on Campus* helps readers understand how analytics can support major organizational functions in higher education, including admission decisions, retention and enrollment management, student life and engagement, academic and career advising, student learning and assessment, and academic program planning. The final section of the book addresses major issues and human factors involved in using analytics to support decision making; the ethical, cultural, and managerial implications of its use; the role of university leaders in promoting analytics in decision making; and the need for a strong campus community to embrace the analytics revolution. A Critical Introduction to Learning and Teaching in Higher Education Phil Robinson-Self, 2023-11-20 This volume offers a concise, critically informed, and practically focused introduction to learning and teaching in higher education. It covers key issues such as how students learn, teaching practice and the vexed subject of excellence, contemporary approaches to assessment and feedback, the impacts of technologies, and curriculum design and leadership. It offers an honest, accessible introduction to the subject, whilst keeping a critical eye on the pressures faced by teachers and students in higher education today.

Irreversible Damage Abigail Shrier, 2020-06-30 NAMED A BOOK OF THE YEAR BY THE ECONOMIST AND ONE OF THE BEST BOOKS OF 2021 BY THE TIMES AND THE SUNDAY TIMES *Irreversible Damage* . . . has caused a storm. Abigail Shrier, a Wall Street Journal writer, does something simple yet devastating: she rigorously lays out the facts. —Janice Turner, *The Times of London* Until just a few years ago, gender dysphoria—severe discomfort in one’s biological sex—was vanishingly rare. It was typically found in less than .01 percent of the population, emerged in early childhood, and afflicted males almost exclusively. But today whole groups of female friends in colleges, high schools, and even middle schools across the country are coming out as “transgender.” These are girls who had never experienced any discomfort in their biological sex until they heard a coming-out story from a speaker at a school assembly or discovered the internet community of trans “influencers.” Unsuspecting parents are awakening to find their daughters in thrall to hip trans YouTube stars and “gender-affirming” educators and therapists who push life-changing interventions on young girls—including medically unnecessary double mastectomies and puberty blockers that can cause permanent infertility. Abigail Shrier, a writer for the Wall Street Journal, has dug deep into the trans epidemic, talking to the girls, their agonized parents, and the counselors and doctors who enable

gender transitions, as well as to “detransitioners”—young women who bitterly regret what they have done to themselves. Coming out as transgender immediately boosts these girls’ social status, Shrier finds, but once they take the first steps of transition, it is not easy to walk back. She offers urgently needed advice about how parents can protect their daughters. A generation of girls is at risk. Abigail Shrier’s essential book will help you understand what the trans craze is and how you can inoculate your child against it—or how to retrieve her from this dangerous path.

5 Kinds of Nonfiction Melissa Stewart, Marlene Correia, 2023-10-10 Once upon a time...children's nonfiction books were stodgy, concise, and not very kid friendly. Most were text heavy, with just a few scattered images decorating the content and meaning, rather than enhancing it. Over the last 20 years, children's nonfiction has evolved into a new breed of visually dynamic and engaging texts. In *5 Kinds of Nonfiction: Enriching Reading and Writing Instruction with Children's Books*, Melissa Stewart and Dr. Marlene Correia present a new way to sort nonfiction into five major categories and show how doing so can help teachers and librarians build stronger readers and writers. Along the way, they: Introduce the 5 kinds of nonfiction: Active, Browseable, Traditional, Expository Literature, and Narrative -; and explore each category through discussions, classroom examples, and insights from leading children's book authors. Offer tips for building strong, diverse classroom texts and library collections. Provide more than 20 activities to enhance literacy instruction. Include innovative strategies for sharing and celebrating nonfiction with students. With more than 150 exemplary nonfiction book recommendations and Stewart and Correia's extensive knowledge of literacy instruction, *5 Kinds of Nonfiction* will elevate your understanding of nonfiction in ways that speak specifically to the info-kids in your classrooms, but will inspire all readers and writers.

Introduction to Sociology George Ritzer, J. Michael Ryan, 2023-08-21 *Introduction to Sociology* offers a comprehensive guide that connects traditional sociological concepts and contemporary social phenomena, such as globalization, consumer culture, the internet, and McDonaldization, to students’ lives in today’s global society. This accessible text encourages learners to apply a sociological perspective and explore how public sociologists address critical modern issues.

Education and Social Factors María Luisa Zagalaz-Sánchez, Javier Cachón-Zagalaz, Daniil Shmatkov, María Angélica Castillo Cerda, Paula Queirós, 2023-12-22

Intergenerational Democracy, Environmental Justice and the Case of Nuclear Waste Lee Towers, Matthew Cotton, 2024-10-07 This book explores the interplay between intergenerational justice and intragenerational justice using nuclear waste management as a consistent case to explore these themes. Lee Towers and Matthew Cotton examine the issue of intergenerational justice from a social scientific perspective, drawing on central case studies of nuclear waste management in Canada, Finland, and the United Kingdom. They connect indigenous philosophies and notions of justice with the concept of intergenerational democracy, advocating for better inclusion of youth and elders in decision-making that

affects their well-being. As such, the book's primary objectives are fourfold: To assess whether trade-offs between intergenerational and intragenerational justice are necessary, and if so, what these trade-offs are and how they might be resolved. To critically assess dominant western liberal philosophical approaches that shape contemporary intergenerational justice thinking in policy and practice, and consider alternatives drawn from anthropology and indigenous philosophies. To assess how far our current capitalist system can achieve substantive forms of justice. To critically examine three nuclear waste management case studies and assess how far these achieve environmental and energy justice and how they exemplify tensions between inter- and intragenerational justice. This short, accessible volume will be of great interest to students and scholars of energy, environmental justice, and ethics.
