William S. Walsh

[The Encarta Book of Quotations](#) Bill Swainson,2000-09-30 Here are 25,000 quotations drawn from the history, politics, literature, religions, science, and popular culture of the world--ranging from the earliest Chinese sages through Shakespeare to the present day.

The Miracle of Christmas Christopher Alan Anderson,2012-09-18 What is it about Christmas that so touches our souls? In this article, the author discusses the deeper meaning of Christmas--perhaps today even lost to our religions. Author Bio: Christopher Alan Anderson (1950 -) received the basis of his education from the University of Science and Philosophy, Swannanoa, Waynesboro, Virginia. He resides in the transcendental/romantic tradition, that vein of spiritual creativity of the philosopher and poet. His quest has been to define and express an eternal romantic reality from which a man and a woman could together stand in their difference and create a living universe of procreative love. Mr. Anderson began these writings in 1971. The first writings were published in 1985. On a personal note, when Mr. Anderson was asked to describe the writings and what he felt their message was he responded, Spiritual procreation. Mankind has yet to distinguish the two sexes on the spiritual level. In this failure lies the root of our problems and why we cannot yet touch the eternal together. The message of man and woman balance brings each of us together in love with our eternal other half right now. Keywords: Man and Woman Balance, Relationships, Procreation, Spirituality, Love, Metaphysics, Eternal, Creation, Sexuality, & Soul.

Ancient Mysteries Peter James,Nick Thorpe,2007-12-18 What was the Minotaur? Did a Welsh prince discover America? Did Robin Hood really exist? How does the Star of Bethlehem fit into the science of astronomy? Is the Vinland Map a fake? Can archaeologists use spirit messages to guide their work? For centuries, philosophers, scientists, and charlatans have attempted to decipher the baffling mysteries of our past, from the Stonehenge to the lost continent of Atlantis. Today, however, DNA testing, radiocarbon dating, and other cutting-edge investigative tools, together with a healthy dose of common sense, are guiding us closer to the truth. Peter James and Nick Thorpe, the professional historian and archaeologist team who created the acclaimed Ancient Inventions, now tackle these age-old conundrums, presenting the latest information from the scientific community--and the most startling challenges to traditional explanations of mysteries such as: - The rise

and fall of the Maya - A lost cache of Dead Sea Scrolls - The curse of Tutankhamun - The devastation of Sodom and Gomorrah - The Nazca Lines These true mystery stories twist and turn like a good whodunit, as James and Thorpe present the evidence for and against the expert theories, shedding new light on humankind's age-old struggle to make sense of the past. The authors also make dramatic contributions of their own to the fray, demonstrating persuasively that catastrophic events--including the collisions of comets with the Earth long ago--could explain puzzles that have baffled experts for centuries. Ancient Mysteries will entertain and enlighten, delight the curious and inform the serious.

Goodman for Architects Remei Capdevila-Werning,2013-10-15 American philosopher Nelson Goodman (1906-1998) was one of the foremost analytical thinkers of the twentieth century, with groundbreaking contributions in the fields of logic, philosophy of science, epistemology, and aesthetics. This book is an introduction to the aspects of Goodman's philosophy which have been the most influential among architects and architectural theorists. Goodman specifically discussed architecture in his major work on aesthetics, *The Languages of Art: An Approach to a Theory of Symbols* (1968), and in two essays *How Buildings Mean* (1985), and *On Capturing Cities* (1991). His main philosophical notions in *Ways of Worldmaking* (1978) also apply well to architecture. Goodman's thought is particularly attractive because of its constructive aspect: there is not a given and immutable world, but both knowledge and reality are constantly built and rebuilt. Whereas other theories, such as deconstruction, implicitly entail an undoing of modern precepts, Goodman's conception of world-making offers a positive, constructive way to understand how a plural reality is made and remade. Goodman's approach to architecture is not only relevant thinking in providing new insights to understanding the built environment, but serves also as an illustration of analytical thinking in architecture. This book shows that the methods, concepts, and ways of arguing characteristic of analytical philosophy are helpful tools to examine buildings in a novel and fruitful way and they will certainly enhance the architect's critical skills when designing and thinking about architecture.
