From Tribe to Facebook The Transformational Role of Social Networks Prof. Jamal Sanad Al-Suwaidi, 2013-01-01 The recent proliferation of social networks has led to a societal shift – from a tribal mentality to that of Facebook – and has served to connect people from around the world with common cultural, religious, political and economic characteristics in an unprecedented manner and with astonishing speed. When such vast numbers of individuals congregate via social networks, societies that were once imaginary become real – the virtual worlds they inhabit expand and instill in their ‘citizens’ a shared desire to establish and enforce their common interests. This study charts the impact of this phenomenon in order to explore and analyze the potential outcomes of the accelerated development of social networks. Their economic potential in general is discussed, as are their implications for the future of traditional media forms, both as sources of news and key platforms for shaping public opinion. It also explores the use of social networks by terrorists and organized criminal gangs – a trend which has not only led to the development of new forms of criminal activity, but also to the ‘globalization’ of crime – and examines the potential for new forms of ‘virtual’ conflict to arise, with the Internet as the battlefield, social networks as the weapons, and states and citizens as the combatants. In the area of domestic security, the study proposes that defense and intelligence agencies will depend on social networks to wage, and defend against various forms of information warfare, as well as to monitor the movements and communications of individuals under surveillance. A major focus of the study is the growing ability of protestors and advocates of political change in countries with repressive regimes to create significant ‘virtual’ political pressure through social networks, obtaining and disseminating information without censorship in a new ‘information democracy.’ It is this role of social networks in the political and social make-up of nations that defines the importance of this study; particularly in view of the fact that social networks have recently become a vital variable in socio-economic mobility across the globe, and in the Arab world in particular.

The Marketing of Terrorism. Analysing the Use of Social Media by ISIS Lisa Wiechert, 2017-06-02 Social media has played a central role in the digital era for almost a century, influencing almost all aspects of life. The use of social media in warfare is threatening not only one country but the whole global community, is a recent development. The famous speech by Abu Muhammad al-Adnani on social media inspired the bloody month of Ramadan in 2016 and showed the deadly power of social media inspired attacks and what the Islamic State is capable of achieving. Although the terrorist group has lost territory over the last few weeks of combat both in Syria and Iraq, and is on the edge of losing their main capital Mosul, IS still remains a hybrid threat. Consisting of military powers and an unmatched affinity of using social media as a cyber-war weapon, IS will continue to be a severe danger to the global community. This book aims to foster a deeper understanding of the use of social media for recruiting efforts by the so-called Islamic State (IS), and to analyse its propaganda methods in order to develop possible countermeasures. A special focus will be put on the method of recruitment of young Western foreign fighters. These individuals are the easiest to recruit for ISIS and pose the greatest risk to the global community, especially in regards to home grown terrorism and so-called lone wolf attacks. Since this area of research is very new and quickly evolving, the field still needs extensive research. It is difficult to analyse the use of social media content by the Islamic State due to limited information access and flow (encryption, propaganda, verification and inconsistency). The Islamic State is a military threat on the battleground as well as a potential cyber threat for the international community. Despite these challenging circumstances, this book will provide a new theoretical model based on the marketing model of a customer journey in connection with the main principles of storytelling. Ultimately, this research work will try to provide experts with a new and modern approach of analysis as a base for possible counter measures to weaken and combat the current threat posed by the Islamic State. From the text: - Islamic State; - Terrorism; - Social Media; - Propaganda Institutions; - Radicalisation

Anglicisms and their Usage in the German Newspaper Die Zeit Madeleine Sailer, 2020-08-06 Bachelor Thesis from the year 2020 in the subject English Language and Literature Studies - Linguistics, grade: 1,0, University of Innsbruck, language: English, abstract: In order to analyse the frequency of anglicism usage in the German language, this paper analyses articles from the German newspaper Die Zeit. Media and the press, for instance, mimic the use and competence of

English words in the German language among German native speakers. Therefore, analysing newspaper articles is an efficient and effective way to demonstrate the spread of anglicisms. At the beginning of this thesis there is a general explanation of anglicisms. This not only includes a definition but also further information on the different forms of anglicisms, such as direct or indirect loan influences as well as hybrid anglicisms. Moreover, it illustrates the transmission processes with its parameters and the grammar of anglicism within the German language system. Consequently, this lexical productivity is summarized, and the types of integration of anglicisms into the German lexicon are further evaluated. This is then followed by a chapter that highlights diachronic aspects of integrating English borrowings into the German language and the motives of using these. Subsequently, it provides information on the impact it has on German and the reasons why some German linguists believe their language to be endangered. The analysis in this paper encompasses a broad sample of 60 articles in total from six different news categories that were published between October 2019 and February 2020 on the online platform of the German newspaper Die Zeit. Since Second World War, the use of anglicisms in the German language has drastically increased, and thus, English words are borrowed more frequently. Nowadays, in the year 2020, one can confidently argue that nearly every German native speaker uses anglicisms in their everyday life.

Instagram's impact on Generation Z. Does a professional Instagram account influence the decision-making process? Maria Priller, 2019-08-13 Master's Thesis from the year 2019 in the subject Communications - Public Relations, Advertising, Marketing, Social Media, grade: 2, University of applied sciences (Tourism & Leisure Management), language: English, abstract: The main objective of this master thesis is to investigate whether Instagram has an impact on Generation Z's decision-making behaviour when choosing an Austrian spa facility. According to the determined research questions, this thesis aims to examine as well to what extent a professional Instagram account has an impact on the decision-making process, what the motivations are to use Instagram regarding a wellness stay and how Generation Z perceives the Austrian spa industry. In addition, recommendations for an enhanced Instagram performance for Austrian spa's will be given. For the secondary research, relevant books, articles, journals, studies and websites have been used. Möglichkeiten der Nutzung von Social Media für unternehmerisches Innovationsmanagement Thomas Pätzold, 2011 Bachelorarbeit aus dem Jahr 2009 im Fachbereich Informatik - Wirtschaftsinformatik, Note: 1,0, Hochschule Schmalkalden, ehem. Fachhochschule Schmalkalden, Sprache: Deutsch, Abstract: Wenn ein Unternehmen keine Innovationen für seine Produkte und Dienstleistungen vorweist und durchsetzt, hat es langfristig gesehen keinen Erfolg. Dabei sind vor allem die Firmen erfolgreich, welche bahnbrechende, ungewöhnliche und neue Innovationen auf den Markt bringen. Bestehende Produkte zu verbessern, reicht allein nicht aus. Diese Ansicht vertreten laut Horváth & Partners 87 %

der Führungskräfte in Unternehmen. Dabei sei sogar nur die Hälfte der Unternehmen bereit, neue Innovationen zu fördern. Die kreativen Entwickler finden sich bisher meist nur in den Forschungsabteilungen. Es ist aber nötig, die Kreativität aller Mitarbeiter zu fördern und zu nutzen. Dieses Potenzial ist bereits vorhanden und für das gesamte Personal erlernbar, wird aber momentan zu oft verschwendet. Zusätzlich zu den Möglichkeiten, Innovationen innerhalb eines Unternehmens zu erzeugen, bietet das Internet viele Wege, Neuerungen für einen Konzern zu gewinnen. Dabei ist es nicht einmal zwingend notwendig, viel Aufwand mit der Gründung von Plattformen zu betreiben, sondern es bieten sich bestehende Infrastrukturen an, um das Innovationspotenzial der Internetuser zu nutzen. Rund 734 Millionen von den 1,1 Milliarden Internetnutzern weltweit nutzen soziale Netzwerke. Sie tauschen sich über ihre Erfahrungen und Gefühle aus, äußern ihre Ideen und Wünsche und beraten einander. Dabei werden soziale Inhalte im Internet generiert, sogenannte Social Media. Wie aus solchen Inhalten für ein Unternehmen relevante Daten gefiltert werden können, um Innovation zu erzeugen, und wie mit ähnlichen Methoden die eigenen Mitarbeiter zu kreativen Lösungsvorschlägen motiviert werden können, soll diese Arbeit zeigen

Neologisms in times of COVID-19 Vassilios Tsimplis, 2025-02-25 Seminar paper from the year 2021 in the subject English Language and Literature Studies - Linguistics, grade: 2,7, University of Duisburg-Essen (Anglistik), course: Areas & Approaches II, language: English, abstract: This term paper aims to investigate whether COVID-related neologisms follow common formation principles in order to achieve high productivity. First, the social media platform Twitter needs to be presented as the consulted platform in online communication. Next, the term neologism will be introduced and defined in order to have a clear understanding of this phenomenon. After that, word-formation processes will be described to gain an overview of the underlying linguistic concepts. For the actual research question, it is important to have a look at Bernd Kortmann's model of word-formation processes (2020). The next section will deal with the data and the method chosen for the following analysis. Afterwards, the results will be discussed and evaluated for the purpose of drawing a conclusion on the productivity when dealing with neologisms in times of COVID-19. Finally, the key findings of this paper will be briefly summarized by taking up the research question whether Kortmann's model applies to COVID-related neologisms.

Pragmatics of Text Messaging in a Mixed-Cultural Class of Students Tetiana Katsis, 2023-12-13 Seminar paper from the year 2020 in the subject Didactics for the subject English - Pedagogy, Literature Studies, University of Bremen, language: English, abstract: This term paper advances research on the pragmatic context of online communication performed by a group of students in a mixed-cultural class. It intended to analyze texting on WhatsApp in terms of linguistic and paralinguistic characteristics, the identity of interlocutors, and uses of abbreviations, emojis, and other non-standard forms.

The data for the research were collected from a questionnaire. Results showed features of online texting which are deviant of the formal language. This supports previous claims that text messaging uses language varieties with unique linguistic features and syntactic conventions. These features are equally in use among students with different cultural background. It was also found that emojis were used to complement words and impose additional meaning. Additionally, the way interlocutors used text messages reveals information about their identities. It also gives clues about their cultural backgrounds.
