Purcell, Janet Haddock-Fraser, 2023-01-12 This Handbook illustrates that universities per se and higher education in general are essential to catalyze and action the transformative change needed for sustainability and delivery of the Sustainable Development Goals. Part One shows how sustainability can be adopted as a driver of change within higher education institutions (HEIs), as they react and respond to influencing factors outside the academy. Part Two examines how a university working with and for sustainability can influence, effect and amplify change beyond the institution, working with and through others. International contributors explore regional, national and international perspectives, presenting a variety of critically assessed accounts case studies that reflect different local and national contexts, institutional archetypes and academic missions. Frameworks of sustainability-led transformation are illustrated at the level of the institution (executive/administrative), organization, culture, place-based (anchor) and student in various countries including Aruba, Belgium, Brazil, Canada, Hong Kong, Japan, Lebanon, Nepal, New Zealand, Nigeria, South Africa, Spain, Uganda, United Kingdom and the United States of America. The book concludes with a manifesto for change and a call to action. It identifies that the sustainability journey of a HEI is influenced by context and place, with mission, leadership and strategy playing a vital role and change agency by students a key ingredient. Recognizing the patience and resolve to effect change, communication, dialogue and inclusion were central to community building and partnership.

The Last Oil Shock David Strahan, 2011-08-04 This may be the most important book you or anyone else will read in the next fifty years. Assuming humanity survives that long. Draining the lifeblood of industrial civilization, the terminal decline of oil and gas production will spark a crisis far more dangerous than international terrorism, and more urgent than climate change. World leaders know it, so why aren't they telling? The last oil shock is the secret behind the crises in Iraq and Iran, the reason your gas bill is going through the roof, the basis of a secret deal cooked up in Texas between George Bush and Tony Blair, the cause of an imminent and unprecedented economic collapse, and the reason you may soon be kissing your car keys and boarding pass goodbye. David Strahan explains how we reached this critical state, how the silence of governments, oil companies and environmentalists conspires to keep the public in the dark, what it means for energy policy, and what you can do to protect yourself and your family from the ravages of the last oil shock.

Threshold Concepts Within the Disciplines Ray Land, Jan Meyer, Jan Smith, 2008 Threshold Concepts within the Disciplines brings together leading writers from various disciplines and national contexts in an important and readable volume for all those concerned with teaching and learning in higher education. The foundational principle of threshold concepts is that there are, in each discipline, 'conceptual gateways' or 'portals' that must be negotiated to arrive at important new understandings. In crossing the portal, transformation occurs, both in knowledge and subjectivity. Such transformation involves troublesome knowledge, a key concern for contributors to this book, who identify threshold concepts in their own fields and suggest how to deal with them. Part One extends and enhances the threshold concept framework, containing chapters that articulate its qualities, its links to other social theories of learning and other traditions in educational research. Part Two encompasses the disciplinary heart of the book with contributions from a diversity of areas including computing, engineering, biology, design, modern languages, education and economics. In the many empirical case studies educators show how they have used the threshold concept framework to inform and evaluate their teaching contexts. Other chapters emphasise the equally important 'being and becoming' dimension of learning. Part Three suggests pedagogic directions for those at the centre of the education project with contributions focusing on the socialisation of academics and their continuing quest to be effective teachers. The book will be of interest to disciplinary teachers, educational researchers and educational

developers. It also is of relevance to issues in quality assurance and professional accreditation.

The Geography of the Canadian North Robert M. Bone, 2003 This text looks at the dual relationship of the Canadian north as both resource frontier and homeland of many Aboriginal groups. Since the last edition of this text, many changes have occurred, raising the possibility that both the frontier and homeland concepts can become a northern reality. These concepts are coherently presented throughout the book and brought to the fore in the concluding chapter.
