Technological Forecasting for Decision Making Joseph Paul Martino,1983

Forecasting Next Generation Manufacturing Frank T. Piller,Verena Nitsch,Dirk Lüttgens,Alexander

Mertens,Sebastian Pütz,Marc Van Dyck,2022-08-25 Manufacturing companies have just begun to implement the concepts of the Fourth Industrial Revolution (Industry 4.0) on a larger scale. Still, this area is characterized by a rapid pace of technological change, blurring boundaries between physical, digital, and biological systems, and a quickly changing growing political, economic, and social environment -- leading to high uncertainty in decision making and many questions about the future development in this field. To provide guidance and inspiration for managers and academics on the future of digital manufacturing systems, this book presents the results of an extensive Delphi study on next-generation manufacturing systems, with a projection period of up to 2030. We analyzed almost 2000 quantitative estimations and more than 600 qualitative arguments from a large panel of industrial and academic experts from Europe, North America, and Asia. The book describes each of the 24 projections in detail, offering current case study examples and related research, as well as implications for policymakers, firms, and individuals. The empirical results also allowed us to build scenarios for the most probable future along the dimensions of governance, organization, capabilities, and interfaces from both a company-internal and an external (network) perspective.

Handbook of Research Methods and Applications for Mobilities Monika Büscher,Malene Freudendal-Pedersen,Sven

Kesselring,Nikolaj Grauslund Kristensen,2020-08-28 Reflecting the variety and diversity of mobile methods and their applications, this comprehensive Handbook illuminates the multiple dimensions and transdisciplinary nature of mobilities research, from transport to tourism, cargo to information as well as physical, virtual and imaginative mobilities. It brings together key contributions on the state of the art of qualitative and quantitative research, multimethod combinations and co-creation methods within the mobilities paradigm.

Hierarchical Decision Modeling Tugrul U. Daim,2015-07-25 This volume, developed in honor of Dr. Dundar F. Kocaoglu,

aims to demonstrate the applications of the Hierarchical Decision Model (HDM) in different sectors and its capacity in decision analysis. It is comprised of essays from noted scholars, academics and researchers of engineering and technology management around the world. This book is organized into five parts: Technology Policy Planning, Strategic Technology Planning, Technology Assessment, Application Extensions, and Methodology Extensions. Dr. Dundar F. Kocaoglu is one of the pioneers of multiple decision models using hierarchies, and creator of the HDM in decision analysis. HDM is a mission-oriented method for evaluation and/or selection among alternatives. A wide range of alternatives can be considered, including but not limited to, different technologies, projects, markets, jobs, products, cities to live in, houses to buy, apartments to rent, and schools to attend. Dr. Kocaoglu's approach has been adopted for decision problems in many industrial sectors, including electronics research and development, education, government planning, agriculture, energy, technology transfer, semiconductor manufacturing, and has influenced policy locally, nationally, and internationally. Moreover, his students developed advanced tools and software applications to further improve and enhance the robustness of the HDM approach. Dr. Kocaoglu has made many contributions to the field of Engineering and Technology Management. During his tenure at Portland State University, he founded the Engineering and Technology Management program, where he served as Program Director and later, Department Chair. He also started the Portland International Conference on Management of Engineering and Technology (PICMET), which organizes an annual conference in international locations such as Korea, Turkey, South Africa, Thailand, and Japan. His teaching has won awards and resulted in a strong sense of student loyalty among his students even decades later. Through his academic work and research, Dr. Kocaoglu has strongly supported researchers of engineering management and has provided tremendous service to the field. This volume recognizes and celebrates Dr. Kocaoglu's profound contributions to the field, and will serve as a resource for generations of researchers, practitioners and students.

Accounting and Auditing Small and Medium-Sized Practices Anatoli Bourmistrov, Levi Gårseth-Nesbakk, Toomas Haldma, Jan Mouritsen, Roman Vakulchuk, 2025-08-04 This book addresses the recent trends, developments, and future of accounting and auditing of small and medium-sized practices (AASMPs) in the public and private sectors. The book has three main objectives: firstly, to provide an analysis of how different societal trends, including digitalization, impact AASMPs and what role education and training play in proactive adaptation to those trends; secondly, to outline major scenarios for global AASMP development by 2035; and thirdly, to offer a conceptual framework for better understanding of AASMPs' dynamic and transformative capabilities that are necessary to create sustained competitive advantage in a rapidly changing society.

Beyond presenting a conceptual framework, this book also offers a discussion of future scenarios for AASMPs' development and their role in the global economic development. This book is unique, as it disseminates the findings of a large research project carried out by both academics and practitioners from the accounting and auditing industry. Readers of this book will be better equipped to understand the development trends in the accounting and auditing industry, the impact those trends create for AASMPs, and the way different actors can work proactively to maximize AASMPs' chances for success amidst rapid technological and regulatory change. This book is aimed primarily at accounting and auditing academics; however, it will also be of benefit to managers of accounting and auditing firms, leaders of professional associations, and professional bodies that regulate accounting and auditing practices, setting the foundations for future research endeavors on this topic.

Emerging Technologies for Diagnosing Alzheimer's Disease Marianne Boenink, Harro van Lente, Ellen Moors, 2016-09-13

This book explores international biomedical research and development on the early diagnosis of Alzheimer's disease. It offers timely, multidisciplinary reflections on the social and ethical issues raised by promises of early diagnostics and asks under which conditions emerging diagnostic technologies can be considered a responsible innovation. The initial chapters in this edited volume provide an overview and a critical discussion of recent developments in biomedical research on Alzheimer's disease. Subsequent contributions explore the values at stake in current practices of dealing with Alzheimer's disease and dementia, both within and outside the biomedical domain. Novel diagnostic technologies for Alzheimer's disease emerge in a complex and shifting field, full of controversies. Innovating with care requires a precise mapping of how concepts, values and responsibilities are filled in through the confrontation of practices. In doing so, the volume offers a practice-based approach of responsible innovation that is also applicable to other fields of innovation.

Handbook of Sustainable Innovation Frank Boons, Andrew McMeekin, 2019

The Handbook of Sustainable Innovation maps the multiple lineages of research and understanding that constitute academic work on how technological change relates to sustainable practices of production and consumption. Leading academics contribute by mapping the general evolution of this academic field, our understanding of sustainable innovation at the firm, user, and systems level, the governance of sustainable innovation, and the methodological approaches used. The Handbook explores the distinctiveness of sustainable innovation and concludes with suggestions for generating future research avenues that exploit the current diversity of work while seeking increased systemic insight.
