Michael Cook

The Hidden History of the Human Race Michael A. Cremo, Richard L. Thompson, 1999 Over the centuries, researchers have found bones and artefacts proving that modern humans have existed for millions of years. Mainstream science, however has suppressed these facts. Prejudices based on current scientific theory act as a 'knowledge filter', giving us a picture of prehistory that is largely inaccurate. This book reveals this hidden history.

Forbidden Archeology Michael A. Cremo, Richard L. Thompson, 1993

Hidden History of the Human Race Michael Cremo, 2014-10-07 But according to other scientists, such as physical anthropologist R. H. Tuttle of the University of Chicago, fossil foot bones of the known australopithecines of 3.6 million years ago show they had feet that were distinctly apelike. Hence they were incompatible with the Laetoli prints. In an article in the March 1990 issue of *Natural History*, Tuttle confessed that we are left with somewhat of a mystery. It seems permissible, therefore, to consider a possibility neither Tuttle nor Leakey mentioned—that creatures with an anatomically modern human bodies to match their anatomically modern human feet existed some 3.6 million years ago in East Africa. Perhaps, as suggested in the illustration on the opposite page, they coexisted with more apelike creatures. As intriguing as this archeological possibility may be, current ideas about human evolution forbid it.

Forbidden Archeology's Impact Michael A. Cremo, 1998 Examines the impact of the author's controversial 1993 book *Forbidden Archaeology* on the scientific community.

Hidden History of the Human Race, 2020

The Cosmic War Joseph P. Farrell, 2020-12-05 There is ample evidence across our solar system of cataclysmic and catastrophic destruction events. The asteroid belt, for example, may be the remains of an exploded planet! The known planets are scarred from incredible impacts, and teeter in their orbits due to causes heretofore inadequately explained. Rejecting the naturalist and materialist assumptions of catastrophism forwarded by other researchers, Farrell asserts that it is time to take the ancient myths of a Cosmic War in the heavens seriously. Incorporating extraterrestrial artifacts, cutting-edge ideas in contemporary physics, and the texts of ancient myths into his argument, Farrell maintains that an ancient interplanetary war was fought in our own solar system with weapons of extraordinary power and sophistication. In doing so,

he offers a solution to an enigma that has long mystified researchers, disclosing a cause of that ancient war, the means by which it was waged, and the real nature of the secret technology behind the ancient "Tablets of Destinies." It is all here, folks! The history of the Exploded Planet hypothesis, and what mechanism can actually explode a planet. The role of plasma cosmology, plasma physics (even plasma paleophysics) and scalar physics. The ancient texts telling of such destructions: from Sumeria (Tiamat's destruction by Marduk), Egypt (Edfu and the Mars connections), Greece (Saturn's role in the War of the Titans) and the ancient Americas.

The Forbidden Archeologist Michael A. Cremo, 2010 Michael Cremo, an international authority on human antiquity,

has justly earned the 'forbidden archeologist' title. For over twenty-seven years he's been 'digging up' documented, credible findings that mainstream archeologists don't want you to know about - discoveries in the fossil record that tell a completely different story from Darwinian evolution. His latest book, *The Forbidden Archeologist* (Torchlight Publishing A2010), presents his research at international scientific conferences, comments on the latest discoveries and 'missing links', examines famous archeological sites such as the Sterkfontein Caves - the alleged Cradle of Humanity, and responds to mixed reactions to his books, now translated into 26 languages. This collection of forty-nine articles published in *Atlantis Rising* magazine is like the Cliff Notes on his best selling, encyclopedic *Forbidden Archeology* and formidable *Human Devolution*. Readers will quickly understand the strongest arguments and remarkable discoveries that reveal evolution as a failing theory.

Our Occulted History Jim Marrs, 2013-02-12 The author of *Alien Agenda* illustrates how human civilization may have originated with non-humans who visited earth eons ago . . . and may still be here. For years we've been taught that human progress has been a long, slow climb from the primordial ooze to hunter-gatherers to empires. But what if that's only part of the story? Bestselling author and legendary conspiracy researcher Jim Marrs, who has investigated the recent financial crisis, the JFK assassination, and the national socialist takeover of America, now takes on his biggest subject: the history of mankind. *Our Occulted History* overturns conventional knowledge and beliefs, presenting compelling evidence that the earth once hosted prehistoric civilizations using technologies that very well may have surpassed our own. Sound unbelievable? Just a few hundred years ago, so was the concept that the earth revolved around the sun. Marrs sifts through the historical, scientific, and cultural record, showing how numerous ancient texts and tablets tell of visitors from the stars colonizing the earth. From the flying vimanas of the Hindu Vedic literature and the flying shields reported by the Romans to the mysterious airships of the 1800s and the UFOs of today, he argues that someone other than us is still present on this planet. But are these visitors simply observers—or do they play a much more active and controlling role? Jim Marrs raises this shocking question and more in the provocative and persuasive *Our Occulted History*. The truth is out there . . . and in here.

A Brief History of the Human Race Michael Cook,2003 Why has human history been crowded into the last few thousand years? Why has it happened at all? Could it have happened in a radically different way? What should we make of the disproportionate role of the West in shaping the world we currently live in? This witty, intelligent hopscotch through human history addresses these questions and more. Michael Cook sifts the human career on earth for the most telling nuggets and then uses them to elucidate the whole. From the calendars of Mesoamerica and the temple courtesans of medieval India to the intricacies of marriage among an aboriginal Australian tribe, Cook explains the sometimes eccentric variety in human cultural expression. He guides us from the prehistoric origins of human history across the globe through the increasing unification of the world, first by Muslims and then by European Christians in the modern period, illuminating the contingencies that have governed broad historical change.
