Self and Space in the Theater of Susan Glaspell Noelia Hernando-Real, 2011-10-10 Founding member of the Provincetown Players, Pulitzer Prize-winning playwright, best-selling novelist and short story writer Susan Glaspell (1876-1948) was a great contributor to American literature. An exploration of eleven plays written between the years 1915 and 1943, this critical study focuses on one of Glaspell's central themes, the interplay between place and identity. This study examines the means Glaspell employs to engage her characters in proxemical and verbal dialectics with the forces of place that turn them into victims of location. Of particular interest are her characters' attempts to escape the influence of territoriality and shape identities of their own.

Being Reasonable Krista Lawlor,2026-03-17 Krista Lawlor offers the first comprehensive study of reasonableness. Being reasonable is critical to law, politics, and daily life. But what exactly is reasonableness? Distinguishing it from rationality and thoughtfulness, Lawlor shows that reasonable people seek to know what is valuable and do so by attending to their emotions and to each other.

Marking Whiteness Sonita Sarker,Jennifer Nesbit,2025-09-01 The collection is divided into three parts to address the practices of Whiteness in modernist studies: Aesthetics, Intersectionality, and Inter/disciplinary Practice. We begin with aesthetics because modernism is the aesthetic produced in dynamic relation to the cultural formations of modernity: perceived rapid changes in labor, transportation, technology, and perceptions of body, mind, and even character. Essays in this section examine how the production of Whiteness is baked in as a positive value in assessing the value of cultural production. The second section focuses on the embodiment of Whiteness, primarily through the gendered and racialized female body, as a deflective practice that unmarks Whiteness while making it central to cultural crises around morality, national borders, and futurity. The third section considers the tacit prioritization of Whiteness as a positive value through institutional structures and pedagogical practice; these case studies ruminate on the generative potential of isolating and marking these effects. In each essay, scholars examine the stakes of marking Whiteness as a category of analysis distinct from, yet wholly imbricated with, racial categorization, given the potential for reification inherent in all strategies of marking.

The Oxford Handbook of Greek Drama in the Americas Kathryn Bosher,Fiona Macintosh,Justine McConnell,Patrice Rankine,2015-11-05 The Oxford Handbook of Greek Drama in the Americas is the first edited collection to discuss the performance of Greek drama across the continents and archipelagos of the Americas from the beginning of the nineteenth century to the present. The study and interpretation of the classics have never been restricted by geographical or linguistic boundaries but, in the case of the Americas, long colonial histories have often imposed such boundaries arbitrarily. This volume tracks networks across continents and oceans and uncovers the ways in which the shared histories and practices in the performance arts in the Americas have routinely defied national boundaries. With contributions from classicists, Latin American specialists, theatre and performance theorists, and historians, the Handbook also includes interviews with key writers, including Nobel Laureate Derek Walcott, Charles Mee, and Anne Carson, and leading theatre directors such as Peter Sellars, Carey Perloff, Héctor Daniel-Levy, and Heron Coelho. This richly illustrated volume seeks to define the complex contours of the reception of Greek drama in the Americas, and to articulate how these different engagements - at local, national, or trans-continental levels, as well as across borders - have been distinct both from each other, and from those of Europe and Asia.
