*New Perspectives on Geography of Media* SHAO Peiren, 2023-12-02 Based on the ancient Chinese concept of the unity of Heaven and Man (天人合一, 'tian ren he yi'), guided by principles governing the connections and interdependencies between Heaven, Earth, Man, and the media, and in accord with the coexistence of these four elements in balance and in harmony, this monograph outlines the scope of the study, fundamental concepts and theories, and future directions of research in the interdisciplinary field of the geography of media. The author delves deeply into the themes of time, space, place, landscape, and scale to introduce readers to a wide array of intriguing concepts that add new dimensions to this relatively new academic field. In addition, this monograph presents a history of media geography as it has evolved in the West and in China over the past several decades, and introduces principles and values from traditional Chinese culture that shed light on the nature, direction, and significance of media studies and communication research now being conducted around the globe. Intended readership: professional scholars, graduates, and general readers.

*Urban Transformational Landscapes in the City-Hinterlands of Asia* Debnath Mookherjee, George M. Pomeroy, Le Thi Thu Huong, 2023-05-16 In the context of mounting challenges stemming from a rapid transformation of the urban-regional landscapes in many Asian countries, this book highlights a multifaceted array of issues that increasingly engage the academic and planning communities in search of viable solutions to complex problems facing us. Even though cities continue to dominate development studies, urbanization of Asia is evolving toward a hybrid urban-rural nexus beyond the cities. This volume considers these shifting dynamics of Asian urbanization, including urban spatial transformations and their ramifications in the context of sustainability and planning. Through the lens of a set of empirical studies across diverse disciplines, geographies and methodologies. yet with an overarching concern for sustainability in varied (but interconnected) areas such as climate change, land use planning, infrastructure and urban mobility, and quality of life, these studies examine a range of important topics (e.g., flooding, transportation, housing, open space/ green space, urban garden and such) in city/regional settings. Together, they add insights into varied transformational processes or patterns at work on the urban-regional landscapes in a number of Asian countries while offering innovative approaches or alternatives. The proposed volume fills a gap in urban/regional studies in context of South and Southeast Asia that will be of interest to all stakeholders

(e.g., planners, administrators, academicians and the citizenry), particularly those interested in sustainability and planning paradigms. It should be a timely and valuable addition to the Asian urbanization literature.

Time-Space Compression Barney Warf, 2008-03-03 This volume explores the multiple ways in which people experience time-space compression in varying historical and geographical circumstances. Including economic, cultural, social, political and psychological dimensions of time-space compression.

*On Geopolitics* Harvey Starr, 2015-11-17 *On Geopolitics* shows how the 'new geopolitics' combines the fields of geography and international relations to create a comprehensive overview of current political developments. Using recent developments in geographical technology as well as traditional theories and methods, Harvey Starr explores themes of spatiality and territoriality as they connect to international affairs. He also examines geopolitical dynamics beyond borders in a world now buffeted by non state actors and subject to intergovernmental institutions and norms. *On Geopolitics* is a brilliant synthesis of Starr's ongoing work on conflict and co-operation, alliances, opportunity, and willingness, within a geographic framework. At the same time, Starr points the way toward new tools and techniques for the study of globalisation and world politics.

*Visualizing Human Geography* Alyson L. Greiner, 2017-01-30 Newly revised, *Visualizing Human Geography: At Home in a Diverse World*, Third Edition maximizes the use of photographs, maps and illustrations to bring the colorful diversity of Human cultures, political systems, food production, and migration into the undergraduate classroom. This text provides readers with a thrilling approach to the subject, allowing them to see Human Geography as a dynamic and growing science and helping them move beyond the idea that geography is about memorization. Unique presentation of visuals facilitates reflection on the textual content of this text, providing a clear path to the understanding of key concepts. In its Third Edition, *Visualizing Human Geography: At Home in a Diverse World* includes improved coverage of migration and industry and new animations to support each chapter.

Dynamic Trip Modelling Robert G.V. Baker, 2006-08-05 The thesis of this book is that there are one set of equations that can define any trip between an origin and destination. The idea originally came from work that I did when applying the hydrodynamic analogy to study congested traffic flows in 1981. However, I was disappointed to find out that much of the mathematical work had already been done decades earlier. When I looked for a new application, I realised that shopping centre demand could be like a longitudinal wave, governed by centre opening and closing times. Further, a solution to the differential equation was the gravity model and this suggested that time was somehow part of distance decay. This was published in 1985 and represented a different approach to spatial interaction modelling. The next step was to translate the abstract theory into something that could be tested empirically. To this end, I am grateful to my Ph. D supervisor, Professor

Barry Garner who taught me that it is not sufficient just to have a theoretical model. This book is an outcome of this on-going quest to look at how the evolution of the model performs against real world data. This is a far more difficult process than numerical simulations, but the results have been more valuable to policy formulation, and closer to what I think is spatial science. The testing and application of the model required the compilation of shopping centre surveys and an Internet data set.

*The Dictionary of Human Geography* Derek Gregory, Ron Johnston, Geraldine Pratt, Michael Watts, Sarah Whatmore, 2011-09-23 THE DICTIONARY OF HUMAN GEOGRAPHY 'Even better than before, the Dictionary is an essential tool for all human geographers and over the years has provided an invaluable guide to the changing boundaries and content of the discipline. No-one can afford to be without this fifth edition.' Linda McDowell, University of Oxford 'From explanations of core concepts and central debates to lucid discussions of the theories driving contemporary research, this is the best conceptual map to the creative and critical thinking that characterises contemporary human geography. The fifth edition belongs on the bookshelf of all serious students.' Gerard Toal, Virginia Tech 'With an exceptional balance between breadth and depth, this is undoubtedly a timely and ground-breaking revision of the Dictionary. An outstanding accomplishment of the editors and contributors, and a comprehensive and essential reference for any student or scholar interested in human geography.' Mei-Po Kwan, Ohio State University 'I can't imagine life without it. Definitive, detailed yet accessible: there's still no single-volume reference work in the field to rival it.' Noel Castree, University of Manchester The Dictionary of Human Geography represents the definitive guide to issues and ideas, methods and theories in human geography. Now in its fifth edition, this ground-breaking text has been comprehensively revised to reflect the changing nature and practice of human geography and its rapidly developing connections with other fields. The major entries not only describe the development of concepts, contributions and debates in human geography, but also advance them. Shorter, definitional entries allow quick reference and coverage of the wider subject area. Changes to the fifth edition include entries from many new contributors at the forefront of developments in the field, and over 300 key terms appearing for the first time. It features a new consolidated bibliography along with a detailed index and systematic cross-referencing of headwords. The Dictionary of Human Geography continues to be the one guidebook no student, instructor or researcher in the field can afford to be without.

**Handbook of Research Methods and Applications in Spatially Integrated Social Science** Robert Stimson, 2014-07-31 The chapters in this book provide coverage of the theoretical underpinnings and methodologies that typify research using a Spatially Integrated Social Science (SISS) approach. **Urban Energy Transition** Peter Droege, 2011-09-06 This compendium of 29 chapters from 18 countries contains both fundamental and advanced insight into the inevitable shift from cities dominated by the fossil-fuel systems of the industrial

age to a renewable-energy based urban development framework. The cross-disciplinary handbook covers a range of diverse yet relevant topics, including: carbon emissions policy and practice; the role of embodied energy; urban thermal performance planning; building efficiency services; energy poverty alleviation efforts; renewable community support networks; aspects of household level bio-fuel markets; urban renewable energy legislation, programs and incentives; innovations in individual transport systems; global urban mobility trends; implications of intelligent energy networks and distributed energy supply and storage; and the case for new regional monetary systems and lifestyles. Presented are practical and principled aspects of technology, economics, design, culture and society, presenting perspectives that are both local and international in scope and relevance.
