**The New Paris** Lindsey Tramuta,2017-04-18 “[Tramuta] draws back the curtain on the city’s hipper, more happening side—as obsessed with coffee, creativity, and brunch as Brooklyn or Berlin.” —My Little Paris The city long-adored for its medieval beauty, old-timey brasseries, and corner cafés has even more to offer today. In the last few years, a flood of new ideas and creative locals has infused a once-static, traditional city with a new open-minded sensibility and energy. Journalist Lindsey Tramuta offers detailed insight into the rapidly evolving worlds of food, wine, pastry, coffee, beer, fashion, and design in the delightful city of Paris. Tramuta puts the spotlight on the new trends and people that are making France’s capital a more whimsical, creative, vibrant, and curious place to explore than its classical reputation might suggest. With hundreds of striking photographs that capture this fresh, animated spirit—and a curated directory of Tramuta’s favorite places to eat, drink, stay, and shop—The New Paris shows us the storied City of Light as never before. “The author’s vibrant and precise command of English frames this lively collection of insights about cultural change and stories regarding multiple chefs and merchants.” —Forbes “As the culinary scene in Paris evolves, a new palate of flavors and styles of eating have emerged, redefining what is ‘French cuisine.’ The New Paris documents these changes through the lens of bakers, coffee roasters, ice cream makers, chefs, and even food truck owners. A thoughtful, and delicious, look at how Paris continues to delight and excite the palates of visitors and locals.” —David Lebovitz, author of My Paris Kitchen

**Murderland** Caroline Fraser,2025-06-10 A National Bestseller • A finalist for the 2026 Andrew Carnegie Medal for Excellence in Nonfiction “Scorching, seductive . . . A superb and disturbing vivisection of our darkest urges.” —Los Angeles Times “This is about as highbrow as true crime gets.” —Vulture “Fraser has outdone herself, and just about everyone else in the true-crime genre, with *Murderland*.” —Esquire From the Pulitzer Prize-winning author of *Prairie Fires* comes a terrifying true-crime history of serial killers in the Pacific Northwest and beyond—a gripping investigation of how a new strain of psychopath emerged out of a toxic landscape of deadly industrial violence Caroline Fraser grew up in the shadow of Ted Bundy, the most notorious serial murderer of women in American history, surrounded by his hunting grounds and mountain body dumps, in the brooding landscape of the Pacific Northwest. But in the 1970s and ’80s, Bundy was just one perpetrator amid an uncanny explosion of serial rape and murder across the region. Why so many? Why so weirdly and nightmarishly gruesome? Why the senseless rise and then sudden fall of an epidemic of serial killing? As *Murderland* indelibly maps the lives and careers of Bundy and his infamous peers in mayhem—the Green River Killer, the I-5 Killer, the Night Stalker, the Hillside Strangler, even Charles Manson—Fraser’s Northwestern death trip begins to uncover a deeper mystery and an overlapping pattern of environmental destruction. At ground zero in Ted Bundy’s Tacoma stood one of the most poisonous lead, copper, and arsenic smelters in the world, but it was hardly unique in the West. As Fraser’s investigation inexorably proceeds, evidence mounts that the plumes of these smelters not only sickened and blighted millions of lives but also warped young minds, including some who grew up to become serial killers. A propulsive nonfiction thriller, *Murderland* transcends true-crime voyeurism and noir mythology, taking readers on a profound quest into the dark heart of the real American berserk.

**School Funding** Mary Atkinson,2005 The methods of funding schools have been an issue of debate in England since the introduction of local management of schools in the early 1990s. Since then, delegation of funding to schools has increased. More recently, changes to the system of school funding have fuelled the debate in England about how schools should be financed. This report interrogates the literature for alternative models of educational funding from other countries, as well as examining the literature for their strengths and weaknesses. The report provides a review of existing models of school funding in European and OECD countries and the advantages and disadvantages of each model. The report covers: financial source and flow; division of responsibilities; allocation of funding to schools. The report also includes nine country illustrations which provide examples of the models identified throughout the report. Recommendations arising from the research suggest that there may be much to be learned from examination of other countries' funding models. [Back cover].

**Feasibility of Visualization and Simulation Applications to Improve Work Zone Safety and Mobility** Manop Kaewmoracharoen,Kelly C. Strong,2008 Visualization is a relatively recent tool available to engineers for enhancing transportation project design through improved communication, decision making, and stakeholder feedback. Current visualization techniques include image composites, video composites, 2D drawings, drive-through or fly-through animations, 3D rendering models, virtual reality, and 4D CAD. These methods are used mainly to communicate within the design and construction team and between the team and external stakeholders. Use of visualization improves understanding of design intent and project concepts and facilitates effective decision making. However, visualization tools are typically used for presentation only in large-scale urban projects. Visualization is not widely accepted due to a lack of demonstrated engineering benefits for typical agency projects, such as small- and medium-sized projects, rural projects, and projects where external stakeholder communication is not a major issue. Furthermore, there is a perceived high cost of investment of both financial and human capital in adopting visualization tools. The most advanced visualization technique of virtual reality has

only been used in academic research settings, and 4D CAD has been used on a very limited basis for highly complicated specialty projects. However, there are a number of less intensive visualization methods available which may provide some benefit to many agency projects. In this paper, we present the results of a feasibility study examining the use of visualization and simulation applications for improving highway planning, design, construction, and safety and mobility.
