Performing in Contemporary Musicals David Sisco,Laura Josepher,2022-03-13 Performing in Contemporary Musicals brings into sharp focus the skills performers must possess when tackling shows that are newly written, in development, or somewhere in between. The authors bust myths about contemporary musical theatre and analyze the development timelines of musicals from around the world. They also explore how performers can become invaluable to a creative team by developing the skills needed to move a new musical forward including: contemporary acting and singing techniques, dramaturgy, quickly picking up new material, and collaboration. Each chapter features insightful industry interviews, recommended activities, an extensive reading list, and an online companion for further study. Alliteration, Again and Again Larry J. Kricka,2013-03-04 The genesis of the alliterations in this book was an email exchange in 2001 with a colleague in Albany, New York. In the emails, we traded alliterations back and forth, variously signing our emails Phrantic in Philadelphia, Accommodating in Albany, Perplexed in Philadelphia and finally, Alliterative in Albany. This email exchange was ultimately the inspiration for my first alliteration about the city of Albany. I then set myself the challenge of exploring the alliterative possibilities of each letter of the alphabet and this slim volume of alliterative verse, Alliteration, Again and Again, is the culmination of that endeavor. My earnest hope is that this work will not be dismissed as: Alliteration, an author affliction and awful addiction, avoiding any actual artistic achievement.!

Science Education during Early Childhood Wolff-Michael Roth,Maria Ines Mafra Goulart,Katerina Plakitsi,2012-10-12 Children's learning and understanding of science during their pre-school years has been a neglected topic in the education literature—something this volume aims to redress. Paradigmatic notions of science education, with their focus on biologically governed development and age-specific accession to scientific concepts, have perpetuated this state of affairs. This book offers a very different perspective, however. It has its roots in the work of cultural-historical activity theorists, who, since Vygotsky, have assumed that any higher cognitive function existed in and as a social relation first. Accepting this precept removes any lower limit we may deem appropriate on children's cognitive engagement with science-related concepts. The authors describe and analyze the ways in which children aged from one to five grapple with scientific concepts, and also suggest ways in which pre-service and in-service teachers can be prepared to teach in ways that support children's development in cultural and historical contexts. In doing so, the book affirms the value of cultural-historical activity theory as an appropriate framework for analyzing preschool children's participation in science learning experiences, and shows that that the theory provides an appropriate framework for understanding learning, as well as for planning and conducting training for pre-school teachers.
