**William Clark Russell**

*A Brilliant Night of Stars and Ice* PPR Rebecca Connolly, 2024-04-02 Based on the remarkable true story of the Carpathia—the only ship and her legendary captain who answered the distress call of the sinking Titanic. Just after midnight on April 15, 1912, the passenger steamship Carpathia receives a distress signal from the largest passenger liner ever built, RMS Titanic, which is on its maiden voyage from Southampton, England, to New York. Captain Arthur Rostron is awakened to an enormous maritime emergency with little information to guide his actions in answering the call for help. Is the dire threat to the unsinkable Titanic accurate? His ship is more than four hours away; will Carpathia hold together if pushed to never-before-tested speeds? What if his ship also strikes an iceberg? How many of Titanic's 2,200 passengers will the Carpathia be able to accommodate? And with the freezing temperatures, will there be any survivors by the time the Carpathia arrives? Kate Connolly is excited to join her sister in America and proud to be traveling on the grand Titanic, which was built in her Irish homeland. As a passenger in third-class accommodations, she is among the last to receive instruction and help after Titanic hits an iceberg. Among the chaos of abandoning ship, the chances of her securing a spot in a lifeboat appear grim. With the help of several men, also from Ireland, Kate finally reaches the upper decks and feels lucky to board Lifeboat 13, although no one knows if or when a rescue ship will come. She fears the icy water and wonders if they'll all freeze to death. After seeing their magnificent ship submerge into the abyss, and hearing the cries of hundreds of fellow passengers drowning, it is almost too much to bear and Kate fleetingly thinks succumbing to her ordeal is the easiest escape. Told in alternating chapters from the perspective of Captain Rostron on the Carpathia and Kate Connolly on the Titanic, this historical novel is a compelling, heart-pounding account of two eyewitnesses to an epic disaster. Rostron's heroic and compassionate leadership, his methodical preparations for rescue, and his grit and determination to act honorably and selflessly to save lives and care for the survivors, sets the course for this awe-inspiring story.

*The Ice People* Maggie Gee, 2012-04-18 It's the middle of the twenty-first century, and the next Ice Age has suddenly sent global warming into reverse. Saul is one of the Ice People, the threatened peoples of the northern hemisphere, who, watching their world freeze over, try to move south towards the equator... 'Excellent ... intelligent, driven, imaginative, obsessive yet still gracious, one of our best ... Exciting stuff.' Fay Weldon 'Ambitious and subtle... She writes elegantly, unsentimentally,

expertly... The Ice People works persuasively as science fiction, and is truthful about our emotional lives.' Independent 'Infused with poetic intensity ... this is a gripping fictional realisation of what we fear: the death of civilisation. Maggie Gee achieves her apocalyptic vision without the clank of hardware and intergalactic wars. Her detail is precise and controlled and her beautifully orchestrated whisper of redemption is rooted in eternal myth.' Elizabeth Buchan The Times 'An intriguing novel of ideas, fully fleshed out ... Classy science fiction.' Mail on Sunday 'A remarkable novel... up there with Orwell and Huxley.' Jeremy Paxman 'A gem of a book.' Rose Tremain 'A rattling good page-turning yarn.' George Melly 'A fantastic book' Mariella Frostrup

**One Hundred and Sixty Minutes** William Elliott Hazelgrove,2021-09-01 One hundred and sixty minutes. That is all the time rescuers would have before the largest ship in the world slipped beneath the icy Atlantic. There was amazing heroism and astounding incompetence against the backdrop of the most advanced ship in history sinking by inches with luminaries from all over the world. It is a story of a network of wireless operators on land and sea who desperately sent messages back and forth across the dark frozen North Atlantic to mount a rescue mission. More than twenty-eight ships would be involved in the rescue of Titanic survivors along with four different countries. At the heart of the rescue are two young Marconi operators, Jack Phillips 25 and Harold Bride 22, tapping furiously and sending electromagnetic waves into the black night as the room they sat in slanted toward the icy depths and not stopping until the bone numbing water was around their ankles. Then they plunged into the water after coordinating the largest rescue operation the maritime world had ever seen and thereby saving 710 people by their efforts. The race to save the largest ship in the world from certain death would reveal both heroes and villains. It would begin at 11:40 PM on April 14, when the iceberg was struck and would end at 2:20 AM April 15, when her lights blinked out and left 1500 people thrashing in 25-degree water. Although the race to save Titanic survivors would stretch on beyond this, most people in the water would die, but the amazing thing is that of the 2229 people, 710 did not and this was the success of the Titanic rescue effort. We see the Titanic as a great tragedy but a third of the people were rescued and the only reason every man, woman, and child did not succumb to the cold depths is due to Jack Phillips and Harold McBride in an insulated telegraph room known as the Silent Room. These two men tapping out CQD and SOS distress codes while the ship took on water at the rate of 400 tons per minute from a three-hundred-foot gash would inaugurate the most extensive rescue operation in maritime history using the cutting-edge technology of the time, wireless.
