**Judd E. Hollander**

*Bad Words* David Sosa, 2018-07-12 What makes a word bad? *Bad Words* is a philosophical examination of slurs and other derogatory and problematic language, by some of the leading contributors to the field. Slurs are an interesting case for the philosophy of language. On the one hand, they seem to be meaningful in something like the way many other expressions are meaningful - different slurs might seem in some way to refer to different groups, for example. But on the other hand, it's clear that slurs also have distinctive practical effects and roles: they can seem to be just an arbitrary tool for insulting or enabling harm. How are those aspects related? Just how the use of words is related to their significance is of course one of the deepest issues in philosophy of language: slurs not only refine that issue, by presenting a kind of use that presents novel challenges, but also give the issue a compelling practical relevance. The Engaging Philosophy series is a new forum for collective philosophical engagement with controversial issues in contemporary society.

*Arabic Rhetoric* Hussein Abdul-Raof, 2006-09-27 *Arabic Rhetoric* explores the history, disciplines, order and pragmatic functions of Arabic speech acts. It offers a new understanding of Arabic rhetoric and employs examples from modern standard Arabic as well as providing a glossary of over 448 rhetorical expressions listed in English with their translations, which make the book more accessible to the modern day reader. Hussein's study of Arabic rhetoric bridges the gap between learning and research, whilst also meeting the academic needs of our present time. This up-to-date text provides a valuable source for undergraduate students learning Arabic as a foreign language, and is also an essential text for researchers in Arabic, Islamic studies, and students of linguistics and academics.

**Analysing English-Arabic Machine Translation** Zakaryia Almahasees, 2021-11-29 Machine Translation (MT) has become widely used throughout the world as a medium of communication between those who live in different countries and

speak different languages. However, translation between distant languages constitutes a challenge for machines. Therefore, translation evaluation is poised to play a significant role in the process of designing and developing effective MT systems. This book evaluates three prominent MT systems, including Google Translate, Microsoft Translator, and Sakhr, each of which provides translation between English and Arabic. In the book Almahasees scrutinizes the capacity of the three systems in dealing with translation between English and Arabic in a large corpus taken from various domains, including the United Nation (UN), the World Health Organization (WHO), the Arab League, Petra News Agency reports, and two literary texts: The Old Man and the Sea and The Prophet. The evaluation covers holistic analysis to assess the output of the three systems in terms of Translation Automation User Society (TAUS) adequacy and fluency scales. The text also looks at error analysis to evaluate the systems' output in terms of orthography, lexis, grammar, and semantics at the entire-text level and in terms of lexis, grammar, and semantics at the collocation level. The research findings contained within this volume provide important feedback about the capabilities of the three MT systems with respect to EnglishArabic translation and paves the way for further research on such an important topic. This book will be of interest to scholars and students of translation studies and translation technology.
