Pervasive Computing Paradigms for Mental Health Pietro Cipresso,Silvia Serino,Daniela Villani,2019-07-10 This book constitutes the refereed proceedings of the 9th International Conference on Pervasive Computing Paradigms for Mental Health, MindCare 2019, held in Buenos Aires, Argentina, in April 2019. The 22 papers presented were carefully reviewed and selected from 38 submissions and present new paradigms in mental healthcare, in parallel with compelling questions about how it is possible to promote and structure these changes to improve physical well-being.

Active Ageing and Healthy Living Paolo Ajmone Marsan,Claudio Grassi,2014-08-15 Increased life expectancy and the ageing of the population have been the subject of attention in Western countries, and particularly in Europe, for some years now. The challenge of 'squaring the circle' between ends and means - as well as between personal aspirations and systemic constraints - in health and social care continues to be a major concern for policymakers and all those involved in the delivery of services. This book, Active Ageing and Healthy Living: A Human Centered Approach in Research and Innovation as Source of Quality of Life, presents the results of a number of research projects from the Università Cattolica del Sacro Cuore - the largest private university in Italy and in Europe - with a strong commitment to the areas of medicine and health sciences, economics, business, international relations, political science, psychology and communications. Visions and research directions for the future are also presented and discussed. The introduction to the book addresses the challenges posed by an increasingly ageing population and the way in which multidisciplinary research can contribute to positive outcomes. The remainder of the book is divided into two sections. The first proposes promising research directions for future focus, and includes papers on demographic change; frailty in the elderly; the role of diet in healthy ageing; active ageing; and positive technology. The second section deals with recent developments in research into active ageing and healthy living (AA&HL). It addresses numerous topics, including: mechanisms to shift the balance from unhealthy to healthy ageing; nutrition; the role of ICTs for older people; work, retirement and health; and empowering skills for AA&HL.

Promoting Patient Engagement and Participation for Effective Healthcare Reform Graffigna, Guendalina,2016-04-20

Industry professionals, government officials, and the general public often agree that the modern healthcare system is in need of an overhaul. With organizations concerned with the long-term care of patients, new strategies, practices, and organizational tools must be developed to optimize the current healthcare system. Recent literature suggests that patient participation may be the ideal solution, as patients and caregivers who are more actively involved in their healthcare experience better outcomes. Promoting Patient Engagement and Participation for Effective Healthcare Reform outlines models that can be used to harness the power of patient involvement as a way to instill change in the healthcare industry. This book features a convergence of healthcare professionals and scholars providing insights into the best practices of interventions and reform as well as practical applications to foster patient engagement and participation. It is a useful reference source for healthcare providers, students and professionals in the fields of nursing, therapy, and public health, as well as managers and policy makers.

Integrating Technology in Positive Psychology Practice Villani, Daniela, Cipresso, Pietro, Gaggioli, Andrea, Riva, Giuseppe, 2016-02-29 Most research on the psychological impact of computers and the Internet has focused on the negative side of technology – i.e. how the use (abuse) of interactive systems and videogames can negatively affect mental health and behavior. On the other hand, less attention has been devoted to understanding how emerging technologies can promote optimal functioning at individual, group, and community levels. Integrating Technology in Positive Psychology Practice explores the various roles that technology can play in the development of psychological interventions aimed at helping people thrive. Exploring the ways in which ICT can be utilized to foster positive emotions, promote engagement in empowering activities, and support connectedness between individuals, groups, and communities, this timely publication is designed for use by psychologists, IT developers, researchers, and graduate students.

Advances in Substance and Behavioral Addiction Michela Balconi, Salvatore Campanella, 2021-10-22 This book deals with recent perspectives on the panel of addiction behavior in a vast amount of population (young and adult). Thanks to the contribution of experts of the topic of addiction the volume will furnish new perspectives to formulate assessment, diagnosis and intervention in response to the increasing variety of addictions. It focuses the assessment of executive functions in substance and behavioral addictions. More specifically, this assessment consists of a new approach not only inherent to the diagnosis, but also to the treatment and prevention of addictions. In fact, there is a strict relationship between executive functions (EF) and addictive behavior: EF plays a remarkable role in significant phenomena for the treatment of addictions, such as craving, relapse and compliance to treatment.

A Systematic Review of Key Issues in Public Health Stefania Boccia, Paolo Villari, Walter Ricciardi, 2015-03-13 This wide-ranging study reviews the state of public health worldwide and presents informed recommendations for real-world solutions. Identifying the most urgent challenges in the field, from better understanding the causes of acute diseases and

chronic conditions to reducing health inequities, it reports on cost-effective, science-based, ethically sound interventions. Chapters demonstrate bedrock skills essential to developing best practices, including flexible thinking for entrenched problems, conducting health impact assessments, and working with decision-makers. From these current findings come long-term practice and policy goals for preventing disease, promoting health, and improving quality of life, both locally and globally. A sampling of the topics covered: · Health trends of communicable diseases. · Epidemiology of cancer and principles of prevention. · Respiratory diseases and health disorders related to indoor and outdoor air pollution. · Public health gerontology and active aging. · Migrant and ethnic minority health. · Public health genomics. A Systematic Review of Key Issues in Public Health offers graduate students in the discipline a firm grasp on the field as it presently stands, and a clear set of directions for its potential future.
