Estructura de computadores. Prácticas de laboratorio. Arduino Zero para la construcción de un robot móvil como plataforma de prácticas M.^a José Santofimia Romero,Juan Carolos López López,Xavier del Toro García,2020-10-22 El proyecto Arduino surge en el año 2005, como plataforma educativa y para la creación de proyectos interactivos, con el propósito de ofrecer una placa electrónica de prototipado de bajo coste y open source. El éxito de este proyecto hace que el uso de esta plataforma no se limite únicamente a entornos educativos y se haya extendido al prototipado de soluciones de automatización y control a pequeña escala. Su bajo coste, facilidad de aprendizaje y la amplia comunidad de usuarios, son probablemente las claves más importantes de su éxito. En el ámbito universitario es cada vez más común encontrar prácticas de laboratorio relacionadas con la electrónica o la programación que utilizan Arduino como plataforma de experimentación. En nuestro caso, nuestra motivación para elegirla como plataforma de prácticas es que nos ofrece un computador lo suficientemente complejo a la par que sencillo para que, mediante la exploración y la práctica, los estudiantes de la asignatura Estructura de Computadores puedan conocer y familiarizarse con los distintos elementos que componen un computador. Este manual de prácticas describe el proceso de desarrollo y programación de un robot móvil empleando Arduino Zero. A lo largo de este proceso el alumno podrá explorar, de un modo práctico, los aspectos más esenciales de la estructura de un computador (el sistema de memoria, entrada/salida, ABI, etc.). Los primeros capítulos se dedicarán a ofrecer la información necesaria para abordar los diferentes ejercicios que se propondrán en las sesiones de prácticas, de tal forma que para cada capítulo se dedicarán dos sesiones. En la primera sesión se realizarán ejercicios guiados relacionados con el tema estudiado y durante la segunda sesión se realizará un ejercicio de evaluación similar a los de autoevaluación (con soluciones) propuestos en este manual. Finalmente, los anexos ofrecen información guiada para la instalación y configuración del entorno de desarrollo en sistemas GNU/Linux.

Castellanos y leoneses en América: narración biográfica y prácticas de identificación Arsenio Dacosta,2020-11-01 Esta obra aborda la auto-representación de un amplio colectivo de ciudadanos de distintos países americanos que o bien nacieron

en Castilla y León o son descendientes de emigrantes de nuestra región. La base fundamental del estudio radica en una de las más importantes colecciones memorialísticas de la emigración europea a América surgida de los denominados Premios Memoria de la Emigración Castellana y Leonesa. Al calor de aquellos, desde 2005 se han reunido trescientos relatos de vida que reflejan la memorialización del pasado entre algunos colectivos, fundamentalmente en Argentina y Cuba, cuya vinculación con Castilla y León se ha visto revitalizada en los últimos veinticinco años. Tras analizar la recepción del método biográfico en Antropología y otras Ciencias Sociales y Humanas, y tras discutir conceptos como «memoria colectiva» o «identidad», se analizan los contenidos narrativos de ese corpus, particularmente los que afectan a la experiencia migratoria y su corporalidad. El trabajo se completa con el desvelamiento de los dispositivos mediadores de los sentidos y prácticas de identificación de los autores de los relatos, desde sus motivaciones autorales o memorialísticas, al propio dispositivo de los Premios, pasando por marcos de sociabilidad como la familia, las asociaciones étnicas o las instituciones de la región de origen.

Psicomotricidad. Fundamentación teórica y orientaciones prácticas Ángel Hernández Fernández, 2008-12-12 Este manual pretende aproximarnos a un planteamiento metodológico extraordinariamente potente para la educación infantil intentando satisfacer criterios de rigor científico y utilidad práctica para el docente. El movimiento y la acción sobre el entorno físico son un puente privilegiado hacia el aprendizaje y el desarrollo en el niño. La construcción sensomotriz de la capacidad cognitiva en las primeras edades viene asociada a la necesidad del niño de experimentar e interactuar con su entorno social como base del desarrollo de su identidad personal y su personalidad. Podemos utilizar la psicomotricidad como una forma global de abordar el currículo en educación infantil desde una perspectiva integradora que fomenta una actitud activa y creativa en los niños o cuando menos puede representar una valiosa técnica para complementar el planteamiento curricular del docente de esta etapa. En los dos primeros capítulos de este libro se recorren los conceptos psico-evolutivos que deben fundamentar la práctica psicomotriz intentando conciliar los planteamientos teóricos con numerosos ejemplos de la vida cotidiana y del contexto de la educación infantil. El tercer capítulo analiza a fondo la práctica educativa de la psicomotricidad y su valor como estrategia metodológica para favorecer el desarrollo infantil. El cuarto capítulo profundiza en las distintas necesidades educativas especiales y su tratamiento en el aula de psicomotricidad desde una perspectiva inclusiva. Por último, se adjuntan numerosos anexos prácticos que ayudan al educador a aprovechar al máximo la psicomotricidad: escalas de desarrollo, criterios de evaluación, guías de estimulación sensorial, orientaciones respecto a la preparación de la sala y las sesiones, etc.

Forjar un cuarto propio Vanina Papalini,2018-03-14 Los autores asumen una posición materialista, pensando el libro como objeto, atendiendo a la trama de relaciones por donde circula y anclando los fragmentos biográficos en su contexto. Este enfoque es claramente interpretativista pero al mismo tiempo -y aunque parezca paradójico- antihumanista, bajo inspiraciones deleuzianas y latourianas, como antídoto ante la suposición fácil de que la condición humana es siempre y completamente la misma. Es una cosecha dispar de fragmentos de una teoría en construcción, impresiones, interrogantes, estímulos, enigmas, sugerencias. Algunas ideas, pocas respuestas, ninguna receta.
