Art and Sustainability Sacha Kagan, 2014-03-15 What is the cultural dimension of sustainability? This book offers a thought-provoking answer, with a theoretical synthesis on »cultures of sustainability«. Describing how modernity degenerated into a culture of unsustainability, to which the arts are contributing, Sacha Kagan engages us in a fundamental rethinking of our ways of knowing and seeing the world. We must learn not to be afraid of complexity, and to re-awaken a sensibility to patterns that connect. With an overview of ecological art over the past 40 years, and a discussion of art and social change, the book assesses the potential role of art in a much needed transformation process.

Landscape into Eco Art Mark Cheetham, 2018-02-14 Dedicated to an articulation of the earth from broadly ecological perspectives, eco art is a vibrant subset of contemporary art that addresses the widespread public concern with rapid climate change and related environmental issues. In *Landscape into Eco Art*, Mark Cheetham systematically examines connections and divergences between contemporary eco art, land art of the 1960s and 1970s, and the historical genre of landscape painting. Through eight thematic case studies that illuminate what eco art means in practice, reception, and history, Cheetham places the form in a longer and broader art-historical context. He considers a wide range of media—from painting, sculpture, and photography to artists' films, video, sound work, animation, and installation—and analyzes the work of internationally prominent artists such as Olafur Eliasson, Nancy Holt, Mark Dion, and Robert Smithson. In doing so, Cheetham reveals eco art to be a dynamic extension of a long tradition of landscape depiction in the West that boldly enters into today's debates on climate science, government policy, and our collective and individual responsibility to the planet. An ambitious intervention into eco-criticism and the environmental humanities, this volume provides original ways to understand the issues and practices of eco art in the Anthropocene. Art historians, humanities scholars, and lay readers interested in contemporary art and the environment will find Cheetham's work valuable and invigorating.

Artistic Visions of the Anthropocene North Gry Hedin, Ann-Sofie N. Gremaud, 2018-03-09 In the era of the Anthropocene, artists and scientists are facing a new paradigm in their attempts to represent nature. Seven chapters, which focus on art from 1780 to the present that engages with Nordic landscapes, argue that a number of artists in this period work in the intersection between art, science, and media technologies to examine the human impact on these landscapes and question the blurred boundaries between nature and the human. Canadian artists such as Lawren Harris and Geronimo Inuitiq are

considered alongside artists from Scandinavia and Iceland such as J.C. Dahl, Eija-Liisa Ahtila, Toril Johannessen, and Björk.

Ecoart in Action Amara Geffen, Ann Rosenthal, Chris Fremantle, Aviva Rahmani, 2022-02-01 Ready-to-go, vetted approaches for facilitating artistic environmental projects How do we educate those who feel an urgency to address our environmental and social challenges? What ethical concerns do art-makers face who are committed to a deep green agenda? How can we refocus education to emphasize integrative thinking and inspire hope? What role might art play in actualizing environmental resilience? Compiled from 67 members of the Ecoart Network, a group of more than 200 internationally established practitioners, *Ecoart in Action* stands as a field guide that offers practical solutions to critical environmental challenges. Organized into three sections—Activities, Case Studies, and Provocations—each contribution provides models for ecoart practice that are adaptable for use within a variety of classrooms, communities, and contexts. Educators developing project and place-based learning curricula, citizens, policymakers, scientists, land managers, and those who work with communities (human and other) will find inspiration for integrating art, science, and community-engaged practices into on-the-ground environmental projects. If you share a concern for the environmental crisis and believe art can provide new options, this book is for you!

New Practices - New Pedagogies Malcolm Miles, 2004-11-23 With radical changes happening in arts over the past two decades, this book brings us up to date with the social and economic contexts in which the arts are produced. Influential and knowledgeable leaders in the field debate how arts education - particularly in visual art - has changed to meet new needs or shape new futures for its production and reception. Opening up areas of thought previously unexplored in arts and education, this book introduces students of visual culture, performance studies and art and design to broad contextual frameworks, new directions in practice, and finally gives detailed cases from, and insights into, a changing pedagogy.
