

I Materiali Tecnologia

Rinaldo Domenico Tranquillo Ferrini

Innovazione tecnologica in architettura e qualità dello spazio Chiara Tonelli, 2012-11-02T00:00:00+01:00 Questo testo indaga il ruolo che la cultura tecnologica occupa, o dovrebbe occupare, nella formazione universitaria, nella ricerca scientifica, nella progettazione e realizzazione dell'architettura. Il percorso intrapreso si pone l'obiettivo di esplorare, in riferimento al settore produttivo edilizio e alla soglia di una riforma didattica, quali contenuti attengono all'insegnamento della Tecnologia dell'architettura e quali sbocchi professionali offrono; cosa significa fare ricerca in un ambito dal nome tanto abusato (la ricerca tecnologica) e chi ne sono gli attori; quali orientamenti si possono prospettare per una riorganizzazione del settore al fine di innalzare il livello di qualità del prodotto edilizio, nella sua accezione morfologica in particolare. Questo scritto, destinato anche a fini didattici, introduce pertanto alla cultura della realizzazione, secondo la quale ogni atto programmatico e progettuale deve porsi come obiettivo il raggiungimento della realizzazione. Sebbene questo principio possa sembrare scontato, si rileva invece nel settore un divario sempre maggiore tra il momento di definizione "concettuale" e il momento di definizione "materiale". Tale divario è riscontrabile anche nei settori disciplinari fondanti la preparazione in Architettura, tra i quali dovrebbero essere invece superate le separazioni, al fine di individuare un'unica strada per il progetto, atto centrale del processo e per questo frutto dell'operato di tutti gli attori. Anche l'aspetto della qualità morfologica è strettamente relazionato con la cultura tecnologica dal momento che deriva da un puro atto creativo, dalla ricerca per l'innovazione e dall'organizzazione del processo edilizio. In chiusura, la lettura di alcune opere famose dell'architettura permette di confrontare l'iter delineato con il processo compiuto.

Materiali e tecnologie dell'architettura Maria Chiara Torricelli, Romano Del Nord, Paolo Felli, 2001

Food packaging Luciano Piergiovanni, Sara Limbo, 2010-05-07 Il volume è rivolto agli studenti universitari dei corsi di Laurea in Scienze e Tecnologie Alimentari, Scienze e Tecnologie Agrarie e Scienze e Tecnologie della Ristorazione che devono acquisire nei loro studi conoscenze, competenze e abilità relative all'ambito multidisciplinare del confezionamento di alimenti e bevande. Lo scopo dell'opera è però anche quello di rendere disponibile un testo di utilità più ampia e generale, indirizzato ai tecnici e agli operatori che nelle aziende di produzione di alimenti, o di imballaggi per alimenti, sono interessati ad un approfondimento e ad un aggiornamento scientifico-tecnologico nell'area. Frutto dell'esperienza degli Autori che insegnano questa materia da molti anni nella Facoltà di Agraria dell'Università degli Studi di Milano, l'opera offre la

combinazione di esperienze didattiche e scientifiche in questo specialistico campo permettendo di affrontare il complesso ed articolato tema delle Tecnologie di Food Packaging in modo esauriente, aggiornato ed approfondito per garantire agli studenti ed ai docenti di Tecnologie Alimentari, così come a chiunque interessato alla materia, un efficace strumento di studio e di consultazione.

Cluster creativi per i beni culturali. L'esperienza toscana delle tecnologie per la conservazione e la valorizzazione Luciana Lazzeretti, 2012 The volume analyses the contribution made by companies, institutions and research bodies operating in the region of Tuscany for the development of new technologies in the field of cultural heritage. The aim is to contribute to the current debate on the innovative capacity of artistic heritage and on cities of art, understood as creative environments characterised by the presence of clusters that are capable of generating and developing heritage-driven innovations. Through the analysis of research projects and innovation networks, the studies contained in the volume investigate the instance of laser technologies for restoration and of new ICT technologies for the digitisation of cultural heritage. The volume stems from a three-year collaboration with the Nello Carrara Institute of Applied Physics of the CNR of Florence.

La sostenibilità non costa Nadia Preghenella, Cinzia Battistella, Alberto F. De Toni, 2022-04-28T00:00:00+02:00 Il titolo del volume è ispirato a quello di un testo del 1986 di Philip Bayard Crosby intitolato *La qualità non costa*. La sua tesi è che, nel lungo termine, i costi della non qualità sono maggiori dei costi della qualità. In modo analogo, parafrasando Crosby, gli autori sostengono che «la sostenibilità non costa». Il libro – frutto di una ricerca basata su otto casi aziendali del settore della nautica che riguardano cantieri navali, imprese di progettazione, marine e rivenditori di componentistica – indaga la possibilità di cambiare i modelli di business da tradizionali a sostenibili, trasformando la sostenibilità da una fonte di costo a una fonte di valore. Le direttrici chiave che emergono nella rivisitazione dei modelli di business sono il coinvolgimento degli stakeholder, la servitizzazione e l'impiego della tecnologia per la riduzione degli impatti ambientali.
