Good=Happiness Bad=Sadness Sadhvi Nidhi Shree ,Sadhvi Kripa Shree,2023-09-24 As our soul travels through the four stations of hell, tiryancha, human and heaven, it is accompanied by the two messengers of goodness and badness. The messenger of good thoughts and actions brings happiness; and the messenger of bad thoughts and actions brings sadness, thus Good=Happiness and Bad=Sadness. Hence, we continue to sway constantly from a state of happiness to the other state of sadness. This book brings to light the reasons that lead to happiness and the ones that lead to sadness, thus helping a being in making a conscious choice of correcting one's deeds to attain perennial happiness.

The Biology of Human Survival Claude A. Piantadosi,2003 The range of environments in which people can survive is extensive, yet most of the natural world cannot support human life. The Biology of Human Survival identifies the key

determinants of life or death in extreme environments from a physiologist's perspective, integrating modern concepts of stress, tolerance, and adaptation into explanations of life under Nature's most austere conditions. The book examines how individuals survive when faced with extremes of immersion, heat, cold or altitude, emphasizing the body's recognition of stress and the brain's role in optimizing physiological function in order to provide time to escape or to adapt. In illustrating how human biology adapts to extremes, the book also explains how we learn to cope by blending behavior and biology, first by trial and error, then by rigorous scientific observation, and finally by technological innovation. The book describes life-support technology and how it enables humans to enter once unendurable realms from the depths of the ocean to the upper reaches of the atmosphere and beyond. Finally, it explores the role that advanced technology might play in special environments of the future, now in long journeys into space.
