Design and Build Contracts Guy Higginbottom,2023-09-26 DESIGN AND BUILD CONTRACTS Design and build (D&B) construction procurement relies on a project's main contractor shouldering the responsibility for creating the design and executing the construction for a project. While the extent of contractor-produced design can vary, this method of construction procurement affords the contractor a greater level of input and responsibility than traditionally procured contracts (where the employer has greater design responsibility). Over the last decade in the UK, it has become clear that D&B contracts are becoming the most popular method for procuring construction projects; often echoing the ways in which contracts for infrastructure and process plant can be procured. Whilst D&B can provide a greater degree of contractor input for producing feasibility and concept designs, then the detailed design to deliver a project, many clients amend standard forms of D&B contracts to alter the contractors' design input. This can significantly change D&B, deviating from the procedures set out in the standard forms of D&B contract. This book firstly takes the reader through each stage of a project (based upon the RIBA Plan of Work 2020) to provide guidance on how D&B contracts were intended to operate, then secondly, identifying how D&B contracts and their procedures have changed. Readers will find: Outline commentary and guidance on commonly used standard forms of D&B contract, including: JCT Design and Build 2016; FIDIC Conditions of Contract for Plant Design-Build 2017; and NEC4 How each D&B contract is intended to operate during each stage of the RIBA Plan of Work 2020 How the operation of D&B contracts and their procedures are often amended. An ideal resource for contractors, employers, and consultants, as well as those studying construction at university, Design and Build Contracts offers helpful commentary and guidance for how each stage of a D&B engineering or construction project should progress.

Contract Documentation for Contractors Vincent Powell-Smith, John H. M. Sims, Christopher Dancaster, 2008-04-30

The JCT standard forms of building contract require a thorough understanding of their procedural requirements, as well as their legal implications. They require both the contractor and the architect, on behalf of the employer, to send a wide range of notices and letters if each party is to protect its legitimate interests. The main contract forms are also supported by complex sub-contract documentation. Therefore, it is not surprising that when this book of specimen letters, notices and forms was first published, it was widely welcomed by the construction industry. The book provides examples of documentation likely to be required for a contract under the following JCT forms: the Standard Form of Building Contract the Intermediate Form of Building Contract the Agreement for Minor Building Works the Standard Form of Building Contract With Contractor's Design It includes a commentary on the practical implications of the various documents and highlights the points to be watched. The new edition takes into account the wide range of amendments to the latest editions of the standard forms following the Housing Grants, Construction and Regeneration Act 1996, and in particular, the new payment and adjudication provisions. For the first time it features documentation for use with the JCT design and build form.
