As the definitive reference work on the region it will cover all aspects of the biophysical environment and its current environmental problems and management practices. The topics discussed range from a regional view of landforms and vegetation to specific cases including urban environments, coral reefs, volcanic hazards, and the Mekong River Basin. The contributors are distinguished, scholarly, and have a long association with Southeast Asia. This is the fourth volume to be published in the Oxford Regional Environment series.

Diving the Philippines and Southeast Asia David Espinosa,2002 Indispensable guides to some of the best diving, surfing and bird-watching destinations in the world. Each guide is fully colour illustrated throughout and presents the top sites for diving, surfing or bird-watching using world-class photographers and local experts.

Contemporary Conflicts in Southeast Asia Mikio Oishi,2015-11-30 This book looks at major contemporary conflicts—intra and interstate—in Southeast Asia from a conflict management perspective. Starting with the view that the conventional ASEAN conflict-management methods have ceased to be effective, it looks for new conflict-management patterns and trends by investigating seven contemporary cases of conflict in the region. Focusing on the incompatibilities involved in each case and examining how they have been managed—whether by integration, co-existence, elimination or

maneuvering around the conflict—the book sheds new light on the significance of managing conflict in achieving and maintaining the stability of the Southeast Asian region. It makes a significant theoretical contribution to the field of peace and conflict studies by proposing the concept of “mediation regime” as the key to understanding current conflict management within ASEAN.
