Facing the Catastrophe LIT Verlag, 2024-10-01 Originally published in Germany in its uncensored Russian version and now available in English, this volume presents a unique collection of essays by Russian-speaking intellectuals from Russia, Ukraine, and Europe. The book offers a profound analysis of the catastrophic war in Ukraine through philosophical, moral, sociological, and historical lenses. Although published abroad to avoid Russian censorship, the book has been banned in Russia for “discrediting the Russian armed forces.” This manifesto critically examines the origins and social impact of the war, and continues to engage a global audience and foster vital discussions about the conflict and its profound effects. The English edition makes these important insights accessible to a wider audience and enhances global understanding of the war’s complexities. It invites international readers to engage with the philosophical debates it presents, contributing to a broader discourse on peace, justice, and accountability in times of conflict.

Christians in Iraqi Kurdistan Jeffrey Kaplan, 2025-09-26 In March of 2023, a group of researchers from the Danube Institute in Budapest, Hungary, undertook three weeks of intensive fieldwork in Iraqi Kurdistan, visiting major cities, small towns and villages throughout the region. The research is part of a multi-nation project, *Attacks on Christian Communities and Institutions*, which is jointly sponsored by the Danube Institute, Hungary Helps and the Batthyány Lajos Foundation. This book represents the fruits of this research. In its pages you will hear church leaders, government officials and military officers as well as ordinary citizens in their own voices. Included also are academic articles from noted scholars and NGO leaders as well as detailed transcripts of the interviews conducted by the Danube Institute researchers. Together this book presents a complete picture of the situations of both Christians and Yezidis in Iraqi Kurdistan in the period immediately following the defeat of ISIS.

Law in a Changing World Jutta Brunnee, Brenda Cossman, Andrew Green, Benjamin Alarie, 2025-05-31 Law in a Changing World explores how climate change is reshaping the law, drawing on contributions from legal scholars across diverse fields. The book examines how climate change impacts areas such as governance, justice, housing, and disability law. Rather than focusing on climate law alone, the chapters explore how climate change is challenging foundational legal concepts and demanding adaptations across various sectors. The authors consider the roles of international, Indigenous, and domestic legal systems in addressing climate-related issues. Topics include climate justice for vulnerable populations, the role of government in crisis management, and the intersection of law with emerging challenges like housing and disability rights. Law in a Changing World provides a comprehensive, cross-disciplinary examination of how legal frameworks can respond to climate-related emergencies and injustices, offering fresh perspectives on the role of law in a warming world. It is an essential read for those interested in the intersection of law, policy, and climate change.

Modular Synthesis Ezra J. Teboul, Andreas Kitzmann, Einar Engström, 2024-04-24 Modular Synthesis: Patching Machines and People brings together scholars, artists, composers, and musical instrument designers in an exploration of modular synthesis, an unusually multifaceted musical instrument that opens up many avenues for exploration and insight,

particularly with respect to technological use, practice, and resistance. Through historical, technical, social, aesthetic, and other perspectives, this volume offers a collective reflection on the powerful connections between technology, creativity, culture, and personal agency. Ultimately, this collection is about creativity in a technoscientific world and speaks to issues fundamental to our everyday lives and experiences, by providing insights into the complex relationships between content creators, the technologies they use, and the individuals and communities who design and engage with them. With chapters covering VCV Rack, modular synthesis, instrument design, and the histories of synthesizer technology, as well as interviews with Dave Rossum, Corry Banks, Meng Qi, and Dani Dobkin, among others, *Modular Synthesis* is recommended reading for advanced undergraduates, researchers, and practitioners of electronic music and music technology.
