Ella Marie Adams

Pricing and Revenue Optimization Robert Lewis Phillips, 2005-08-05 Written for MBA students and practitioners, this book is a comprehensive introduction to the theory and application of pricing and revenue optimization.

Pricing and Revenue Optimization Robert L. Phillips, 2021-05-18 This book offers the first introduction to the concepts, theories, and applications of pricing and revenue optimization. From the initial success of yield management in the commercial airline industry down to more recent successes of markdown management and dynamic pricing, the application of mathematical analysis to optimize pricing has become increasingly important across many different industries. But, since pricing and revenue optimization has involved the use of sophisticated mathematical techniques, the topic has remained largely inaccessible to students and the typical manager. With methods proven in the MBA courses taught by the author at Columbia and Stanford Business Schools, this book presents the basic concepts of pricing and revenue optimization in a form accessible to MBA students, MS students, and advanced undergraduates. In addition, managers will find the practical approach to the issue of pricing and revenue optimization invaluable. With updates to every chapter, this second edition covers topics such as estimation of price-response functions and machine-learning-based price optimization. New discussions of applications of dynamic pricing and revenue management by companies such as Amazon, Uber, and Disney, and in industries such as sports, theater, and electric power, are also included. In addition, the book provides current coverage of important applications such as revenue management, markdown management, customized pricing, and the behavioral economics of pricing.

Marketing in Hospitality and Travel Pratap Dixit, 2025-02-20 Marketing in Hospitality and Travel is a comprehensive guidebook that explores the dynamic and evolving landscape of marketing within the hospitality and travel industries. We blend theoretical insights with practical strategies, offering a roadmap for professionals and businesses aiming to thrive in an increasingly competitive and consumer-driven market. We begin by exploring fundamental concepts of hospitality and travel marketing, highlighting the unique challenges and opportunities faced by businesses in these sectors. Our in-depth analysis

of consumer behavior, market trends, and industry dynamics lays the foundation for strategic decision-making and marketing planning. A key theme of our book is the integration of technology and innovation in marketing strategies. We discuss the impact of AI, data analytics, virtual reality, and mobile platforms on customer engagement, personalization, and brand experiences. Case studies and examples illustrate how leading companies leverage these technologies to create memorable marketing campaigns. Sustainability and responsible tourism are also central themes. We examine the importance of eco-friendly practices, green certifications, and community engagement in shaping consumer perceptions and preferences. Strategies for promoting sustainability while enhancing guest experiences and driving business growth are explored in detail. Moreover, we cover essential topics such as digital marketing, content strategies, social media engagement, influencer partnerships, and customer relationship management. Practical frameworks, tools, and best practices are provided to help readers develop effective marketing plans, optimize budgets, and measure campaign success. With its comprehensive approach and real-world insights, *Marketing in Hospitality and Travel* is an indispensable resource for marketing professionals, business owners, students, and anyone interested in mastering the intricacies of marketing in the hospitality and travel industries.

Revenue Optimization Models Kannapha Amaruchkul, 2018-06 Addressing an emerging course in Revenue Management, this textbook covers the basic quantitative models in revenue management (RM) and price optimization. RM has grown out of Operations Research, and is now at the forefront of the pricing innovation. The text introduces the reader to the key concepts in RM practices, such as the capacity control and overbooking, and presents important prescriptive analytics models for pricing strategy. Numerous examples help the reader to understand the concepts and apply the models, in order to improve business decisions and gain competitive advantages. These examples illustrate the industrial applications of RM, e.g., airline, hotels, and car rental. The presentation of this textbook offers the right balance between theoretical and practical aspects of the field.

Artificial Intelligence and Machine Learning in the Travel Industry Ben Vinod,2023-05-26 Over the past decade, Artificial Intelligence has proved invaluable in a range of industry verticals such as automotive and assembly, life sciences, retail, oil and gas, and travel. The leading sectors adopting AI rapidly are Financial Services, Automotive and Assembly, High Tech and Telecommunications. Travel has been slow in adoption, but the opportunity for generating incremental value by leveraging AI to augment traditional analytics driven solutions is extremely high. The contributions in this book, originally published as a special issue for the Journal of Revenue and Pricing Management, showcase the breadth and scope of the technological advances that have the potential to transform the travel experience, as well as the individuals who are already putting them into practice.

Computer-based Modelling and Optimization in Transportation Jorge Freire Sousa,Riccardo Rossi,2014-02-20 This volume brings together works resulting from research carried out by members of the EURO Working Group on Transportation (EWGT) and presented during meetings and workshops organized by the Group under the patronage of the

Association of European Operational Research Societies in 2012 and 2013. The main targets of the EWGT include providing a forum to share research information and experience, encouraging joint research and the development of both theoretical methods and applications, and promoting cooperation among the many institutions and organizations which are leaders at national level in the field of transportation and logistics. The primary fields of interest concern operational research methods, mathematical models and computation algorithms, to solve and sustain solutions to problems mainly faced by public administrations, city authorities, public transport companies, service providers and logistic operators. Related areas of interest are: land use and transportation planning, traffic control and simulation models, traffic network equilibrium models, public transport planning and management, applications of combinatorial optimization, vehicle routing and scheduling, intelligent transport systems, logistics and freight transport, environment problems, transport safety, and impact evaluation methods. In this volume, attention focuses on the following topics of interest: · Decision-making and decision support · Energy and Environmental Impacts · Urban network design · Optimization and simulation · Traffic Modelling, Control and Network Traffic Management · Transportation Planning · Mobility, Accessibility and Travel Behavior · Vehicle Routing

Revenue Management I. Yeoman, U. McMahon-Beattie, 2010-12-08 Pricing is about deciding your market position whereas revenue management is the strategic and tactical decisions firms take in order to optimize revenues and profits. Marketing: Theory, Practice and Perspectives Dr. Qaisar Abbas Fatimi, 2024-03-10 Imagine a small coffee shop in a quaint neighborhood, which, through the power of effective marketing, transforms into a global phenomenon. Picture a startup with a revolutionary idea, using just the right blend of marketing strategies to become a household name. These stories, and countless others, form the tapestry of marketing's rich and varied history, a tapestry this book aims to explore and elucidate. At the heart of our journey is the quest to understand the essence of marketing. We begin in the past, delving into the foundational theories crafted by pioneers of the trade. These theories, like the story of David Ogilvy who revolutionized advertising with his focus on direct, customer-centric messaging, lay the groundwork for all that marketing has become today. As we move through the chapters, we encounter the practices that have shaped the present landscape of marketing. We tell tales of companies like Nike, which harnessed the power of brand storytelling to build an empire, and of small businesses that leveraged social media marketing to compete with industry giants. These stories illuminate the practical applications of marketing theories, demonstrating their power and versatility. In addressing ethical and sustainable marketing, we recount narratives of brands like Patagonia, which has woven environmental responsibility into its marketing fabric, inspiring a generation of conscious consumers and marketers alike. These tales underscore the growing importance of ethics in marketing, highlighting the shift towards more responsible business practices. The digital revolution in marketing

brings its own set of stories. We delve into the world of AI and VR, recounting how these technologies are creating new frontiers in customer engagement, much like how Spotify uses data analytics to personalize user experiences, redefining the music industry's marketing strategies. Data-driven marketing strategies are no less dramatic. We explore how Netflix's data analytics have not just shaped marketing campaigns but also content creation, turning viewer preferences into blockbuster hits. Our global perspective includes tales of cross-cultural marketing successes and faux pas, learning from brands that have skillfully navigated the complex tapestry of global markets, and from those who stumbled, offering invaluable lessons in the importance of cultural sensitivity. As we peer into the future, we share predictions and possibilities, like the potential impact of blockchain technology on marketing transparency and customer trust. These forward-looking perspectives prepare our readers for the exciting, uncharted territories of marketing yet to come. In crafting *Marketing: Theory, Practice, and Perspectives*, the goal was not just to create a book but to weave a story – a story that captures the imagination, imparts wisdom, and inspires action. It is a story that invites you, the reader, to be a part of this incredible world of marketing, to learn from its past, engage with its present, and shape its future.

Revenue Management and Pricing Analytics Guillermo Gallego, 2019 There is no strategic investment that has a higher return than investing in good pricing, and the text by Gallego and Topaloglu provides the best technical treatment of pricing strategy and tactics available. Preston McAfee, the J. Stanley Johnson Professor, California Institute of Technology and Chief Economist and Corp VP, Microsoft. The book by Gallego and Topaloglu provides a fresh, up to date and in depth treatment of revenue management and pricing. It fills an important gap as it covers not only traditional revenue management topics also new and important topics such as revenue management under customer choice as well as pricing under competition and online learning. The book can be used for different audiences that range from advanced undergraduate students to masters and PhD students. It provides an in depth treatment covering recent state of the art topics in an interesting and innovative way. I highly recommend it. Professor Georgia Perakis, the William F. Pounds Professor of Operations Research and Operations Management at the Sloan School of Management, Massachusetts Institute of Technology, Cambridge, Massachusetts. This book is an important and timely addition to the pricing analytics literature by two authors who have made major contributions to the field. It covers traditional revenue management as well as assortment optimization and dynamic pricing. The comprehensive treatment of choice models in each application is particularly welcome. It is

mathematically rigorous but accessible to students at the advanced undergraduate or graduate levels with a rich set of exercises at the end of each chapter. This book is highly recommended for Masters or PhD level courses on the topic and is a necessity for researchers with an interest in the field. Robert L. Phillips, Amazon This book, written by two of the leading researchers in the area, brings together in one place most of the recent research on revenue management and pricing analytics. New industries (ride sharing, cloud computing, restaurants) and new developments in the airline and hotel industries make this book very timely and relevant, and will serve as a critical reference for researchers. Professor Kalyan Talluri, the Munjal Chair in Global Business and Operations, Imperial College, London, UK. At last, a serious and comprehensive treatment of modern revenue management and assortment optimization integrated with choice modeling. In this book, Gallego and Topaloglu provide the underlying model derivations together with a wide range of applications and examples; all of these facets will better equip students for handling real-world problems. For mathematically inclined researchers and practitioners, it will doubtless prove to be thought-provoking and an invaluable reference.--Richard Ratliff.
