The Art of War for Computer Security Tom Madsen, 2019-09-03 In this book the author draws inspiration from Sun Tzu's *Art of War*, a work that explains conflict between nations, and he applies this to the computer security setting, examining how we should consider protecting information systems from accidents or malicious attacks. The author first briefly

introduces Sun Tzu. Then each chapter in the book takes its inspiration from an original title in The Art of War, where the author offers a general introduction to the content and then describes its application in a cybersecurity setting. These chapters cover estimates; waging war; offensive strategy; how you prepare for an attack; energy; weaknesses and strengths; the variables that need consideration before embarking on a war; how infrastructure is related to the concept of ground; attack by fire or how skilled attackers hide behind noise; and employing secret agents. The book will be interesting for computer security researchers and professionals who would like some grounding in a security mindset.

Endocrine and Metabolic Effects on Maternal-fetal and Neonatal Outcomes Huixia Yang, Moshe Hod, Jie Yan, Cuilin Zhang, 2024-07-10 Pregnancy is a complex state with many endocrine and metabolic challenges to a woman's physiology. Inappropriate maternal endocrine and metabolic changes such as obesity, hyperglycemia, hyperlipidemia, and hypothyroidism, may lead to short-term and long-term complications in the mother and offspring. This not only affects population health, but also imposes a huge social and economic burden, accompanied by significant direct and indirect public health costs. Therefore, the study of endocrine and metabolic effects on maternal-fetal and neonatal outcomes is an especially important research field. These studies will lead to new approaches to predicting metabolic diseases in pregnancy and provide new solutions and effective interventions to prevent or delay those related diseases. Furthermore, they will reveal unknown pathophysiological mechanisms of inappropriate maternal endocrine and metabolic changes during pregnancy and their implications on short-term and long-term complications in the mother and offspring. This could lead to updated diagnosis and treatment strategies for women with endocrine and metabolic diseases during pregnancy. The proposed Research Topic intends to evaluate the pathophysiological mechanisms of inappropriate maternal endocrine and metabolic changes during pregnancy and their implications on short-term and long-term complications in the mother and offspring. The evolving trends in prediction, diagnosis, prevention and treatment strategies of endocrine and metabolic diseases during pregnancy are also encouraged. In addition, the goal of this research topic is to uncover the characteristics of maternal endocrine and metabolic changes in special populations, like twins, women with obesity, gestational diabetes mellitus, pregnancy hypothyroidism, etc

Personal Power William Le Roy Stidger,1929

Vulnerable Raleigh Sadler,2019-02-01 There are more than 40 million enslaved people in the world today. This is overwhelming. A number so large leaves us asking, What could I even do to help? In his book *Vulnerable: Rethinking Human Trafficking*, Raleigh Sadler, president and founder of Let My People Go, makes the case that anyone can fight human trafficking by focusing on those who are most often targeted. This book invites the reader to understand their role in the problem of human trafficking, but more importantly, their role in the solution. Human trafficking can be defined as the exploitation of vulnerability for commercial gain. Using the power of story and candid interviews, Sadler seeks to discover how ordinary people can fight human trafficking by recognizing vulnerability and entering in. As vulnerable people, we can empower other vulnerable people, because Christ was made vulnerable for us.

Matters of Fact Daniel Wayne Lehman,1997 Explores the theory of nonfictional narrative as implicated text, arguing that an implicated reading becomes all the more valuable and troubling if we explore some distinctions between nonfiction and fiction at the level on which the narrative interacts with historical experience and if we examine that interaction for its practices and ideology. Subjects include the nonfiction narrator in scripted and conscripted history, implicating the author in the narratives of Tom Wolfe and John Reed, and over the edge of genre in the case of Private O'Brien.
