González, Carmen Venturini Medina, 2006-11 Obra de consulta práctica que capacita al estudiante de enfermería y guía al profesional de enfermería en los conocimientos y las habilidades necesarios para llevar a cabo procedimientos de la práctica asistencial medicoquirúrgica que presentan cierto nivel de complejidad. La 'Guía de procedimientos prácticos en enfermería medicoquirúrgica' rellena un hueco importante en la formación del futuro enfermero, ya que, en general, el aprendizaje del diplomado de Enfermería es más teórico de lo que luego requiere su ejercicio profesional, por lo que viene a completar esta fundamental parcela de la formación. Este perfil práctico es precisamente la aportación más novedosa de esta guía: presenta

información que no aparece en otras obras de técnicas y procedimientos, como drenajes torácicos, técnicas de canalización venosa, cuidados en el periodo perioperatorio, cuidados en paciente ostomizado, cuidados en paciente portador de tallas vesicales, cuidados en paciente anticoagulado, ejercicios para el manejo de la sueroterapia, nutrición parenteral, nutrición enteral, etc. Este enfoque práctico, de escuela de habilidades, se apoya, en todo momento, en una elaborada base teórica que completa una formación de la que se verá beneficiada la práctica profesional futura.
