

3001 The Final Odyssey

Arthur Charles Clarke

3001 The Final Odyssey Arthur C. Clarke, 1998-01-28 A Main Selection of the Science Fiction Book Club® Selected by the Literary Guild® and Doubleday Book Club® “3001 is not just a page-turner, plugged in to the great icons of HAL and the monoliths, but a book of wisdom too, pithy and provocative.”—New Scientist The body of Frank Poole, lost for a thousand years since the computer HAL caused his death en route to Jupiter, is retrieved, revived—and enhanced. In the most eagerly awaited sequel of all time, the terrifying truth of the Monoliths’ mission is a mystery only Poole can resolve. Praise for 3001 The Final Odyssey “A one man literary Big Bang, Clarke has originated his own vast and teeming futuristic universe.”—Sunday Times “Well-paced and absorbing . . . It is as a flight of fancy by the master of science fiction that 3001 makes its mark.”—The Times “In his exciting new novel, Clarke reveals the ominous answer about the ultimate purpose of the monoliths.”—Daily Telegraph “Serene, uplifting, and icy clear.”—Mail on Sunday “From the moment I picked it up, I couldn’t put it down. 3001 The Final Odyssey is a tour de force that finally answers the questions that sparked the imaginations of an entire generation.”—Buzz Aldrin

3001 Arthur Charles Clarke, 1998 One thousand years after the Jupiter mission to explore the mysterious Monolith had been destroyed, after Dave Bowman was transformed into the Star Child, Frank Poole drifted in space, frozen and forgotten, leaving the supercomputer HAL inoperable. But now Poole has returned to life, awakening in a world far different from the one he left behind—and just as the Monolith may be stirring once again . . . Copyright © Libri GmbH. 3001 Arthur Charles Clarke, 1998-02-01

Globalization and the Posthuman William S. Haney, 2009 Globalization and the Posthuman argues that by globalizing posthumanism through biotechnology, particularly through the invasive interface of humans and machines, we may well interfere with and even undermine the innate quality of human psycho-physiology and the experience of the internal observer, the non-socially constructed self or pure consciousness. Furthermore, many features of globalization in-and-of itself—such as the fall of public man, the exterritorialization of capital, the loss of an impersonal public world to localized communities based on emotively shared interests—combined with the posthuman expansion of biotechnology will diminish

our natural capacity to experience the self as knower and lead to an increase in global crime, sickness, accident rates and overall lack of harmony. The experience of the self comprises the unsayable secret of modern and postmodern literature and art, a secret that may soon become inaccessible if the world continues down the road of globalized infomania. The analysis of the consequences of globalization and the posthuman in this book is unique in that it will be the first to examine the interrelation between globalization, posthumanism and pure consciousness. Posthumanists define consciousness in a way that promotes the globalization of biotechnology without regard for its potential risks. This book explores the implications of the globalization of the posthuman model of consciousness. On the one hand, cognitive scientists tend to equate consciousness with subjectivity, which they associate with the thinking mind as an extension of the body, nature and culture; Eastern philosophy, on the other hand, distinguishes mind from consciousness, with mind defined as the content of consciousness. Bionic technology will have the effect of raising human metabolism and preventing the mind from settling down to the state of least excitation of consciousness. This book suggests that while conscious content is an indispensable aspect of both the human and posthuman condition, the thoughts, memories, feelings and perceptions of this content do not encompass a vital aspect of human nature attested to not only by the first-person experience of many millions of people around the world, but also by the records of both classical and modern contemplative traditions.

Core, A Novel Paul Preuss, 2014-01-25 "I have long admired Paul Preuss's work and for this reason was pleased when he expanded six of my short stories into the Arthur C. Clarke's Venus Prime series, which has been extremely successful. I wish him every success with his new novel." —Arthur C. Clarke "Paul Preuss is one of the rather few science fiction writers who really understand and appreciate science. He's also a fine writer by any other standard. In *Core* he gives us a story both exciting and thought provoking, filled with people we come to know about and care about." —Poul Anderson "What is the deepest hole which may be dug into the earth?" was first asked about 1947, not 1941, by Enrico Fermi. It can be found in University of Chicago Graduate Problems in Physics, with Solutions, from the University of Chicago Press. The catch is, it appears in the section of experimental problems, for which no solutions are given. To address it, one ought to know something about drilling techniques, materials, and the earth. When Byron Preiss challenged me with the question (he phrased it differently) around the time of the 125th anniversary of Jules Verne's *Journey to the Center of the Earth*, I knew next to nothing about any of these subjects. Besides spinning a yarn, nothing is more fun than research. The earth's magnetic field begins to collapse, leaving the planet unprotected against deadly cosmic rays and solar flares. Hundreds of thousands of men, women, and children suffer radiation burns and deaths, severe power disruptions, and communications blackouts. If the collapse continues, the ozone layer will be totally destroyed, setting loose plagues of cancer, sterility, mutations, birth defects, and worse. Scientists, scrambling to understand these savage new phenomena, ultimately realize that unless an answer is found quickly, all life on earth will be destroyed in a rapidly approaching apocalypse. Against this frighteningly

real near-future backdrop, Cyrus and Leiden Hudder—father and son, two of the world's great scientific minds, separated by an undying hatred and resentment—are brought together through the work of fiercely independent physicist Marta McDougal. Marta has developed one of the greatest technological breakthroughs of the age, a machine to bore through the earth's solid crust to reach its very center...but this invention is a two-edged sword. The ultimate weapon, it could be mankind's salvation—or its destruction! Packed with explosive action in a world poised on the brink of collapse, this high-tech masterpiece is Paul Preuss's finest achievement. Paul Preuss began his successful writing career after years of producing documentary and television films and writing screenplays. He is the author of twelve novels, including *Venus Prime*, Volumes 1, 2, and 3, and the near-future thrillers *Core*, *Human Error*, and *Starfire*. His non-fiction has appeared in *The Washington Post*, the *Los Angeles Times*, *New York Newsday*, and the *San Francisco Chronicle*. Besides writing, he has been a science consultant for several film companies. He lives in San Francisco, California.

The Publishers Weekly, 1998

The Complete Arthur C. Clarke's Space Odyssey Series Books 1-4 (2001: a Space Odyssey, 2010: Odyssey Two, 2061: Odyssey Three, 3001: the Final Odyssey) Arthur C. Clarke, 2000-09

Books Magazine, 1997

Exploring the Limits of the Human through Science Fiction Gerald Alva Miller Jr., 2012-12-04 Through its engagement with different kinds of texts, *Exploring the Limits of the Human through Science Fiction* represents a new way of approaching both science fiction and critical theory, and its uses both to question what it means to be human in digital era.

Arthur C. Clarke's Venus Prime 1 Paul Preuss, 2009-05-21 “[A] combination of mystery and science fiction almost reaching the level of Isaac Asimov’s classic *LIJE BALEY*—Daneel Olivaw novels.” —CHICAGO SUN TIMES Her code name is Sparta. Her beauty veils a mysterious past and abilities far surpassing those of a normal human. For she is more than human: Sparta is the first product of advanced biotech engineering. But now she is little more than a cipher to herself—crucial memories of the past three years are locked away in the dark recesses of her brain. When the crippled freighter *Star Queen* arrives at Venus Station with a lone survivor on board, Sparta must risk her life to investigate what really happened during its deadly voyage in space. She must solve this mystery even as she unlocks another—the truth behind her own identity . . . This tautly paced story brings together the genius of Arthur C. Clarke and Paul Preuss, whose work has been described by *The NEW YORK TIMES* as “Lively, intelligent . . . hard-driving.”

Popular Contemporary Writers Michael D. Sharp, 2005-10 Ninety-six alphabetically arranged author profiles include biographical information, critical commentary, and illustrations.

The Best Military Science Fiction of the 20th Century George R. R. Martin, Philip K. Dick, Anne McCaffrey, 2001-05-01 Explosive and provocative battles fought across the boundaries of time and space—and on the frontiers of the human mind.

Science fiction's finest have yielded this definitive collection featuring stories of warfare, victory, conquest, heroism, and overwhelming odds. These are scenarios few have ever dared to contemplate, and they include: "Superiority": Arthur C. Clarke presents an intergalactic war in which one side's own advanced weaponry may actually lead to its ultimate defeat. "Dragonrider": A tale of Anne McCaffrey's Dragonriders of Pern, in which magic tips the scales of survival. "Second Variety": Philip K. Dick, author of the short story that became the movie Blade Runner, reaches new heights of terror with his post-apocalyptic vision of the future. "The Night of the Vampyres": A chilling ultimatum of atomic proportions begins a countdown to disaster in George R. R. Martin's gripping drama. "Hero": Joe Haldeman's short story that led to his classic of interstellar combat, The Forever War. "Ender's Game": The short story that gave birth to Orson Scott Card's masterpiece of military science fiction. PLUS SEVEN MORE EPIC STORIES "Among Thieves" by Poul Anderson "Hangman" by David Drake "The Last Article" by Harry Turtledove "The Game of Rat and Dragon" by Cordwainer Smith "To the Storming Gulf" by Gregory Benford "Wolf Time" by Walter Jon Williams "The Scapegoat" by C. J. Cherryh Guaranteed to spark the imagination and thrill the soul, these thirteen science fiction gems cast a stark light on our dreams and our darkest fears—truly among the finest tales of the twentieth century.

Reading and Writing Sourcebook Robert A. Pavlik, Richard G. Ramsey, 2000 Program designed for struggling readers and provides direct reading and writing instruction using high interest literature.

English Novel Explication Peter L. Abernethy, 1976

Time Travelers Peter Haining, 1997

Who Shaped Science Fiction? Robert Sabella, 2000 This book combines the reading public's interest in science fiction with the always popular biography genre. The book contains one hundred concise chapters, each containing a brief biography of one of the most influential figures in the development of modern science fiction as well as a timetable detailing the highlights of the person's life and career. Included are important editors such as John Campbell Jr and Hugo Gernsback; filmmakers such as Gene Roddenberry and Stanley Kubrick; and most importantly, acclaimed writers ranging from historical figures Jules Verne, Edgar Allen Poe, Arthur Conan Doyle, and H G Wells to modern masters Arthur Clarke, Isaac Asimov, and Robert Heinlein.

Space Technology Joseph A. Angelo, 2003-06-30 A reference guide to current developments in space technology that discusses the social, political, and technical impacts of those developments on everyday life, both now and in the future.
