**Time in Our Times** Astrid Marie Holand, 2024-07-22 What is happening to perceptions of time, durability, and reality in the twenty-first century - and how do we deal with it? This anthology explores a diversity of uncommon insights about time, as seen from our historical and geographical standpoint. All contributions discuss how time can be seen, and how these views relate to changes in nature, technology, economy, working life, politics, religion, or philosophy specific to our own time. Findings are discussed within three themed sections; In Search of a Deeper Theory of Time, Time as Social Expectancy, and Time as Lived Experience. Contributions in this volume span from classical theory on branching time to personal experiences of drug-addicts' time. Together, these diverse contributions shed new light on how construction, perception and regulation of time influences a person's whole being in the world, collectively and individually, in the short and very long run, from the beginning of the Anthropocene to future cybertime.

*Genesis - Teacher's Manual PDF* Dr. Brian J. Bailey, 2020-01-21 When Christ was asked questions He would often refer people back to the beginning, to the origin of the plan of our Heavenly Father for His creation. In his commentary on the book of Genesis, Dr. Bailey shows how it is vital to understand God's intentions from the beginning in order to understand God's plan for mankind as well as the many spiritual truths that relate to the life of the believer today.

**Safe Trip to Eden** David Steinman, 2007-01-23 In his newest book, award-winning environmental journalist David Steinman makes sense out of the tangle of issues surrounding climate change. He provides clear, simple steps we can all take to make more responsible environmental choices in our everyday lives, from the food we put on our tables, to the products we use in our homes, and the cars we buy. He shows, for example, how changing even a simple habit of driving to the grocery store to ordering food online can save almost 900 miles a year, reducing both traffic congestion and petroleum emissions. Steinman traveled the country from his home base in California through the United States to talk with farmers, businessmen, professors, housewives, counter-terrorism experts and many others to find the link between environmentalism,

conservatism, patriotism and national security. He reveals how our reliance on petroleum-based products and chemical pesticides negatively impacts our health, our national security and our planet. He presents a number of fascinating anecdotes and case studies about people and companies working to live green — using ecological wisdom as the basis for their decision-making — in the process improving everything from their children's IQs to their company's bottom line.

**An Uncertain Cure** Cassandra White, 2009 In many cultures, leprosy elicits fear, stigma, and misunderstanding.

Historically, people affected by leprosy were banished or isolated from the rest of society. Although the worldwide incidence of leprosy has declined markedly over the past quarter century with the advent of new multidrug therapies, developing nations are still encountering a high number of cases. In *An Uncertain Cure*, Cassandra White goes deep into the shantytowns of Rio de Janeiro to give a riveting account of the contemporary leprosy experience among poor and working class Brazilians. In this ethnographic treatment of leprosy sufferers, White exposes the web of historical, socioeconomic, religious, and political forces that complicate the path to wellness and perpetuate high rates of infection. Drawing on nearly ten years of research, White shows how anthropological research can contribute to more effective treatment of chronic infectious diseases around the world.
