Abad-García, Mercedes,Altuna Urdin, Jon,Baelo Colmenero, Sandra,Belasko Txertudi, Maitane,Bully Garay, Paola,Dosil Santamaria, Maria,Flores Moncada, Lirio Gissela,Gartziarena San Policarpo, Mikel,Gorter, Durk,Idoiaga Mondragon, Nahia,Jaureguizar Alboniga Mayor, Joana,Langarika Rocafort, Argia,Lareki Arcos, Arkaitz,Leonet Sieso, Oihana,Lezcano Barbero, Fernando,Mariño Prieto, Lucía,Martínez Pérez, Alejandro,Menika Cornejo, Jugatx,Navarro Ugarteburu, Garazi,Roman Etxebarrieta, Gorka,Sáenz Arrizubieta, Elixabete,Sanz Manzanedo, Marta,Urquijo Arregui, Miren,Villardón Gallego, Lourdes,2021-04-01 La inclusión social es un concepto holístico que busca superar las barreras existentes y, a su vez, proveer las competencias necesarias para crear una participación comunitaria plena y empoderada. Ante este reto, el objetivo de este libro es explorar la intersección entre la inclusión socioeducativa y la comunicación. En una sociedad global, lingüísticamente diversa, donde la e-comunicación se está convirtiendo en una vía indispensable de comunicación, todavía sigue habiendo barreras comunicativas y retos específicos para crear una comunicación basada en la inclusión y nuestro fin será ahondar en todos ellos. ¡Hablemos en inclusión! es una obra plural que plantea nuevos interrogantes en torno a los retos comunicativos que nos lleven hacia un escenario social y educativo más inclusivo. Los autores de los capítulos son referentes en inclusión social, educación y comunicación y desde su experiencia, reflexión e investigación, han contribuido a otorgar un gran valor añadido a este libro. En definitiva, tenemos entre manos un manual básico para investigadores y profesionales así como para representantes de organismos institucionales y educativos que trabajan con el objetivo de superar las barreras comunicativas con la inclusión social y educativa como telón de fondo.

Se presentan 14 trabajos inéditos organizados en dos apartados: estudios relacionados con el nivel de bachillerato y universidad, en donde se abordan temas como las metas de vida, intereses vocacionales, motivación al logro, autorregulación, estrategias de aprendizaje, evaluación del trabajo en equipo, rendimiento académico, educación sexual y autoeficacia docente. El segundo apartado hace referencia a estudios realizados en estudiantes de nivel primaria y secundaria, abordando temas como actitudes hacia las TIC, uso de videojuegos en línea, acoso escolar, necesidades psicológicas básicas, discapacidad intelectual, particularmente se aborda un trabajo con padres de familia sobre sus emociones ante la educación en casa y otro con profesores sobre las experiencias de enseñanza, ambos en tiempos de pandemia. Presenting Your Data with SPSS Explained Perry R. Hinton,Isabella McMurray,2017-07-14 Data Presentation with SPSS Explained provides students with all the information they need to conduct small scale analysis of research projects using SPSS and present their results appropriately in their reports. Quantitative data can be collected in the form of a questionnaire, survey or experimental study. This book focuses on presenting this data clearly, in the form of tables and graphs, along with creating basic summary statistics. Data Presentation with SPSS Explained uses an example survey that is clearly explained step-by-step throughout the book. This allows readers to follow the procedures, and easily apply each step in the process to their own research and findings. No prior knowledge of statistics or SPSS is assumed, and everything in the book is carefully explained in a helpful and user-friendly way using worked examples. This book is the perfect companion for students from a range of disciplines including psychology, business, communication, education, health, humanities, marketing and nursing - many of whom are unaware that this extremely helpful program is available at their institution for their use.

Essential First Steps to Data Analysis Carol S. Parke,2013 The purpose of this book is to provide instruction and guidance on preparing quantitative data sets prior to answering a study's research questions. Preparation may involve data management and manipulation tasks, data organization, structural changes to data files, or conducting preliminary analysis such as examining the scale of a variable, the validity of assumptions or the nature and extent of missing data. The results from these essential first steps can also help guide a researcher in selecting the most appropriate statistical tests for his/her study. The book is intended to serve as a supplemental text in statistics or research courses offered in graduate programs in education, counseling, school psychology, behavioral sciences, and social sciences as well as undergraduate programs that contain a heavy emphasis on statistics. The content and issues covered are also beneficial for faculty and researchers who are knowledgeable about research design and able to use a statistical software package, but are unsure of the first steps to take with their data. Increasingly, faculty are forming partnerships with schools, clinics, and other institutions to help them analyze data in their extensive databases. This book can serve as a reference for helping them get existing data files in an

appropriate form to run statistical analysis. This book is not a replacement for a statistics textbook. It assumes that readers have some knowledge of basic statistical concepts and use of statistical software, or that they will be learning these concepts and skills concurrently throughout the course. SPSS was chosen to illustrate the preparation, evaluation, and manipulation of data. However, students or researchers who do not use SPSS will benefit from the content since the overall structure and pedagogical approach of the book focuses heavily on the data issues and decisions to be made.
