Roger Ebert's Movie Yearbook 2003 Roger Ebert,2002-12-02 Every single new Ebert review.

World Film Locations: Malta Jean Pierre Borg,Charlie Cauchi,2015-12-01 Malta has served as a beautiful backdrop for films for nearly as long as there has been a film industry. This entry in the World Film Locations series traces the history of Malta on screen, from bigbudget blockbusters to modest indie pictures. The locations Malta offers range widely, from grand fortified harbours and stunning cliffs to quaint villages and Baroque palaces. That diversity has enabled the island to double for countless locations, including ancient Troy and Alexandria, as well as Greece, Israel, and other Mediterranean and Middle Eastern regions, while its well-known water tanks have proved to be perfect for shooting ocean scenes. Packed with illustrations, World Film Locations: Malta examines a number of films made in Malta, and will be a must-read for tourists, film buffs and scholars alike.

The Encyclopedia of Epic Films Constantine Santas,James M. Wilson,Maria Colavito,Djoymi Baker,2014-03-21 Soon after film came into existence, the term epic was used to describe productions that were lengthy, spectacular, live with action, and often filmed in exotic locales with large casts and staggering budgets. The effort and extravagance needed to mount an epic film paid off handsomely at the box office, for the genre became an immediate favorite with audiences. Epic films survived the tribulations of two world wars and the Depression and have retained the basic characteristics of size and glamour for more than a hundred years. Length was, and still is, one of the traits of the epic, though monolithic three- to four-hour spectacles like *Gone with the Wind* (1939) and *Lawrence of Arabia* (1962) have been replaced today by such franchises as the Harry Potter films and the Lord of the Rings trilogy. Although the form has evolved during many decades of existence, its central elements have been retained, refined, and modernized to suit the tastes of every new generation. The Encyclopedia of Epic Films identifies, describes, and analyzes those films that meet the criteria of the epic—sweeping drama, panoramic landscapes, lengthy adventure sequences, and, in many cases, casts of thousands. This volume looks at the wide variety of epics produced over the last century—from the silent spectacles of D. W. Griffith and biblical melodramas of Cecil B. DeMille to the historical dramas of David Lean and rollercoaster thrillers of Steven Spielberg. Each entry contains: Major personnel behind the camera, including directors and screenwriters Cast and character listingsPlot summaryAnalysisAcademy Award wins and nominationsDVD and Blu-ray availabilityResources for further study This volume

also includes appendixes of foreign epics, superhero spectaculars, and epics produced for television, along with a list of all the directors in the book. Despite a lack of overall critical recognition and respect as a genre, the epic remains a favorite of audiences, and this book pays homage to a form of mass entertainment that continues to fill movie theaters. The Encyclopedia of Epic Films will be of interest to academics and scholars, as well as any fan of films made on a grand scale.
