Paris 1937 James D. Herbert, 2018-10-18 This elegant and theoretically informed book, illustrated with forty-five photographs, explores the cultural significance of six exhibitions or new museum installations, all opening in Paris between mid-1937 and early 1938: the commercially oriented world's fair titled L'Exposition Internationale des Arts et Techniques; the historical Musée des Monuments Français; the ethnographic Musée de l'Homme; two massive art retrospectives, one sponsored by the state of France and the other by the municipality of Paris; and L'Exposition Internationale du Surréalisme. James D. Herbert capitalizes on the proximity of these disparate exhibits to show how they competed with and yet also complemented one another in visually rendering the full scope of human accomplishment through time and across the globe. In this task, Herbert argues, they both succeeded and failed in interesting and productive ways. He asserts that the exhibitions projected and, in a sense, created (created precisely through the act of projection) the real world that they ostensibly only represented. In fact, Herbert argues, the exhibitions developed a particular sense of French national identity—one that, in managing to be at the same moment both inwardly focused and beneficently expansive, would present a vivid contrast to the growing German nationalism of the Third Reich. His epilogue takes a final look at these issues from the perspective of Jean Cocteau's 1950 film *Orphée*. A ground-breaking work in cultural history, *Paris 1937*, with its insightful examination of objects from a variety of fields, is a pioneering text in the field of visual studies.

*Great Exhibitions* Robert Wilson, 2007 A lively presentation of the great world's fairs - their histories, basic building architecture, highlights of decorative arts, medals, high points - tastefully illustrated

Grand Illusion Karen Fiss, 2009 Franco-German cultural exchange reached its height at the 1937 Paris World's Fair, where the Third Reich worked to promote an illusion of friendship between the two countries. Through the prism of this decisive event, *Grand Illusion* examines the overlooked relationships among Nazi elites and French intellectuals. Their interaction, Karen Fiss argues, profoundly influenced cultural production and normalized aspects of fascist ideology in 1930s France, laying the groundwork for the country's eventual collaboration with its German occupiers. Tracing related developments across fine arts, film, architecture, and mass pageantry, Fiss illuminates the role of National Socialist propaganda in the French decision to ignore Hitler's war preparations and pursue an untenable policy of appeasement. France's receptiveness toward Nazi culture, Fiss contends, was rooted in its troubled identity and deep-seated insecurities.

With their government in crisis, French intellectuals from both the left and the right demanded a new national culture that could rival those of the totalitarian states. By examining how this cultural exchange shifted toward political collaboration, *Grand Illusion* casts new light on the power of art to influence history.

*World Fairs and the Global Moulding of National Identities*, 2021-11-01 This volume examines the role of the broad variety of international exhibitions between 1851 and 1958 in two programmatic essays and twelve case studies, covering not just France and the United States, but also, among others, Sweden, Romania, Colombia, Japan and the nascent European Community. World fairs were global platforms for the construction of national identities. The mix of national self-profiling and commercial exoticism turned the nation into a “brand”, while reframing the nation-state from its nineteenth-century positioning amidst neighbouring enemies towards being a competitor in a global, consumer-oriented trade and entertainment economy. By presenting national identities in “banal” form as feelgood factors, world fairs helped the nation to maintain its grassroots appeal across the century of totalitarianism and internationalism. Contributors are: Joep Leerssen, Eric Storm, Florian Groß, Anthony Swift, Cosmin Minea, Claire Hendren, Taka Oshikiri, Robert W. Rydell, Sven Schuster, Miriam Oesterreich, Bartosz Dziewanowski-Stefańczyk, Christina Romlid, Jonathan Voges, and Anastasia Remes.

Latin America and the World's Fairs, 1867-1939 Paula Bruno, Sven Schuster, 2025-07-14 This book examines the World's Fairs that took place from the mid-nineteenth century to the 1930s, with a particular emphasis on Latin America. It introduces the notion of cultural world maps to understand these events as reflections of the global landscape. The fairs played a crucial role in showcasing state and private endeavors, shaping identities, facilitating knowledge exchange, and disseminating objects and ideas. Through innovative approaches, the essays in *Latin America and the World's Fairs, 1867-1939* depart from conventional nation-centric accounts, drawing on insights from cultural history, global and comparative history, as well as exhibition studies. This volume will be of value to students, scholars, as well as general readers interested in Latin American history and social and cultural history.

*World's Fairs on the Eve of War* Robert H. Kargon, Karen Fiss, Morris Fraser Low, Arthur P. Molella, 2015-11-11 Since the first world's fair in London in 1851, at the dawn of the era of industrialization, international expositions served as ideal platforms for rival nations to showcase their advancements in design, architecture, science and technology, industry, and politics. Before the outbreak of World War II, countries competing for leadership on the world stage waged a different kind of war—with cultural achievements and propaganda—appealing to their own national strengths and versions of modernity in the struggle for power. *World's Fairs on the Eve of War* examines five fairs and expositions from across the globe—including three that were staged (Paris, 1937; Dusseldorf, 1937; and New York, 1939-40), and two that were in development before the war began but never executed (Tokyo, 1940; and Rome, 1942). This coauthored work considers representations of science

and technology at world's fairs as influential cultural forces and at a critical moment in history, when tensions and ideological divisions between political regimes would soon lead to war.

*France on Display* Shanny Peer,1998-02-26 Winner of the 1999 Laurence Wylie Prize in French Cultural Studies presented by the Association for French Cultural Studies The 1937 Paris World's Fair presented a traditionalist image of France as a rural, provincial country, faithful to its folk traditions and to its Old World heritage. France's attachment, well into the twentieth century, to its traditionalist roots has often been interpreted by scholars as a reactionary impulse, a desire to resist modernization or a wish to return to the past. However, in this book Peer argues that this enduring attachment in Third Republic France to peasants, provincials, and folklore was not inherently reactionary or anti-modernist. Instead, these aspects of France's traditional heritage were refashioned in new ways to allow France to modernize while still retaining its distinctive identity.

*Placing Internationalism* Stephen Legg, Mike Heffernan, Jake Hodder, Benjamin Thorpe, 2021-11-04 Exploring how modern internationalism emerged as a negotiated process through international conferences, this edited collection studies the spaces and networks through which states, civil society institutions and anti-colonial political networks used these events to realise their visions of the international. Taking an interdisciplinary approach, contributors explore the spatial paradox of two fundamental features of modern internationalism. First, internationalism demanded the overcoming of space, transcending the nation-state in search of the shared interests of humankind. Second, internationalism was geographically contingent on the places in which people came together to conceive and enact their internationalist ideas. From Paris 1919 to Bandung 1955 and beyond, this book explores international conferences as the sites in which different forms of internationalism assumed material and social form. While international 'permanent institutions' such as the League of Nations, UN and Institute of Pacific Relations constantly negotiated national and imperial politics, lesser-resourced political networks also used international conferences to forward their more radical demands. Taken together these conferences radically expand our conception of where and how modern internationalism emerged, and make the case for focusing on internationalism in a contemporary moment when its merits are being called into question.

**Mies Van Der Rohe** Dietrich Neumann, 2024-09-24 A landmark survey, offering a nuanced and deeply researched account of the career and life of the iconic modern architect Ludwig Mies van der Rohe (1886-1969) was a German-born American architect and designer whose work in Europe and North America has had an enduring influence on modern and contemporary architecture worldwide. During his sixty-year career, he fundamentally rethought architectural types that shaped modern life, including the office building, apartment building, and private home. True to his alleged dictum less is

more, Mies van der Rohe's style is characterized by utmost simplicity, elegance of materials, and radical formal and functional innovation, as exemplified by such iconic projects as the Farnsworth House in Plano, Illinois, and the Seagram Building in New York. In this book, renowned architectural historian Dietrich Neumann presents a new, critical look at Mies and complicates the established narrative about him. Diverging from the reverential posture of many existing accounts, Neumann insists on the importance of the contemporary context--social, political, and architectural--for understanding the architect's life and work. The book draws on many overlooked archival and primary sources to demonstrate how and why Mies's designs were shaped and received, foregrounding contemporary critics' responses and the work of Mies's collaborators and peers. It presents several previously unknown buildings, projects, and furniture designs and challenges long-established interpretations of key works. Comprehensively illustrated and covering the entirety of Mies's career, this ambitious book is the most substantial account to date of the life and work of one of the most important architects of the twentieth century.
