Sounds, Societies, Significations Rima Povilionienė, 2017-01-10 This edited book covers many topics in musicological literature, gathering various approaches to music studies that encapsulate the vivid relation music has to society. It focusses on repertoires and geographical areas that have not previously been well frequented in musicology. As readers will see, music has many roles to play in society. Music can be a generator of social phenomena, or a result of them; it can enhance or activate social actions, or simply co-habit with them. Above all, music has a stable position within society, in that it actively participates in it. Music can either describe or prescribe social aspects; musicians may have a certain position/role in society (e.g., the “popstar” as fashion leader, spokesman for political issues, etc.). Depending on the type of society, music may have a certain “meaning” or “function” (music does not mean the same thing everywhere in the world). Lastly, music can define a society, and it is not uncommon for it to best define a particular historical moment. Case-studies in this work provide visibility for musical cultures that are rarely exposed in the dominant musicological discourse. Several contributions combine musicological analysis with insider-musician points of view. Some essays in the collection address the cultural clash between certain types of music/musicians and the respective institutional counterparts, while certain contributing authors draw on experimental research findings. Throughout this book we see how musics are socially significant, and - at the same time - that societies are musically significant too. Thus the book will appeal to musicologists, cultural scholars and semioticians, amongst others.

Aprendizaje, composición y emplazamiento en el proyecto de arquitectura Germán Darío Correal, Otros, 2015-08-01 En este libro se abordan tres aspectos que están presentes en el proceso de formación y ejercicio profesional de los arquitectos:

el aprendizaje, la composición y el emplazamiento. En el primer apartado se presentan algunas consideraciones pedagógicas y didácticas, así como también aspectos asociados al análisis y a la estrategia de aprendizaje. El segundo apartado pone en diálogo dos aproximaciones a la composición arquitectónica; la primera indaga por la analogía como estrategia de aprendizaje y la segunda por la tipología, como una sintaxis entre relaciones formales y relaciones sociales. El tercer apartado da cuenta del emplazamiento bajo dos miradas: la primera presenta la relación entre composición y emplazamiento como proceso de creación y re-creación a partir de la transformación, y la segunda presenta la tensión existente entre la determinación formal y las cuestiones tipológicas. El libro concluye con una aproximación experimental, en la cual se recogen ejemplos de la aplicación, en el aula, de los instrumentos didácticos considerados en la aproximación teórica.

Pensar a arquitetura Peter Zumthor, 'A construção é a arte de formar um todo com sentido a partir de muitas partes. Os edifícios são testemunhos da capacidade humana de construir coisas concretas. O verdadeiro núcleo de qualquer tarefa arquitectónica encontra-se, no meu entender, no acto de construir. É aqui, onde os materiais concretos são reunidos e erigidos, que a arquitectura imaginada se torna parte do mundo real.' Peter Zumthor Este livro compila diversos textos de Peter Zumthor, cujo valor reside na reflexão que acompanha a intensidade da sua obra. Escritos ao longo de dez anos, estes textos constituem um raro e valioso testemunho do pensamento do mestre suíço.
