La formación en línea del profesorado de educación básica en México. Graciela Cordero Arroyo, 2023-02-20 Con la llegada de la pandemia en el año 2020, se dio la masificación de la formación continua de los profesores de educación básica en México en la modalidad en línea. La presente obra brinda una aproximación a la evolución de esta modalidad de formación, tanto que se ha ofertado de manera autoadministrable como en la que se imparte por las instancias formadoras y que cuentan con un facilitador que acompaña el proceso de aprendizaje. La obra presenta cuatro estudios, la aproximación cualitativa de los estos permite reconocer aciertos y retos de la formación en línea, se identifican desafíos en cuanto a la implementación y diseño, los cuales animan a pensar y buscar alternativas para la formación de profesores en México.

Métodos y proyectos transdigitales, 2022-12-04 Está ampliamente extendida la idea entre la comunidad científica, como entre la población en general, sobre el hecho de que la tecnología digital está influyendo irreversiblemente en casi todos los ámbitos sociales. A veces, esta influencia es disruptiva, llamativa y pomposa. Otras veces, en cambio, se filtra suave, subrepticia y silenciosamente entre las actividades más cotidianas. En cualquier caso, sus resultados son, a la vez, prometedores y desafiantes. No es inútil repetir que la aparición de la pandemia por COVID-19 nos ofreció la oportunidad de observar con atención lo anterior. Principalmente, el periodo de confinamiento nos obligó a realizar las tareas más habituales con un uso inédito de la tecnología digital. Por ejemplo, laborar, estudiar, divertirnos o simplemente informarnos sobre el curso de esta contingencia sanitaria, fueron actividades transversalmente influidas por aplicaciones digitales, por dispositivos electrónicos y software especializado. Uno de los resultados de ese periodo inédito en la historia de la humanidad fue que aprendimos a hacer las cosas de manera distinta, o sea, creamos métodos de trabajo, estudio, ocio, etcétera, innovadores. El otro resultado fue que esta situación catalizó proyectos muy concretos para resolver problemas de empleo, educativos o de esparcimiento. Por eso, tras el periodo de confinamiento por la pandemia por COVID-19 estamos ante la oportunidad preciada de registrar cuáles fueron los principales problemas de las personas y con qué métodos se resolvieron, si ese fue el caso. O qué proyectos inspiraron tal condición de aislamiento y tecnologización. El libro Métodos y proyectos transdigitales tiene por objetivo registrar algunos casos relevantes donde el ingenio, el conocimiento especializado o la colaboración resolvieron problemas sentidos entre las comunidades productivas, educativas, gubernamentales o de la organización civil. Saber qué sucedió en estos ámbitos durante el periodo de confinamiento social es relevante para entender

qué papel tiene la tecnología digital en la solución de problemas de nuevo cuño, pero también problemas crónicos.

Teachers' Research in Language Education Verónica Sánchez Hernández, Fatima Encinas, José Luis Ortega-Martin, Yonatan Puon, 2021-07-23 Over the past decade, interest in language teacher education and professionalization programs has increased significantly mainly due to global educational reforms, which have been driven by internationalization, multilingualism, the rise of new literacy and the incorporation of technologies. These reforms, based on the challenges of knowledge societies and networks, have created the need to re-evaluate and reconceptualize teacher training and teacher professional development as a fundamental connection to teaching (Bryant et al., 2008; Vélaz de Medrano & Vaillant, 2009; Espinosa, 2012; Johnson and Golombeck, 2018). The main objective is, then, to “prepare the new generations within an increasingly uncertain and demanding global scenario” (Pérez Ruíz, 2014, p 114). This publication addresses work on the education of language teachers in a variety of sociocultural, educational and institutional contexts carried out in Mexico and Latin America with various methodological designs and approaches from different theoretical perspectives. Therefore, in the context of current challenges, we seek to promote the exchange, discussions of experience and results of research and reflection that can influence the direction and implementation of language policies regarding teacher education and teacher professionalization for language teaching.

Engaging Minds, Empowering Voices: English Language Teaching for the Future Sandra Inés Trujillo Juárez, 2025-05-28 Engaging Minds, Empowering Voices: English Language Teaching for the Future explora cómo la enseñanza del inglés debe adaptarse a las nuevas realidades globales y digitales, integrando perspectivas psicológicas, culturales y tecnológicas. El libro destaca la importancia de conectar los contenidos con las experiencias y culturas de los estudiantes, fomentando la empatía y el sentido de comunidad. Promueve el uso de narrativas personales y tecnología para potenciar la motivación y el aprendizaje auténtico. Además, aborda la necesidad de aulas inclusivas y el desarrollo de competencias digitales, preparando a los estudiantes para un mundo interconectado y diverso, y empoderando tanto a docentes como a aprendices para enfrentar los retos del futuro.

No hay, sin embargo, mucha claridad sobre el objeto central del debate. Lo que se puede decir con precisión es que el gobierno federal encabezado por Andrés Manuel López Obrador impulsó, desde 2021, no una reforma, sino una transformación radical de la educación básica de México, con el argumento

de que la educación anterior era neoliberal y estaba atada a una lógica de intereses privados. En esta obra colectiva, Gilberto Guevara Niebla y José Navarro Cendejas reúnen a expertos en distintos campos que aportan un panorama descriptivo y analítico de la educación básica en México, con especial énfasis en sus problemáticas y deficiencias. Al borde del abismo tiene como finalidad brindar los elementos para ampliar el debate sobre la pertinencia de la ejecución de la reforma curricular de 2022 en un contexto como el que aquí se presenta. «La educación es un derecho universal consagrado en la Constitución que el Estado garantiza, pero para atender ese derecho ¿el gobierno federal puede impartir cualquier tipo de educación?»

Población inmigrante Estela Flores Ramos, 2005 Se proponen estrategias de integración en España de la población inmigrante desde la perspectiva de la educación. Además de tratar los aspectos académicos, instructivos y curriculares, tanto para niños como para adultos, se incide también en problemas básicos como los laborales, el alojamiento, la regularización, etc.
