Intervención, gestión e innovación educativa : desafíos teóricos y metodológicos ,2025-10-30 El libro Intervención, gestión e innovación educativa: desafíos teóricos y metodológicos es resultado del trabajo colectivo generado en el marco del Seminario de Intervención, Gestión e Innovación Educativa (SIGIE), una iniciativa académica impulsada por la División de Estudios de Posgrado de la Facultad de Ciencias de la Educación y Humanidades (FCEH) de la Universidad Autónoma de Tamaulipas. Esta obra representa mucho más que una compilación de textos: constituye la expresión tangible de una experiencia pedagógica situada, orientada a fortalecer las trayectorias formativas de estudiantes de maestría y doctorado mediante la participación en procesos reales de gestión, producción y divulgación científica. Los 11 capítulos que conforman esta obra derivan de las presentaciones realizadas en el SIGIE a lo largo de su primer año y medio de funcionamiento. Cada texto refleja no sólo los avances de investigación de sus autores, sino también una forma de concebir la práctica investigativa como un proceso colaborativo, situado y éticamente comprometido. Plant Diversity and Ecology in the Chihuahuan Desert Maria C. Mandujano,Irene Pisanty,Luis E.

Eguarte,2020-07-18 Environmental and specific diversity in the Chihuahuan desert in general, and in the Cuatro Ciénegas Basin in particular, has long been recognized as outstanding. This book provides a global ecological overview, together with in-depth studies of specific processes. The Chihuahuan desert is the warmest in North America, and has a complex geologic,

climatic and biogeographical history, which affects today's distribution of vegetation and plants and generates complex phylogeographic patterns. The high number of endemic species reflects this complex set of traits. The modern distribution of environments, including aquatic and subaquatic systems, riparian environments, gypsum dunes and gypsum-rich soils, low levels of phosphorous and organic matter, and high salinity combined with an extreme climate call for a range of adaptations. Plants are distributed in a patchy pattern based on punctual variations, and many of them respond to different resources and conditions with considerable morphological plasticity. In terms of physiological, morphological and ecological variability, cacti were identified as the most important group in specific environments like bajadas, characterized by high diversity values, while gypsophytes and gypsovagues of different phylogenies, including species with restricted distribution and endemics.

Ritual Human Sacrifice in Mesoamerica Rubén G. Mendoza,Linda Hansen,2024-03-01 This edited volume addresses the environmental and cultural underpinnings of the kind of social conflict that spawned the origins and elaboration of ritualized human and animal sacrifice in Mesoamerica. The chapters variously document the place of cultural evolution and social complexity in the origins and elaboration of ritual human sacrifice, cannibalism, and trophy-taking across a broad spectrum of Mesoamerican cultural and social contexts that first saw the light of day before 2600 BCE, and rapidly developed and proliferated across the Mesoamerican world in the centuries to follow. They study the developments in sacrifice rituals through the centuries into the first millennium CE, when the Mexica Aztec and their allies had elevated ritual human sacrifice such that they produced a plethora of sacrificial acts, modes and manners of death, and associated deities to articulate the necro-cultures and blood-tribute of the times. The chapters further study present-day rites of Amerindian communities from throughout Mesoamerica that include paying homage to the deities of earth and sky through sacrifice and consumption of animal surrogates. The interdisciplinary effort undertaken by this international cadre of scientists, including anthropologists, bioarchaeologists, art historians, ethnohistorians, iconographers, and religious studies experts provides a particularly rich forum for launching an interrogation into the role of conflict, environment, and social complexity in the emergence and persistence of ritual violence and human sacrifice in the Mesoamerican world.
