**The Archetypes and the Collective Unconscious** Carl Gustav Jung, R. F. C. Hull, 1991 The concept of 'Archetypes' and the hypothesis of 'A Collective Unconscious' are two of Jung's better known and most exciting ideas. In this volume - taken from the Collected Works and appearing in paperback for the first time - Jung describes and elaborates the two concepts. Three essays establish the theoretical basis which are then followed by essays on specific archetypes. The relation of these to the process of individuation is examined in the last section. The Archetypes and the Collective Unconscious is one of Jung's central works. There are many illustrations in full colour.

*Chapter 1. From Carl Gustav Jung's Archetypes Of The Collective Unconscious To Individual Archetypal Patterns* Andrey Davydov, Olga Skorbatyuk, 2014-09-21 All suppositions presented in this article have been moving us to better understanding the contents of the unconscious stratum of human psyche, the ones which happen to be completely independent either from each other or racial or social factors. Even if we were to accept Jung's theory of dividing man's psyche we think it would be his personal unconscious, which contains some very definite individual structure or system meant to define his personal psychological and physiological characteristics because the unconscious sphere of one's psyche directly controls many physiological reactions. The personal unconscious should be able to tell everything of one's personality not by examining it through its collective values, but in the light of its individual archetypes. It should be able to explain everything about a person with respect to his individual perception of the world and of himself, his purpose, his behavior both in the social and natural environment, his strategies and tactics, his way of thinking, his unconscious motivations, his needs, emotions, inclinations, preferences, meaning of his existence, etc. After reviewing both our practical and theoretical research, and focusing on Jung's theory as to the influence of the collective unconscious on individual human psyche, it would be essential to examine this issue from the standpoint of the psychology of individual distinctions. It's obvious that without finding individual archetypal patterns as the basis for human personality, solving any individual or social-collective problems wouldn't be possible since any society consists of individuals constantly affecting one another. **Jungian Archetypes** Robin Robertson, 2016-06-28 Twenty-five hundred years ago, Pythagoras taught that the simple

counting numbers are the basic building blocks of reality. A century and a half later, Plato argued that the world we live in is but a poor copy of the world of ideas. Neither realized that their numbers and ideas might also be the most basic components of the human psych: archetypes. This book traces the modern evolution of this idea from the Renaissance to the 20th century, leading up to the archetypal hypothesis of psychologist C. G. Jung, and the mirroring of mathematical ideas of Kurt Gödel.

**Four Archetypes** C.G. Jung, 2014-12-18 The concept of the archetype is crucial to Jung's radical interpretation of the human mind. Jung believed that every person partakes of a universal or collective unconscious that persists through generations. The origins of the concept can be traced to his very first publication in 1902 and it remained central to his thought throughout his life. As well as explaining the theoretical background behind the idea, in *Four Archetypes* Jung describes the four archetypes that he considers fundamental to the psychological make-up of every individual: mother, rebirth, spirit and trickster. Exploring their role in myth, fairytale and scripture, Jung engages the reader in discoveries that challenge and enlighten the ways we perceive ourselves and others.

*Four Archetypes* Carl Gustav Jung, 1986 A central concept of Jung's psychology, the archetype can be expressed in many ways: in primitive tribal lore; in myth and fairytale; in dreams and visions. The essays in this book describe four specific archetypes.

**Four Archetypes** C. G. Jung, 2010-11-14 Reprint. Originally published: 1959; 1st Princeton/Bollingen pbk. ed. published: 1970.

**Archetype** Anthony Stevens, 1990 C.G. Jung's archetypes of the collective unconscious have until now remained the property of analytical psychology, and been commonly dismissed as mystical by scientists. But Jung himself described them as biological entities, which have evolved through natural selection, and which, if they exist at all, must be amenable to empirical study. In the work of Bowlby and Lorenz, and in the recent studies of the bilateral brain, Dr Anthony Stevens has discovered the key to opening up this long-ignored scientific approach to the archetype, originally envisaged by Jung himself. Through the cross-fertilisation of disciplines, psychiatry can be integrated with psychology, with ethology and biology. The result is an enriched science of human behaviour.

**Jungian Archetypal Psychology Made Easy** Charles Bebeau, Elizabeth Cox, Theresa Bauer LPC, 2004-08-03 Does Jungian Psychology intrigue you, but you're not sure how to apply it to your life or therapeutic practice if you are a therapist? This book written by Theresa Bauer, LPC, CAC III and Elizabeth Cox, M.A. outlines theories and techniques developed by Charles Bebeau, Ph.D. of the Avalon Jungian Archetypal Institute in Boulder, Colorado. Dr. Bebeau developed his theory of the full maturation process of the individual through 12 archetypes and the alchemical process based on Carl Jung's work. There are 24 color illustrations of the archetypes. Astrology is the oldest art practiced by ancient people, including the

Hebrews. It was originally part of alchemy and studied extensively by Carl Jung. Dr. Bebeau has refined this work and made it possible to pick out your ruling archetypes using an astrological chart. We all have 4-5-6 ruling archetypes making us unique individuals. The last section of the book explains how to do this, but for the people who don't understand astrology or want to, it is possible to gain an understanding of the archetypes and alchemical process in the first 3 sections of the book. This book will help you gain an understanding of yourself and others.

Complex/Archetype/Symbol in the Psychology of C.G. Jung Jolande Jacobi, 2020-05-05 As an associate of C. G. Jung for many years, Jolande Jacobi is in a unique position to provide an interpretation of his work. In this volume, Dr. Jacobi presents a study of three central, interrelated concepts in analytical psychology: the individual complex, the universal archetype, and the dynamic symbol.

*Archetype Revisited* Anthony Stevens, 2004-07-31 Archetype: A Natural History of the Self, first published in 1982 was a ground-breaking book; the first to explore the connections between Jung's archetypes and evolutionary disciplines such as ethology and sociobiology, and an excellent introduction to the archetypes in theory and practical application as well. C.G. Jung's 'archetypes of the collective unconscious' have traditionally remained the property of analytical psychology, and have commonly been dismissed as 'mystical' by scientists. But Jung himself described them as biological entities, which, if they exist at all, must be amenable to empirical study. In the work of Bowlby and Lorenz, and in recent studies of the bilateral brain, Dr Anthony Stevens has discovered the key to opening up this long-ignored scientific approach to the archetypes, originally envisaged by Jung himself. At last, in a creative leap made possible by the cross-fertilisation of several specialist disciplines, psychiatry can be integrated with psychology, with ethology and biology. The result is an immensely enriched science of human behaviour. In this revised, updated edition, Anthony Stevens considers the enormous cultural, social and intellectual changes that have taken place in the past 20 years, and includes: \* An updated chapter on The Archetypal Masculine and Feminine, reflecting recent research findings and developments in the thinking of feminists \* Commentary on the intrusion of neo-Darwinian thinking into psychology and psychiatry \* Analysis of what has happened to the archetype in the past 20 years in terms of our understanding of it and our responses to it

**Mythos and Logos in the Thought of Carl Jung** Walter A. Shelburne, 1988-07-08 The author explores and defends the bold thesis that the idea of the collective unconscious can be reconciled with a scientific world outlook as he sketches a big picture from Jung's psychological viewpoint. In his examination of Jung's archetypes, Shelburne considers the chief critical views of the scientific import of Jung's thesis as he discusses the issue of rationality posed by the theory. There is also a discussion of how the ideas of James Hillman contrast with those of Jung on the issue of the scientific nature of archetypes. Shelburne presents scientific evidence for the existence of archetypes and shows how the theory fits in with modern evolutionary biology.

**Carl Jung, Darwin of the Mind** Thomas T. Lawson, 2018-05-08 Carl Jung, Darwin of the Mind is a review and an explanation of Jung's thought set in an evolutionary context. Jung explored the human psyche throughout his long life. His writings, of astonishing scope and depth, elaborate on imagery that can be found in rituals, myths and fables worldwide as well as in the dreams, visions and fantasies of his patients and himself. Jung pursued common threads of meaning to the point of becoming deeply versed in the esoterica of Eastern mysticism, Gnosticism, and alchemy. Taken collectively, Jung's works develop a coherent theory about how the psyche is constructed, including an idea of how consciousness emerged as a part of it. The author demonstrates that Jung's concept of a collective unconscious structured by archetypes meshes well with accepted views of evolution and can be squared with the most rigorous science of today. So taken, Jung's work is of unrivaled explanatory power and opens new vistas for understanding who we are and how we function.

Mythos and Logos in the Thought of Carl Jung Walter A. **Four Archetypes** C. G. Jung, 2012-01-12 One of Jung's most influential ideas has been his view, presented here, that

primordial images, or archetypes, dwell deep within the unconscious of every human being. The essays in this volume gather together Jung's most important statements on the archetypes, beginning with the introduction of the concept in *Archetypes and the Collective Unconscious*. In separate essays, he elaborates and explores the archetypes of the Mother and the Trickster, considers the psychological meaning of the myths of Rebirth, and contrasts the idea of Spirits seen in dreams to those recounted in fairy tales. This paperback edition of Jung's classic work includes a new foreword by Sonu Shamdasani, Philemon Professor of Jung History at University College London.

The Archetypal Symbolism of Animals Barbara Hannah, 2006 This volume presents Barbara Hannah's Jung Institute lectures of 1954-58. In these profound talks, she speaks of the archetypal symbolism of seven animals--cat, dog, horse, serpent, lion, bull, and cow--discussing their roles in the psychological and cultural life of the West.

Ego and Archetype Edward F. Edinger, 2017-02-28 A medical psychiatrist and founding member of the Jung Foundation explores a pivotal part of analytical psychology: encountering the self through individuation This book is about the individual's journey to psychological wholeness, known in analytical psychology as the process of individuation. Edward Edinger traces the stages in this process and relates them to the search for meaning through encounters with symbolism in religion, myth, dreams, and art. For contemporary men and women, Edinger believes, the encounter with the self is equivalent to the discovery of God. The result of the dialogue between the ego and the archetypal image of God is an experience that dramatically changes the individual's worldview and makes possible a new and more meaningful way of life.

*Mid-life Spirituality and Jungian Archetypes* Janice Brewi, Anne Brennan, 1999 Brewi and Brennan use a blend of Christianity with Jungian psychology to address four stages of the mid-life process: the archetypal perspective, the task of coming to terms with the shadow personality, working with the inner child, so that the child can lead the adult into this new stage of living, and exploring Wisdom, the fruit of living.

**Jung and Feminism** Demaris S. Wehr, 2015-12-14 Jung, in contrast to Freud, has typically been considered more sympathetic to women largely because of his emphasis on the feminine as a way of being in the world and on the 'anima', the unconscious feminine aspect of male personality. Feminists, however, have viewed Jung's whole notion of the 'feminine' with suspicion, seeing it as a projection of male psyche and not an authentic understanding of female humanity. For Demaris Wehr both feminism and Jungian psychology have been guiding forces, and in this book, originally published in 1988, she mediates between feminists and classical Jungians - two groups historically at odds. She faces squarely the male-centred assumptions of some Jungian concepts and challenges Jung's claims for the universality and purely empirical basis of his work, but nevertheless maintains an appreciation for the value of Jung's understanding of human nature and the process of individuation. By bringing the insights of feminist theology to bear on the seemingly unbridgeable gap between analytical psychology and feminism, she succeeds in reclaiming Jungian psychology as a freeing therapy for women and reveals it as

the ultimately liberating vision its founder intended it to be.
