Books Come Alive William Teale, Miriam G. Martinez, Junko Yokota, 2021-07-15 Books Come Alive: Reading Aloud and Reading Along with Young Children is about using read alouds to promote empathy and the ability to think deeply in response to literature. Grounded in research and theory, the book explores how to ensure that read alouds have maximum instructional value to promote literacy and spark children's lifelong love of literature. This book offers teachers information about book selection, how to plan for and conduct read alouds, and extend children's experiences. The book also includes a vetted and extensive compendium of high-quality books for read alouds, accompanied by a framework for teaching with those books.

Teaching with Literacy Programs Patricia A. Edwards, Kristen L. White, Ann M. Castle, Laura J. Hopkins, 2023-09-21 Winner of the AACTE 2025 Gloria J. Ladson-Billings Outstanding Book Award A step-by-step guide to developing equitable literacy instruction by adapting curriculum to support diverse learners. In Teaching with Literacy Programs, Patricia A. Edwards, Kristen L. White, Laura J. Hopkins, and Ann M. Castle present a model that allows educators to address educational inequity through the critical and adaptive use of existing literacy curriculum materials. In this accessible work, they advise educators on ways to combine common classroom materials, such as basal readers and core reading programs, with instructional practices that provide high-quality, responsive instruction to all students. Edwards, White, Hopkins, and Castle credit literacy instruction as a core part of overall educational equity, and they recognize the crucial role that educators play in translating materials into instruction that benefits all learners. Here they offer teacher education in support of this essential role, deftly guiding educators through a four-part development process, CARE, an acronym for cultivating critical consciousness, analyzing materials, reconstructing curricula, and evaluating instruction reflectively to advance equity. Built upon culturally relevant, sustaining, and antiracist pedagogy, CARE enables teachers to provide literacy instruction that meets the range of needs and performance levels in classrooms, supporting students in attaining academic achievement, cultural competence, and critical consciousness. The approach outlined in this work, which can be put into immediate practice, helps educators to provide literacy instruction that builds on students' multiple literacies and reduces educational inequity.

The Oxford Companion to Children's Literature Daniel Hahn, 2015-03-26 The last thirty years have witnessed one of

the most fertile periods in the history of children's books: the flowering of imaginative illustration and writing, the Harry Potter phenomenon, the rise of young adult and crossover fiction, and books that tackle extraordinarily difficult subjects. The Oxford Companion to Children's Literature provides an indispensable and fascinating reference guide to the world of children's literature. Its 3,500 entries cover every genre from fairy tales to chapbooks; school stories to science fiction; comics to children's hymns. Originally published in 1983, the Companion has been comprehensively revised and updated by Daniel Hahn. Over 900 new entries bring the book right up to date. A whole generation of new authors and illustrators are showcased, with books like *Dogger*, *The Hunger Games*, and *Twilight* making their first appearance. There are articles on developments such as manga, fan fiction, and non-print publishing, and there is additional information on prizes and prizewinners. This accessible A to Z is the first place to look for information about the authors, illustrators, printers, publishers, educationalists, and others who have influenced the development of children's literature, as well as the stories and characters at their centre. Written both to entertain and to instruct, the highly acclaimed Oxford Companion to Children's Literature is a reference work that no one interested in the world of children's books should be without.

Empowering Families Judy Bradbury, Susan E. Busch, 2015-04-24 The home-school connection is important to student literacy achievement. However, it can be time-consuming to develop and implement programming that keeps families engaged and involved. *Empowering Families* makes it easier to accomplish these goals! Chock-full of step-by-step plans for arranging a variety of parent/caregiver meetings and literacy booster events, the book enables educators to get families involved in their children's learning in ways that are fun and non-intimidating. By hosting these events at your school, you'll be empowering families to... read aloud to their children at home; minimize the summer slide; encourage male involvement in literacy; help their children avoid homework hassles; and much, much more! Bonus: The book includes ready-to-use handouts for your events, such as announcement sheets, follow-up evaluations, and tipsheets that describe ways parents can reinforce literacy at home. These handouts are photocopiable and the tipsheets are also available for easy download from our website at www.routledge.com/9781138803114. Spanish versions of the tipsheets are available on our website as well.

The Balancing Act: An Evidence-Based Approach to Teaching Phonics, Reading and Writing Dominic Wyse, Charlotte Hacking, 2024-06-20 Dominic Wyse and Charlotte Hacking present a ground-breaking account of teaching phonics, reading, and writing. Created from a landmark study, new research, new theory, and cutting-edge teacher professional development, this balanced approach to teaching seeks to improve all children's learning, and therefore life chances. The book dismantles polarised debates about the teaching of phonics and analyses the latest scientific evidence of what really works. It shows, in vivid detail, how phonics, reading, and writing should be taught through the creativity of some of the best authors of books for children. By describing lessons inspired by 'real books', it showcases why the new approach is more effective than narrow phonics approaches. The authors call for a paradigm shift in literacy education. The chapters

show how and why education policies should be improved on the basis of unique analyses of research evidence from experimental trials and the new theory and model the Double Helix of Reading and Writing. It is a book of hope for the future in the context of powerful elites influencing narrow curricula, narrow pedagogy, and high stakes assessments. The Balancing Act will be of interest to anyone who is invested in young children's development. It is essential reading for teachers, trainee teachers, lecturers, researchers, and policy makers world-wide who want to improve the teaching of reading and writing in the English language.

Illinois Reading Council Journal ,2016

The Early Reader in Children's Literature and Culture Jennifer Miskec,Annette Wannamaker,2015-12-22 This is the first volume to consider the popular literary category of Early Readers – books written and designed for children who are just beginning to read independently. It argues that Early Readers deserve more scholarly attention and careful thought because they are, for many younger readers, their first opportunity to engage with a work of literature on their own, to feel a sense of mastery over a text, and to experience pleasure from the act of reading independently. Using interdisciplinary approaches that draw upon and synthesize research being done in education, child psychology, sociology, cultural studies, and children's literature, the volume visits Early Readers from a variety of angles: as teaching tools; as cultural artifacts that shape cultural and individual subjectivity; as mass produced products sold to a niche market of parents, educators, and young children; and as aesthetic objects, works of literature and art with specific conventions. Examining the reasons such books are so popular with young readers, as well as the reasons that some adults challenge and censor them, the volume considers the ways Early Readers contribute to the construction of younger children as readers, thinkers, consumers, and as gendered, raced, classed subjects. It also addresses children's texts that have been translated and sold around the globe, examining them as part of an increasingly transnational children's media culture that may add to or supplant regional, ethnic, and national children's literatures and cultures. While this collection focuses mostly on books written in English and often aimed at children living in the US, it is important to acknowledge that these Early Readers are a major US cultural export, influencing the reading habits and development of children across the globe.
