*El desafío de la Transformación Cualitativa en la Educación Universitaria* Luisa Fernando Zambrano Diaz, 2022-06-06

Este Plan Especial de Todo más Tesis se proyectó y logró en un año, pero en un año de tiempos pandémicos 2020/2021, pero además en una situación donde la República Bolivariana de Venezuela ha sido epicentro de una guerra económica, una guerra cognitiva, una guerra cultural de 5.ª generación. Históricamente, en un país en guerra permanente, la gente ve afectados sus estudios, no se gradúa. Nuestro país es un caso atípico en plena guerra. En plena pandemia, aseguramos el ingreso universitario, aseguramos la prosecución de los estudios y el egreso universitario de calidad; el postgrado en nuestro Decanato no escapa de ello. El desafío que nos trazamos con el Plan T+T fue propiciar que los participantes que hubiesen culminado su carga académica en cohortes anteriores al período 2016 y aquellos que solo estuviesen pendiente de defender su trabajo de investigación bajo la modalidad de Trabajo Especial de Grado (TEG), Trabajo de Grado (TG) o Tesis Doctoral (TD) pudiesen presentar sus resultados investigativos generando diversos productos intelectuales, según el programa académico cursado

Plan de marketing. Potenciando la participación de mercado de un programa de Maestría Hermer Ernesto Alzamora Román, Sandy Lorena Alzamora Curay, 2024-08-20 Hoy en día, las organizaciones han optado por prepararse de forma más

eficiente para hacer frente a las exigencias diarias y garantizar su permanencia en el mercado. Para lograrlo, están creando planes y estrategias para contrarrestar las situaciones adversas que enfrentan. Como resultado, empresas de diversos sectores se concentran en la elaboración de planes estratégicos, operativos, y de marketing, entre otros. Un ejemplo de esto es el Programa de Maestría en Administración de la Universidad Nacional de Piura, que ante las señales de alerta y la creciente competencia, ha considerado la elaboración del plan de marketing como una solución atractiva. Por lo tanto, este libro de investigación propone un Plan de Marketing completo para la organización, que abarque tanto el marco teórico como la aplicación práctica necesaria para su correcta implementación, con el propósito de afrontar la intensa competencia en el sector.

*Teaching Innovations in Economics* María del Carmen Valls Martínez, José-María Montero, 2024-10-31 This book highlights the latest technological innovations in economics education. Economics, as a discipline, not only studies the relationship between ends and scarce means, which can be used alternatively, but also serves as a social science that uses historical data to predict future events—a task complicated by the influence of human behavior. In economics, a solid theoretical foundation alone is insufficient; practical application requires a deep understanding of statistics. With the vast amount of information available today, data processing is now performed using specialized software. Consequently, teaching economics demands a wide range of complex skills that have significantly evolved in recent years, driven by the growing interest in educational innovation among professors and scientists, further accelerated by advancements in new technologies. Moreover, economics education is increasingly aligned with the global concern for sustainability, as emphasized in the United Nations' Agenda 2030. Professors are now integrating sustainability into syllabi and teaching methodologies. This book covers key topics such as: Technological and innovative advancements in economics education. New teaching-learning theories and models in economics education. The impact of digital transformation on economics education. The role of

artificial intelligence in economics education. Addressing special educational needs in economics education. Evaluation of the teaching-learning process in economics. Assessment of student learning in economics. Development of materials and tools for economics education. Final projects (Undergraduate and Master's) in economics. Authored by leading professors and researchers in the field, this book presents a collection of chapters that rigorously explore teaching innovations in economics.
