Dante's Plurilingualism Sara Fortuna,2017-07-05 Dante's conception of language is encompassed in all his works and can be understood in terms of a strenuous defence of the volgare in tension with the prestige of Latin. By bringing together different approaches, from literary studies to philosophy and history, from aesthetics to queer studies, from psychoanalysis to linguistics, this volume offers new critical insights on the question of Dantes language, engaging with both the philosophical works characterized by an original project of vulgarization, and the poetic works, which perform a new language in an innovative and self-reflexive way. In particular, Dantes Plurilingualism explores the rich and complex way in which Dantes linguistic theory and praxis both informs and reflects an original configuration of the relationship between authority, knowledge and identity that continues to be fascinated by an ideal of unity but is also imbued with a strong element of subjectivity and opens up towards multiplicity and modernity.

Data protection in the context of covid-19. A short (hi)story of tracing applications Elise Poillot,Gabriele Lenzini,Giorgio Resta,Vincenzo Zeno-Zencovich,2021-11-13 The volume presents the results of a research project (named "Legafight") funded by the Luxembourg Fond National de la Recherche in order to verify if and how digital tracing applications could be implemented in the Grand-Duchy in order to counter and abate the Covid-19 pandemic. This inevitably brought to a deep comparative overview of the various existing various models, starting from that of the European Union and those put into practice by Belgium, France, Germany and Italy, with attention also to some Anglo-Saxon approaches (the UK and Australia). Not surprisingly the main issue which had to be tackled was that of the protection of the personal data collected through the tracing applications, their use by public health authorities and the trust laid in tracing procedures by

citizens. Over the last 18 months tracing apps have registered a rise, a fall, and a sudden rebirth as mediums devoted not so much to collect data, but rather to distribute real time information which should allow informed decisions and be used as repositories of health certifications.
