**The Mexican Legal System** Francisc Avalos, 1992-05-26 This reference guide to the laws and legal literature of Mexico has been designed carefully by a reference librarian for researchers who do not read or speak Spanish. This basic sourcebook provides answers to the questions that are asked most frequently: Which is the relevant code? Where can the text of the code be found? What secondary material is available? Which material is available in English? This up-to-date guide should be useful as a reference in college, university, law, government, and public libraries and in companies that do business with Mexico. It could also be used in courses dealing with Mexican law and business. An introduction briefly describes Mexico's legal system and provides some historical background. Then the bibliography points to primary and secondary material of importance and is annotated partially. Entries are organized under forty-one subject categories with subdivisions pointing to the laws, the sources for the text of the laws, secondary materials from periodicals, and books and monographs. All Spanish titles are given first in Spanish and then in English. An appendix gives a directory of publishers. Author and subject indexes are included.

*Derecho Mercantil* Luis Eduardo Paredes Sánchez, Oliver Meade Hervert, 2014-10-21 Explica las bases y fundamentos del derecho mercantil, y del derecho comparado y del análisis propio de las figuras jurídicas, se busca obtener criterios modernos y prácticos para entender nuestra legislación y adecuarla a las necesidades actuales del comercio, particularmente respecto de figuras complejas dentro de la doctrina nacional y extranjera.

*Essays on Private Law* Ian F.G. Baxter, 1966-12-15 This book contains a series of essays on conflict laws, including jurisdiction of the courts, choice of law, renvoi, property, recognition of family status, and recognition of foreign corporations. It is not a text-book, but an analysis and criticism of existing principles with recommendations for reform and for a different approach to the subject. In general, an approach is advocated that will be simpler and less abstract and doctrinaire than at present, and better integrated with the ordinary laws of the forum. The recommendations made could be thought of as principles on which to build a reform of conflict of laws or a model code. The first two chapters deal with jurisdiction and choice of law, two distinct topics, with different considerations of policy, which have not always been kept

distinct by judges and text writers. The third chapter considers certain questions of legal interpretation, mainly in the construction of money obligations expressed in a foreign currency. This shows a working out of the problems of contract analysis and interpretation which are dealt with more generally in other chapters. Another chapter discusses property law, a branch of the law which has been influenced, historically, by the doctrine of situs, and the recognition of status in family law and in corporation law. The concluding chapter draws together the main results of the preceding discussion and states from basic principles, one of which is that there is a need “for greater unity between the conflict rules and the general law,” and for “allowing, where appropriate, the influence of legal systems other than that of the forum.” Professor Baxter’s discussion clearly shows that the complexity of current legal theory can lead to unjust rulings in the courts, and his case for greater simplification is argued compellingly.
