100 Questions & Answers About Cholangiocarcinoma, Gallbladder, and Bile Duct Cancers Ghassan K. Abou-Alfa,Eileen O'Reilly,2021-11-15 100 Questions & Answers About Cholangiocarcinoma, Gallbladder, and Bile Duct Cancers is a resource that empowers patients and caregivers with the information needed to navigate their treatment with realistic goals for a good quality of life and targeted long-term survivorship.

Bile Duct Cancer Luis Rodrigo,2019 Cholangiocarcinoma is a type of malignant tumor that affects the biliary system. It can arise anywhere in the bile ducts, manifesting itself as obstructive jaundice. It has an annual incidence of 1-2 cases per 100,000 people. One variety of the disease, the Klatskin tumor, occurs in the hepatic hilum and is characterized by poor prognosis. Generally, cholangiocarcinomas are slow-growing tumors with late metastases. Localized tumors are treated surgically, but intervention is discouraged when they are extensive. The disease affects both sexes, but most cases occur in patients aged over 60 years. Primary sclerosing cholangitis, chronic biliary infection, and choledochal cysts are associated with an increased risk of cholangiocarcinoma.

Hilar Cholangiocarcinoma W.Y. Lau,2013-05-16 This is a multi-author book on hilar cholangiocarcinoma, written by an

international team of world-renowned experts covering topics in their respective areas of expertise. There are altogether 71 authors from 14 countries/regions, mainly Argentina, Australia, China, Germany, Italy, Japan, Korea, Malaysia, Thailand, the Netherlands, the United Kingdom and the United States of America. This book aims to provide an up-to-date, fully referenced text that is as succinct as possible, but as comprehensive as necessary, addressing all topics in hilar cholangiocarcinoma. It provides the latest findings in the rapidly advancing field of hilar cholangiocarcinoma. Controversial aspects are discussed by highly regarded authorities who look at the problem from different perspectives. A helpful list of references is included at the end of each chapter. The extensive use of diagrams, figures and tables makes the text easy to read. This book is primarily intended for clinicians and researchers who are interested in hilar cholangiocarcinoma, including liver surgeons, hepatologists, interventional and diagnostic radiologists, and basic researchers. General physicians, general surgeons, trainees, epidemiologists, hospital administrators, pathologists and instrument manufacturers will also find this book to be a valuable reference work. Editor Lau is currently a Professor of Surgery at the Chinese University of Hong Kong, and an Academician of Chinese Academy of Sciences, China.

100 Questions & Answers About Biliary Cancer Ghassan K. Abou-Alfa, Eileen O'Reilly, 2013-11-19 100 Questions & Answers About Biliary Cancer provides authoritative and practical answers to the most common questions asked by patients and their loved ones. Providing both doctor and patient perspectives, this easy-to-read book is a comprehensive guide to the basics of biliary cancer, risk factors and prevention, diagnosis, treatment, survivorship, and life after diagnosis. Written by Dr. Ghassan Abou-Alfa, a board-certified medical oncologist who specializes in primary liver cancer (hepatocellular carcinoma), pancreas, gallbladder, and bile duct tumors, 100 Questions & Answers About Biliary Cancer is an invaluable resource for anyone interested in learning what to expect after being diagnosed with biliary cancer.

Bile Duct Cancer Luis Rodrigo, 2019-09-25 Cholangiocarcinoma is a type of malignant tumor that affects the biliary system. It can arise anywhere in the bile ducts, manifesting itself as obstructive jaundice. It has an annual incidence of 1-2 cases per 100,000 people. One variety of the disease, the Klatskin tumor, occurs in the hepatic hilum and is characterized by poor prognosis. Generally, cholangiocarcinomas are slow-growing tumors with late metastases. Localized tumors are treated surgically, but intervention is discouraged when they are extensive. The disease affects both sexes, but most cases occur in patients aged over 60 years. Primary sclerosing cholangitis, chronic biliary infection, and choledochal cysts are associated with an increased risk of cholangiocarcinoma.

Biliary Tract and Gallbladder Cancer Joseph M. Herman, Timothy M. Pawlik, Charles R. Thomas, Jr., 2014-03-21 The second edition of this book is intended as a definitive text on biliary tract and gallbladder cancers. Specifically, it will serve as a single-source reference on the current knowledge base for the multidisciplinary management of such cancers and thus covers epidemiological, surgical, radiotherapy, and chemotherapy approaches. A key feature is the demonstration of the

impact of cutting-edge technical knowledge on treatment; for example, interventional radiology techniques, novel surgical approaches, and image-guided radiation therapy are all extensively discussed. Diagnosis is also considered in detail, with coverage of novel serum biomarkers, pathologic staging, molecular profiling, and the full range of current and emerging imaging strategies. This book will be an invaluable source of information on new techniques for experienced practitioners, yet is sufficiently concise to offer an introduction to the field for students and community practitioners.

Cholangiocarcinoma (bile duct cancer) is a cancer of the bile duct and liver. A person can seem healthy and/or can have a variety of symptoms, such as weight loss, bloating, abdominal pain, jaundice (yellowing of the skin and/or eyes), itchy skin, dark urine and/or pale stools. The location of the tumor within the liver/bile duct and its size and spread to other areas of the body will determine the cancer treatment plan. Treatment options may include surgery, chemotherapy, radiotherapy, liver transplant, targeted therapies and clinical trials. This book aims to help patients understand their options, enabling informed decisions, in conjunction with their doctor and other members of the medical team, about their cancer treatment. Table of Contents: • Understanding cholangiocarcinoma • How does cholangiocarcinoma develop? • Symptoms • Seeing your doctor • Diagnostic tests and procedures • Staging • Biomarker testing • Multidisciplinary teams and tumor boards • Surgery • Radiation therapy • Systemic therapy • Treatments and schedules • Infusion therapy • Clinical trials • What new treatments are being studied? • Targeted treatments • Taking part in research • Palliative procedures • Stents • Reducing side effects • Follow-up care • Outlook • If treatment is unsuccessful • Coping • Being supported • What can I do to help myself?
