*The Routledge Companion to Mindfulness at Work* Satinder K. Dhiman, 2020-09-08 Given the ever-growing interest in the benefits of mindfulness to organizations and the individuals who work in them, this Companion is a comprehensive primary reference work for mindfulness (including creativity and flow) in the workplace, including business, healthcare, and educational settings. Research shows that mindfulness boosts creativity through greater insight, receptivity, and balance, and increases energy and a sense of wellbeing. This Companion traces the genesis and growth of this burgeoning field, tracks its application to the workplace, and suggests trends and future directions. With contributions from leading scholars and practitioners in business, leadership, psychology, healthcare, education, and other related fields, The Routledge Companion to Mindfulness at Work is an extensive reference work which will be a vital resource to the fields of management and organizational studies, human resource management, psychology, spirituality, cultural anthropology, and sociology. Each chapter will present a listing of key topics, a case or situation that illustrates the application of the themes, workplace lessons, and reflection questions.

**Healing the Mind with Faith, Friendship and Love** B.S. Kesavan M.D., 2018-07-09 This is my maiden attempt to write a memoir – with events portrayed the way I remember them. It is about faith, friendship and love. Also, it is a story about a dreamer who was determined to overcome all odds; illness, death and failure did not deter him from achieving his goal. It is a story about resilience and facing disappointments with grace. It is about finally trying to seek the truth about the meaning of life and attempting to tread the path towards spirituality.

**Place/No-Place in Urban Asian Religiosity** Joanne Punzo Waghorne, 2016-07-15 This book discusses Asia's rapid pace of urbanization, with a particular focus on new spaces created by and for everyday religiosity. The essays in this volume – covering topics from the global metropolises of Singapore, Bangalore, Seoul, Beijing, and Hong Kong to the regional centers of Gwalior, Pune, Jaipur, and sites like Wudang Mountain – examine in detail the spaces created by new or changing religious organizations that range in scope from neighborhood-based to consciously global. The definition of “spatial aspects” includes direct place-making projects such as the construction of new religious buildings – temples, halls and other meeting sites, as well as less tangible religious endeavors such as the production of new “mental spaces” urged by spiritual leaders, or the shift from terra firma to the strangely concrete effervesce of cyberspace. With this in mind, it explores how distinct

and blurred, and open and bounded communities generate and participate in diverse practices as they deliberately engage or disengage with physical landscapes/cityscapes. It highlights how through these religious organizations, changing class and gender configurations, ongoing political and economic transformations, continue as significant factors shaping and affecting Asian urban lives. In addition, the books goes further by exploring new and often bittersweet “improvements” like metro rail lines, new national highways, widespread internet access, that bulldoze – both literally and figuratively – religious places and force relocations and adjustments that are often innovative and unexpected. Furthermore, this volume explores personal experiences within the particularities of selected religious organizations and the ways that subjects interpret or actively construct urban spaces. The essays show, through ethnographically and historically grounded case studies, the variety of ways newly emerging religious communities or religious institutions understand, value, interact with, or strive to ignore extreme urbanization and rapidly changing built environments.
