3D Cinema Miriam Ross,2015-03-24 3D Cinema: Optical Illusions and Tactile Experiences questions the common frameworks used for discussing 3D cinema, realism and spectacle, in order to fully understand the embodied and sensory dimensions of 3D cinema's unique visuality.

**Expressive Spaces in Digital 3D Cinema** Owen Weetch,2016-09-26 This book puts forward a more considered perspective on 3D, which is often seen as a distracting gimmick at odds with artful cinematic storytelling. Owen Weetch looks at how stereography brings added significance and expressivity to individual films that all showcase remarkable uses of the format. Avatar, Gravity, The Hole, The Great Gatsby and Frozen all demonstrate that stereography is a rich and sophisticated process that has the potential to bring extra meaning to a film's narrative and themes. Through close reading of these five very different examples, Expressive Spaces in Digital 3D Cinema shows how being sensitive to stereographic manipulation can nuance and enrich the critical appreciation of stereoscopic films. It demonstrates that the expressive placement of characters and objects within 3D film worlds can construct meaning in ways that are unavailable to 'flat' cinema.

*The ^AShape of Motion* Jordan Schonig,2021-11-24 The Shape of Motion: Cinema and the Aesthetics of Movement develops a method for analyzing movement on screen by identifying patterns or shapes of motion-called motion forms-across a wide range of examples from the history of cinema. By examining a single motion form, each chapter rethinks persistent assumptions in film studies about cinema as a medium.

The Making of Life of Pi Jean-Christophe Castelli,2012-11-13 Diversely illustrated with 275 photographs and illustrations, The Making of Life of Pi tells the inside story of how renowned Academy Award-winning director Ang Lee brought Yann Martel's international bestseller to life as a 3-D film. With a rich, entertaining text and a wide variety of facts, anecdotes, visual portfolios, and sidebars sure to delight readers of all ages, The Making of Life of Pi follows the making of the film from pre-production through final cut. Of course, you'll meet Suraj Sharma, the sixteen-year-old unknown Indian high-school student who won the part of Pi although he had no acting experience and didn't even know how to swim—yet in the end

performed all of his own stunts. You'll learn about the massive wave tank, custom-built for the film that replicated a vast, stormy ocean in all its moods, thanks to a complex and specially devised menu of wave and wind combinations, some really powerful machinery, and tons of water. You'll get to look inside the fifty-page fully illustrated survival guide that shipwreck survivor Steven Callahan created for Pi to consult on his raft. And you'll read about King, Themis, Minh, and Jonas, the four Bengal tigers used in the film—and discover how visual effects were able to create a seamless 3-D image of the tiger Richard Parker. A foreword by Yann Martel, an introduction by Ang Lee, and an incredible range of visual materials—fine art, vintage archival imagery, and commissioned portfolios by photographer Mary Ellen Mark and artist Alexis Rockman—supplement the film's storyboards, sketches, and stills, rounding out this highly experiential book for lovers of the novel and film viewers alike.
